Award Description*

ARRA Healthcare Associated Infections, Emerging Infections Program - The Connecticut Department of Public Health will evaluate MRSA HAIs in non-hospital settings using valid disease measures to assess the fraction of invasive Methicillin-resistant Staphlococcus aureus (MRSA) infections with disease onset outside of the acute care setting that may be reasonably preventable. These data will be used to inform prevention initiatives to prevent invasive MRSA bloodstream infections in these settings. Specific activities include:
A. Participate in protocol development with the EIP/Active Bacterial Core Surveillance MRSA Pathogen committee, obtain necessary approvals from all participating institutions, and complete necessary data collection.
B. Obtain necessary approvals to gain access to medical records from long-term care facility residents and patients recently discharged from acute care facilities.
C. Submit de-identified data to CDC for multi-site analysis in accordance with common protocol.
In addition, the Department will enhance surveillance efforts through the through the National Healthcare Safety Network (NHSN) through training programs and establishing a communication network of all NHSN facilities within the EIP catchment area and establish the EIP sites as a NHSN group user with specified rights t

Number of Jobs*	Description of Jobs Created*
0.00	The Connecticut Department of Public Health will hire a 0.7 FTE Durational Epidemiologist to collaborate with CDC and the other participating EIP sites around the country, foster expanded use of NHSN, evaluate NHSN reporting and operations, coordinate the state's participation in the upcoming national HAI seroprevalence survey, and lead projects on multi-drug resistant organisms and clostridium difficle surveillance. Number of characters entered: 420

Quarterly Activities/Project Description*

The Department has begun establishment of a communication network within each EIP of all National Healthcare Safety Network (NHSN) facilities within the EIP's catchment area, establishing each EIP site as a "group user" for the communication network. Our efforts will provide leadership and resources to network facilities to conduct studies that evaluate and improve HAI surveillance. The Department is commited to building infrastructure and expertise in HAI surveillance and prevention, implement HAI evaluations through common protocols, and strengthen relationships with infection prevention programs of affiliated healthcare facilities.
