This EIP program will: 1 Evaluate MRSA HAIs in non-hospital settings

Use valid disease measures to assess the fraction of invasive Methicillin-resistant Staphlococcus aureus (MRSA) infections with disease onset outside of the acute care setting that may be reasonably preventable. Use these data to inform prevention initiatives to prevent invasive MRSA bloodstream infections in these settings. Specific activities include:

A. Participate in protocol development with the EIP/Active Bacterial Core Surveillance MRSA Pathogen committee, obtain necessary approvals from all participating institutions, and complete necessary data collection.

B. Obtain necessary approvals to gain access to medical records from long-term care facility residents and patients recently discharged from acute care facilities.

C. Submit de-identified data to CDC for multi-site analysis in accordance with common protocol.

2. Innovations in surveillance through the NHSN.

A. Identify or hire staff with expertise in HAI surveillance and prevention to oversee EIPs HAI activities. Ensure that staff involved in HAI activities receive necessary HAI training.

B. Establish a communication network of all NHSN facilities within the EIP catchment area and establish the EIP sites as a NHSN group user with specified right

Quarterly Activities/Project Description*

To build infrastructure and expertise in Healthcare Associated Infections (HAI) surveillance and prevention within the Emerging Infections Programs (EIP), implement HAI evaluations through common protocols, and strengthen relationships with infection prevention programs of affiliated healthcare facilities. This wi be accomplished by establishing a communication network within each EIP of all National Healthcare Safety Network (NHSN) facilities within the EIP's catchme area, establishing each EIP site as a "group user" for the communication network, and providing leadership and resources to network facilities to conduct studies that evaluate and improve HAI surveillance.
