25 to Survive: Reducing Residential Injury and LODD

www.25tosurvive.eventbrite.com

More firefighters are seriously injured and killed while operating at residential building fires than at any other building type we encounter. This presentation addresses 25 critical firefighting issues common to the residential dwelling, many repeatedly noted in "near miss reports" and National Institute Occupational Safety and Health (NIOSH) Line of Duty Death (LODD) reports. These grim realizations require all personnel need to know sound strategies and tactics and how to execute them in order to fight these fires successfully. The program is broken into 4 key segments: Combat Ready, Developing the Mastery, Engine Company Operations and Truck Company Operations.
