Revised Bridge Design Manual

The Department's Bridge Design Manual has been updated and incorporates extensive editorial changes. The manual also updates the general design requirements and Section 3, Loads and Load factors has been rewritten. The manual incorporates new concrete designations and pay items. Many Department design and material preferences are identified. With this manual update, the following CE General Memoranda are now obsolete: 06-02; 07-10; 07-11, 08-08, 09-01, 11-04, and 12-03. They will be marked accordingly.

A summary of changes is available via the Bridge Design Manual Website.

The Manual is also available on the Department's Engineering and Construction Information Resources web page.

Effective date of this bulletin is May 13, 2019
