

Katie Beckett Waiver

What is the Katie Beckett Waiver?

The Katie Beckett Waiver serves children and young adults (ages 18 and under) with a physical disability who may or may not also have a developmental disability. These services help individuals who would otherwise not qualify for Medicaid due to family income.

Eligibility

- Individuals ages 18 and under with a physical disability and who may or may not also have a developmental disability
- Meet the "Level of Care Requirement," meaning without the waiver the individual would otherwise receive services in an institutional setting (i.e., nursing home, hospital)

Under the Katie Beckett Waiver, the income of a parent or spouse is not counted when determining Medicaid eligibility. However, the income must be listed.

Is there a waiting list?

Yes. Individuals are encouraged to apply even when there is a waiting list.

What services does it offer?

The waiver offers case management by a home health agency in addition to standard Medicaid-covered services such as physician services, personal care services, therapies, home health services, and hospital inpatient and outpatient services.
