

Hello:

I read the email from Senator Murphy regarding the recycling dilemma. I am huge into recycling but it's not helpful to know that our town (west Haven) only collects the 1 and 6 recyclables. I also feel that if we had bigger bins to recycle, people would be more apt to do so. For instance, Bridgeport and other towns offer the huge bins with wheels and lids while in West Haven and other towns, they only offer small bins and barely enough space. Also, if there were recycling areas in beaches, parks, universities and malls (high traffic areas), people would recycle more. Just a thought.
