To: DEEP RecyclingProgram

Good morning:

Item #1 - I would like to see a statewide education program which would educate the public on the status of trash management here in Connecticut. This educational campaign would also inform the public on what needs to be done to effectively manage our trash going forward into the future.

Item #2 – I would like to see an educational campaign telling people that the recyclable material that they put into the single stream must be clean. And clean would mean washed and clean, not just rinsed.

Item #3 – I would like to see an incentive program for would be manufacturers of recycled material.
