

LOCKWOOD LECTURE

*Lineage-specific chromosomes related to pathogenicity revealed by *Fusarium* comparative genomics.*

Dr. Li-Jun Ma

Principle Research Scientist
Fungal Genome Initiative
The Broad Institute of MIT and Harvard
Cambridge, MA

Wednesday, 15 April 2009

Tea: 10:30 a.m.
Lecture: 11:00 a.m.

Jones Auditorium
The Connecticut Agricultural Experiment Station
123 Huntington Street
New Haven, CT

Dr. Ma is internationally recognized for her work with the genetic determinants of fungal pathogenicity and host specificity, and for her participation in functional studies to test the hypotheses generated through genomic analyses.
