Dr. Joseph S. Elkinton
Professor of Entomology
Department of Plant, Soil, and Insect Sciences
University of Massachusetts
Amherst, MA

Monday, 8 December 2008
Tea: 10:30 a.m.
Lecture: 11:00 a.m.
(Please note the date has changed from Tuesday, December 2, 2008)

Jones Auditorium
The Connecticut Agricultural Experiment Station
123 Huntington Street
New Haven, CT

Dr. Elkinton conducts research on population dynamics and biological control of invasive forest insects. More recent projects focus on the population dynamics of browntail moth, hemlock woolly adelgid, elongate hemlock scale and winter moth. He is currently involved with efforts to introduce predatory beetles to control hemlock woolly adelgid and a tachinid parasitoid to control winter moth.
