The 74th Report on

FOOD PRODUCTS

1969

J. GORDON HANNA
The 74th Report on
FOOD PRODUCTS
1969
J. Gordon Hanna

To help Connecticut consumers protect themselves from fraud, adulterations, and deception, this Station has examined foods offered for sale in this State since 1896. Bulletins of such examinations are published annually. By use of this impartial analytical information, the consumer can more intelligently choose among suppliers of foods.

The arrangement of this bulletin is an alphabetical listing of Connecticut towns and dealers from which samples have been collected. This arrangement is intended to make information readily available to help the reader assess the relative reliabilities of suppliers in his area. The analyses made by Station chemists are shown and deficiencies, if any, are noted. The data in the bulletin are also useful in comparing the qualities of different brands of the same product.

The total number of samples analyzed in the previous six years and the number of such samples found deficient in one or more ways are tabulated for each dealer sampled in the year covered by this report. The reader should understand that many of the food samples were collected because they were already suspect, either by inspectors or by consumers. Therefore, the ratio of number of deficiencies found relative to the total number of samples examined is higher than that expected from purely random sampling.

The official samples reported in this bulletin were collected by inspectors of the Department of Consumer Protection and of the Department of Agriculture and Natural Resources. Authority for prosecution of violators and for the inspection of food establishments and dairies is given to the Commissioners of these Departments. The station makes no prosecution of dealers. Throughout the year, results are made immediately available to the Commissioners to aid them in enforcement.

In addition to the samples listed, the Commissioner of Agriculture and Natural Resources submitted 470 samples of the Connecticut milk supply for chlorinated pesticide residue analyses.

Evaluations of the significance of the pesticide residues found in milk and other food and reported in this bulletin are based on official tolerance levels established by the Food and Drug Administration of the U.S. Department of Health, Education and Welfare. In most cases these tolerance levels include a 100-fold safety factor based on the physiological effects on test animals.

The cover photos show Richard A. Botsford (top), using an atomic absorption spectrophotometer to determine trace elements; Mrs. Ruth S. Barger, measuring retention time of residues in vegetables by gas chromatography; and Sherman R. Squires, making an extraction of food additives. All are members of the Station staff in Analytical Chemistry.

Photos by Raymond E. West
Analyses for adulteration or for conformance to label claims were in many cases the bases for deciding whether or not samples were deficient. In other cases examinations of products for conformance to State and Federal definitions and standards of identity were used. Some of the latter requirements may be of interest relative to the interpretation of the data listed in this bulletin.

Frankfurts and bologna are limited to not more than 3.5 per cent fillers, 10 per cent added water, and 200 parts per million sodium nitrite. Hamburg must not contain more than 30 per cent fat, and pork sausage not more than 50 per cent fat. The addition of sulfur dioxide to any meat product is prohibited.

Vitamin D Milk is standardized to contain 400 USP units of vitamin D per quart. Vitamin-mineral fortified milk is required to contain not less than the following quantities of vitamins: vitamin A, 4,000 and vitamin D, 400 USP units per quart; thiamine, 1; riboflavin, 2; and niacin, 10 milligrams per quart.

The work represented by this report was performed by Messrs. Botsford, Glowa, Hankin, Keirstead, Smith, Squires, West, Wickroski, Miss Hornig, and Mrs. Barger, McLean and Rogers.

## Food Products

### ANSONIA

First National Stores, Inc., Main Street  
JK-112 Ground Chuck. Fat, 25%; sulfite, none found.

JK-165 Ground Chuck. Fat, 28%; sulfite, none found.

Previous 6 yrs: Total samples, 3  
Samples deficient, 1

First National Stores, Inc., Pershing Drive  
JK-140 Chopped Beef. Fat, 20%; sulfite, none found.

JK-166 Ground Chuck. Fat, 25%; sulfite, none found.

Previous 6 yrs: Total samples, 0

### AVON

Al's Farmers Market, Route 44  
KN-9578 Corn. Pesticides, within tolerances.

Previous 6 yrs: Total samples, 0

### BERLIN

Topps Discount City, Webster Sq. Road.  
AL-1868 Richardson Butter Mints. Fat, 0.8%; Reichert-Meissl No., 28; Polenske No., 77; Kirschner No., 19.

Deficiency noted: Name "Butter Mints" misleading for a product containing such a small amount of butter.

Previous 6 yrs: Total samples, 3  
Samples deficient, 0

### BLOOMFIELD

Bergeron & Sons Texaco Station, 1298 Blue Hills Avenue  
AF-1175 Sprite (2 bottles). Visual examination satisfactory.

Previous 6 yrs: Total samples, 0

Interstate Automatic Service, Inc., 13 Britton Drive  

Previous 6 yrs: Total samples, 0

Popular Market, 776 Park Avenue  
AF-1182 Friskies-Fish Flavor Cat Food. Visual examination, normal.

Previous 6 yrs: Total samples, 1

Samples deficient, 0
BOLTON

Aldo Pescesc, Hebron Road
WM-11369 Cabbage. Pesticide residue, within tolerances.

WM-11370 Cauliflower. Pesticide residue, within tolerances.

Frank Pasquilo, RFD No. 1
WM-11367 Cauliflower. Pesticide residue, within tolerances.

WM-11368 Cabbage. Pesticide residue, within tolerances.

Morra Farm, Tinker Pond Road
WM-11371 Cabbage. Pesticide residue, within tolerances.

WM-11372 Cauliflower. Pesticide residue, within tolerances.

BRANFORD

J. M. Fields, Cherry Hill Shopping Center
LP-22 King's Delux Patties. Fat, 29%; dextrose, 0.2%; sucrose, 0.0%.

Previous 6 yrs: Total samples, 0

Hilltop Orchards, Boston Post Road
WM-11249 Blueberries. Pesticides, within tolerances.

WM-11250 Nectarines. Pesticides, within tolerances.

Casmir Johnson, 175 Cherry Hill Road
KN-9574 Summer Squash. Pesticides, within tolerances.

Pasquale Saturo, 127 Hosley Avenue
KN-9572 Endive. Pesticides, within tolerances.
