CONNECTICUT AGRICULTURAL EXPERIMENT STATION.

Bulletin No. 58, April 28, 1881.

SUPERPHOSPHATES, GUANOS.

556 Soluble Nitrogenous Phosphate.

567 Pine Island Guano.

The samples named above were manufactured by the Quinnipiac Fertilizer Co. of New London, Ct., and sold by Olds & Whipple, Hartford, Ct.

568 567 565 561

POTASH SALT.

559 Sulphate of Potash, imported and sold by the Mape's Formula and Peruvian Guano Co., New York and Hartford.

572 Muriate of Potash, imported by The Bowker Fertilizer Co., Boston and New York.

570 Salt, manufactured by the Onondaga Salt Co., Syracuse, N. Y., sold by Bronson & Fitzgerald, Hartford.

562 Plaster, ground by G. A. London, Berlin, Ct., sold by Olds & Whipple, Hartford.

563 Castor Pomace, made by H. J. Baker & Bros., sold by Buckland & Hardin, Glastonbury, Ct.

569 566 564 563

TRADE VALUES FOR 1881.

For 1881 the following revised Trade Values will be employed for comparing Fertilizers. These values are with two exceptions the same as given in Bulletin 52 and in the Station Report for 1880. Here the prices of potash in Sulphate and Muriate are increased, the former one-half cent, the latter one cent per pound.

There has been some advance in the cost of ammonia salts and animal matters, and, as a consequence, the selling prices of these articles and of superphosphates, etc., are often higher than last year. The Station valuations should be regarded as approximate and while they cannot in every case fix the absolute money value of fertilizers, they may commonly be relied on for purposes of comparison.

S. W. JOHNSON, Director.
