CAES SEMINAR SERIES

“Update on Ethnomycology: Fungi and Human Beings”

Dr. DeWei Li

Valley Laboratory, CAES

Wednesday, February 28, 2018

12:00 noon to 1:00 p.m.

Food and coffee will be available at 11:45 a.m.

Jones Auditorium

**The Connecticut Agricultural Experiment Station
123 Huntington Street, New Haven, CT**

Human beings utilizing fungi have a long history and date back to several thousand years ago. Fungi have played a significant role in the evolution and daily life of human beings by providing fermented food and alcoholic drinks, etc. Some fungi are detrimental to human beings also. Archaeological studies are providing new evidence of the fungi that human beings started to use. This presentation will update recent developments in ethnomycology.
