Re: Juniper Lane Bridge and Atwoodville Road Bridge over the Mount Hope River,
Mansfield

David Kalafa

Dear Mr. Aylesworth,

Kip Kolesinskas

The Council on Environmental Quality (Council) received notices regarding the proposed bridge replacement projects for the Juniper Lane Bridge and the Atwoodville Road Bridge over the Mount Hope River in Mansfield.

Matthew Reiser

Denise Rodosevich

The Council notes that the Atwoodville Road Bridge is located within a Connecticut Department of Energy and Environmental Protection (DEEP) designated Natural Diversity Database (NDDB) buffer area, within DEEP's Mansfield Hollow Wildlife Management Area, and proximate to one of DEEP's active trout stocking sites. The Council notes that the Juniper Lane Bridge is also proximate to one of DEEP's active trout stocking sites. The Council recommends that 1) the bridge designers/construction company consult with DEEP's Fisheries Division and the Wildlife Division/NDDB for guidance to minimize and mitigate any potential adverse impacts on fisheries and wildlife resources, and state-listed species; and 2) the Mansfield Inland Wetlands Agency carefully review the proposed project, at the appropriate time, for consistency with the Town's Wetland Regulations.

Charles Vidich

William Warzecha

Paul Aresta
Executive Director

Thank you for your consideration of the Council's comments.

Sincerely,

Paul Aresta
Executive Director
