Subject: Health Insurance increase

Dear Vanessa,

I am a Connecticut resident who will be affected by the rate increases. In Connecticut we pay such high taxes and now this? What is going on in this world? How are we supposed to eat, pay our bills? How are we as residents of Connecticut supposed to pay for this increase? Financially this is NOT acceptable and no one in Connecticut or anywhere else should have to pay this increase. Maybe the CEO'S and other Executives should think about taking a pay cut. Politicians get health insurance for free maybe we should cut their insurance so they will have to pay and maybe they will see the hardship we as residents are going through. This increase makes the cost of insurance incredibly unaffordable. It seems that this increase will undo much the main goal of the Affordable Care Act, to get more people insured, as it will become nearly impossible for many to afford coverage at all.

Sincerely,

Alexandra Langston

Subject: Insurance Rate Increase

Dear Vanessa,

The proposed insurance rate increases may make it impossible for me to pay my rent! Roof over our heads or insurance? This is not a corner I should be backed into! I am a Connecticut resident who will be affected by the rate increases. Given the extraordinary amount of the increase, it places me in a very difficult situation financially. This increase makes the cost of insurance incredibly unaffordable, and I may have to choose which bill to pay monthly. It seems that this increase will undo much the main goal of the Affordable Care Act, to get more people insured, as it will become nearly impossible for many to afford coverage at all.

Dale Allen
