MUNICIPAL CONSULTATION FILING

for the

FAIRFIELD TO CONGRESS RAILROAD TRANSMISSION LINE 115-kV REBUILD PROJECT

Town of Fairfield and City of Bridgeport
Fairfield County, Connecticut

VOLUME 2: PROJECT MAPPING AND DRAWINGS

October 2022

Submitted to:

Chief Elected Officials of the Municipalities of Fairfield, Bridgeport, and Westport

Prepared By:

THE UNITED ILLUMINATING COMPANY

Provided in accordance with the pre-application process (Connecticut General Statutes Section 16-50l(e)) for filing an Application to the Connecticut Siting Council for a Certificate of Environmental Compatibility and Public Need for an Electric Transmission Facility.

This page intentionally left blank

Attachment V2.1

United States Geological Survey Topographic Map Symbols

BATHYMETRIC FEATURES

- Area exposed at mean low tide; sounding datum line***
- Channel***
- Sunken rock***

BOUNDARIES

- National
- State or territorial
- County or equivalent
- Civil township or equivalent
- Incorporated city or equivalent
- Federally administered park, reservation, or monument (external)
- Federally administered park, reservation, or monument (internal)
- State forest, park, reservation, or monument and large county park
- Forest Service administrative area*
- Forest Service ranger district*
- National Forest System land status, Forest Service lands*
- National Forest System land status, non-Forest Service lands*
- Small park (county or city)

BUILDINGS AND RELATED FEATURES

- Building
- School; house of worship
- Athletic field
- Built-up area
- Forest headquarters*
- Ranger district office*
- Guard station or work center*
- Racetrack or raceway
- Airport, paved landing strip, runway, taxiway, or apron
- Unpaved landing strip
- Well (other than water), windmill or wind generator
- Tanks
- Covered reservoir
- Gaging station
- Located or landmark object (feature as labeled)
- Boat ramp or boat access*
- Roadside park or rest area
- Picnic area
- Campground
- Winter recreation area*
- Cemetery

COASTAL FEATURES

- Foreshore flat
- Coral or rock reef
- Rock, bare or awash; dangerous to navigation
- Group of rocks, bare or awash
- Exposed wreck
- Depth curve; sounding
- Breakwater, pier, jetty, or wharf
- Seawall
- Oil or gas well; platform

CONTOURS

Topographic

- Index
- Approximate or indefinite
- Intermediate
- Approximate or indefinite
- Supplementary
- Depression
- Cut
- Fill
- Continental divide

Bathymetric

- Index***
- Intermediate***
- Index primary***
- Primary***
- Supplementary***

CONTROL DATA AND MONUMENTS

- Principal point**
- U.S. mineral or location monument
- River mileage marker

Boundary monument

- Third-order or better elevation, with tablet
- Third-order or better elevation, recoverable mark, no tablet
- With number and elevation

Horizontal control

- Third-order or better, permanent mark
- With third-order or better elevation
- With checked spot elevation
- Coincident with found section corner
- Unmonumented**

CONTROL DATA AND MONUMENTS – *continued*

Vertical control

- Third-order or better elevation, with tablet
- Third-order or better elevation, recoverable mark, no tablet
- Bench mark coincident with found section corner
- Spot elevation

GLACIERS AND PERMANENT SNOWFIELDS

- Contours and limits
- Formlines
- Glacial advance
- Glacial retreat

LAND SURVEYS

Public land survey system

- Range or Township line
  - Location approximate
  - Location doubtful
  - Protracted
  - Protracted (AK 1:63,360-scale)
- Range or Township labels
- Section line
  - Location approximate
  - Location doubtful
  - Protracted
  - Protracted (AK 1:63,360-scale)
- Section numbers
- Found section corner
- Found closing corner
- Witness corner
- Meander corner
- Weak corner*

Other land surveys

- Range or Township line
- Section line
- Land grant, mining claim, donation land claim, or tract
- Land grant, homestead, mineral, or other special survey monument
- Fence or field lines

MARINE SHORELINES

- Shoreline
- Apparent (edge of vegetation)***
- Indefinite or unsurveyed

MINES AND CAVES

- Quarry or open pit mine
- Gravel, sand, clay, or borrow pit
- Mine tunnel or cave entrance
- Mine shaft
- Prospect
- Tailings
- Mine dump
- Former disposal site or mine

PROJECTION AND GRIDS

- Neatline
- Graticule tick
- Graticule intersection
- Datum shift tick

State plane coordinate systems

- Primary zone tick
- Secondary zone tick
- Tertiary zone tick
- Quaternary zone tick
- Quintary zone tick

Universal transverse metcator grid

- UTM grid (full grid)
- UTM grid ticks*

RAILROADS AND RELATED FEATURES

- Standard gauge railroad, single track
- Standard gauge railroad, multiple track
- Narrow gauge railroad, single track
- Narrow gauge railroad, multiple track
- Railroad siding
- Railroad in highway
- Railroad in road
- Railroad in light duty road*
- Railroad underpass; overpass
- Railroad bridge; drawbridge
- Railroad tunnel
- Railroad yard
- Railroad turntable; roundhouse

RIVERS, LAKES, AND CANALS

- Perennial stream
- Perennial river
- Intermittent stream
- Intermittent river
- Disappearing stream
- Falls, small
- Falls, large
- Rapids, small
- Rapids, large
- Masonry dam
- Dam with lock
- Dam carrying road

RIVERS, LAKES, AND CANALS – *continued*

- Perennial lake/pond
- Intermittent lake/pond
- Dry lake/pond
- Narrow wash
- Wide wash
- Canal, flume, or aqueduct with lock
- Elevated aqueduct, flume, or conduit
- Aqueduct tunnel
- Water well, geyser, fumarole, or mud pot
- Spring or seep

ROADS AND RELATED FEATURES

Please note: Roads on Provisional-edition maps are not classified as primary, secondary, or light duty. These roads are all classified as improved roads and are symbolized the same as light duty roads.

- Primary highway
- Secondary highway
- Light duty road
- Light duty road, paved*
- Light duty road, gravel*
- Light duty road, dirt*
- Light duty road, unspecified*
- Unimproved road
- Unimproved road*
- 4WD road
- 4WD road*
- Trail
- Highway or road with median strip
- Highway or road under construction
- Highway or road underpass; overpass
- Highway or road bridge; drawbridge
- Highway or road tunnel
- Road block, berm, or barrier*
- Gate on road*
- Trailhead*

SUBMERGED AREAS AND BOGS

- Marsh or swamp
- Submerged marsh or swamp
- Wooded marsh or swamp
- Submerged wooded marsh or swamp
- Land subject to inundation

SURFACE FEATURES

- Levee
- Sand or mud
- Disturbed surface
- Gravel beach or glacial moraine
- Tailings pond

TRANSMISSION LINES AND PIPELINES

- Power transmission line; pole; tower
- Telephone line
- Aboveground pipeline
- Underground pipeline

VEGETATION

- Woodland
- Shrubland
- Orchard
- Vineyard
- Mangrove

* USGS-USDA Forest Service Single-Edition Quadrangle maps only.
In August 1993, the U.S. Geological Survey and the U.S. Department of Agriculture's Forest Service signed an Interagency Agreement to begin a single-edition joint mapping program. This agreement established the coordination for producing and maintaining single-edition primary series topographic maps for quadrangles containing National Forest System lands. The joint mapping program eliminates duplication of effort by the agencies and results in a more frequent revision cycle for quadrangles containing National Forests. Maps are revised on the basis of jointly developed standards and contain normal features mapped by the USGS, as well as additional features required for efficient management of National Forest System lands. Single-edition maps look slightly different but meet the content, accuracy, and quality criteria of other USGS products.

** Provisional-Edition maps only.
Provisional-edition maps were established to expedite completion of the remaining large-scale topographic quadrangles of the conterminous United States. They contain essentially the same level of information as the standard series maps. This series can be easily recognized by the title "Provisional Edition" in the lower right-hand corner.

*** Topographic Bathymetric maps only.

Topographic Map Information

For more information about topographic maps produced by the USGS, please call:

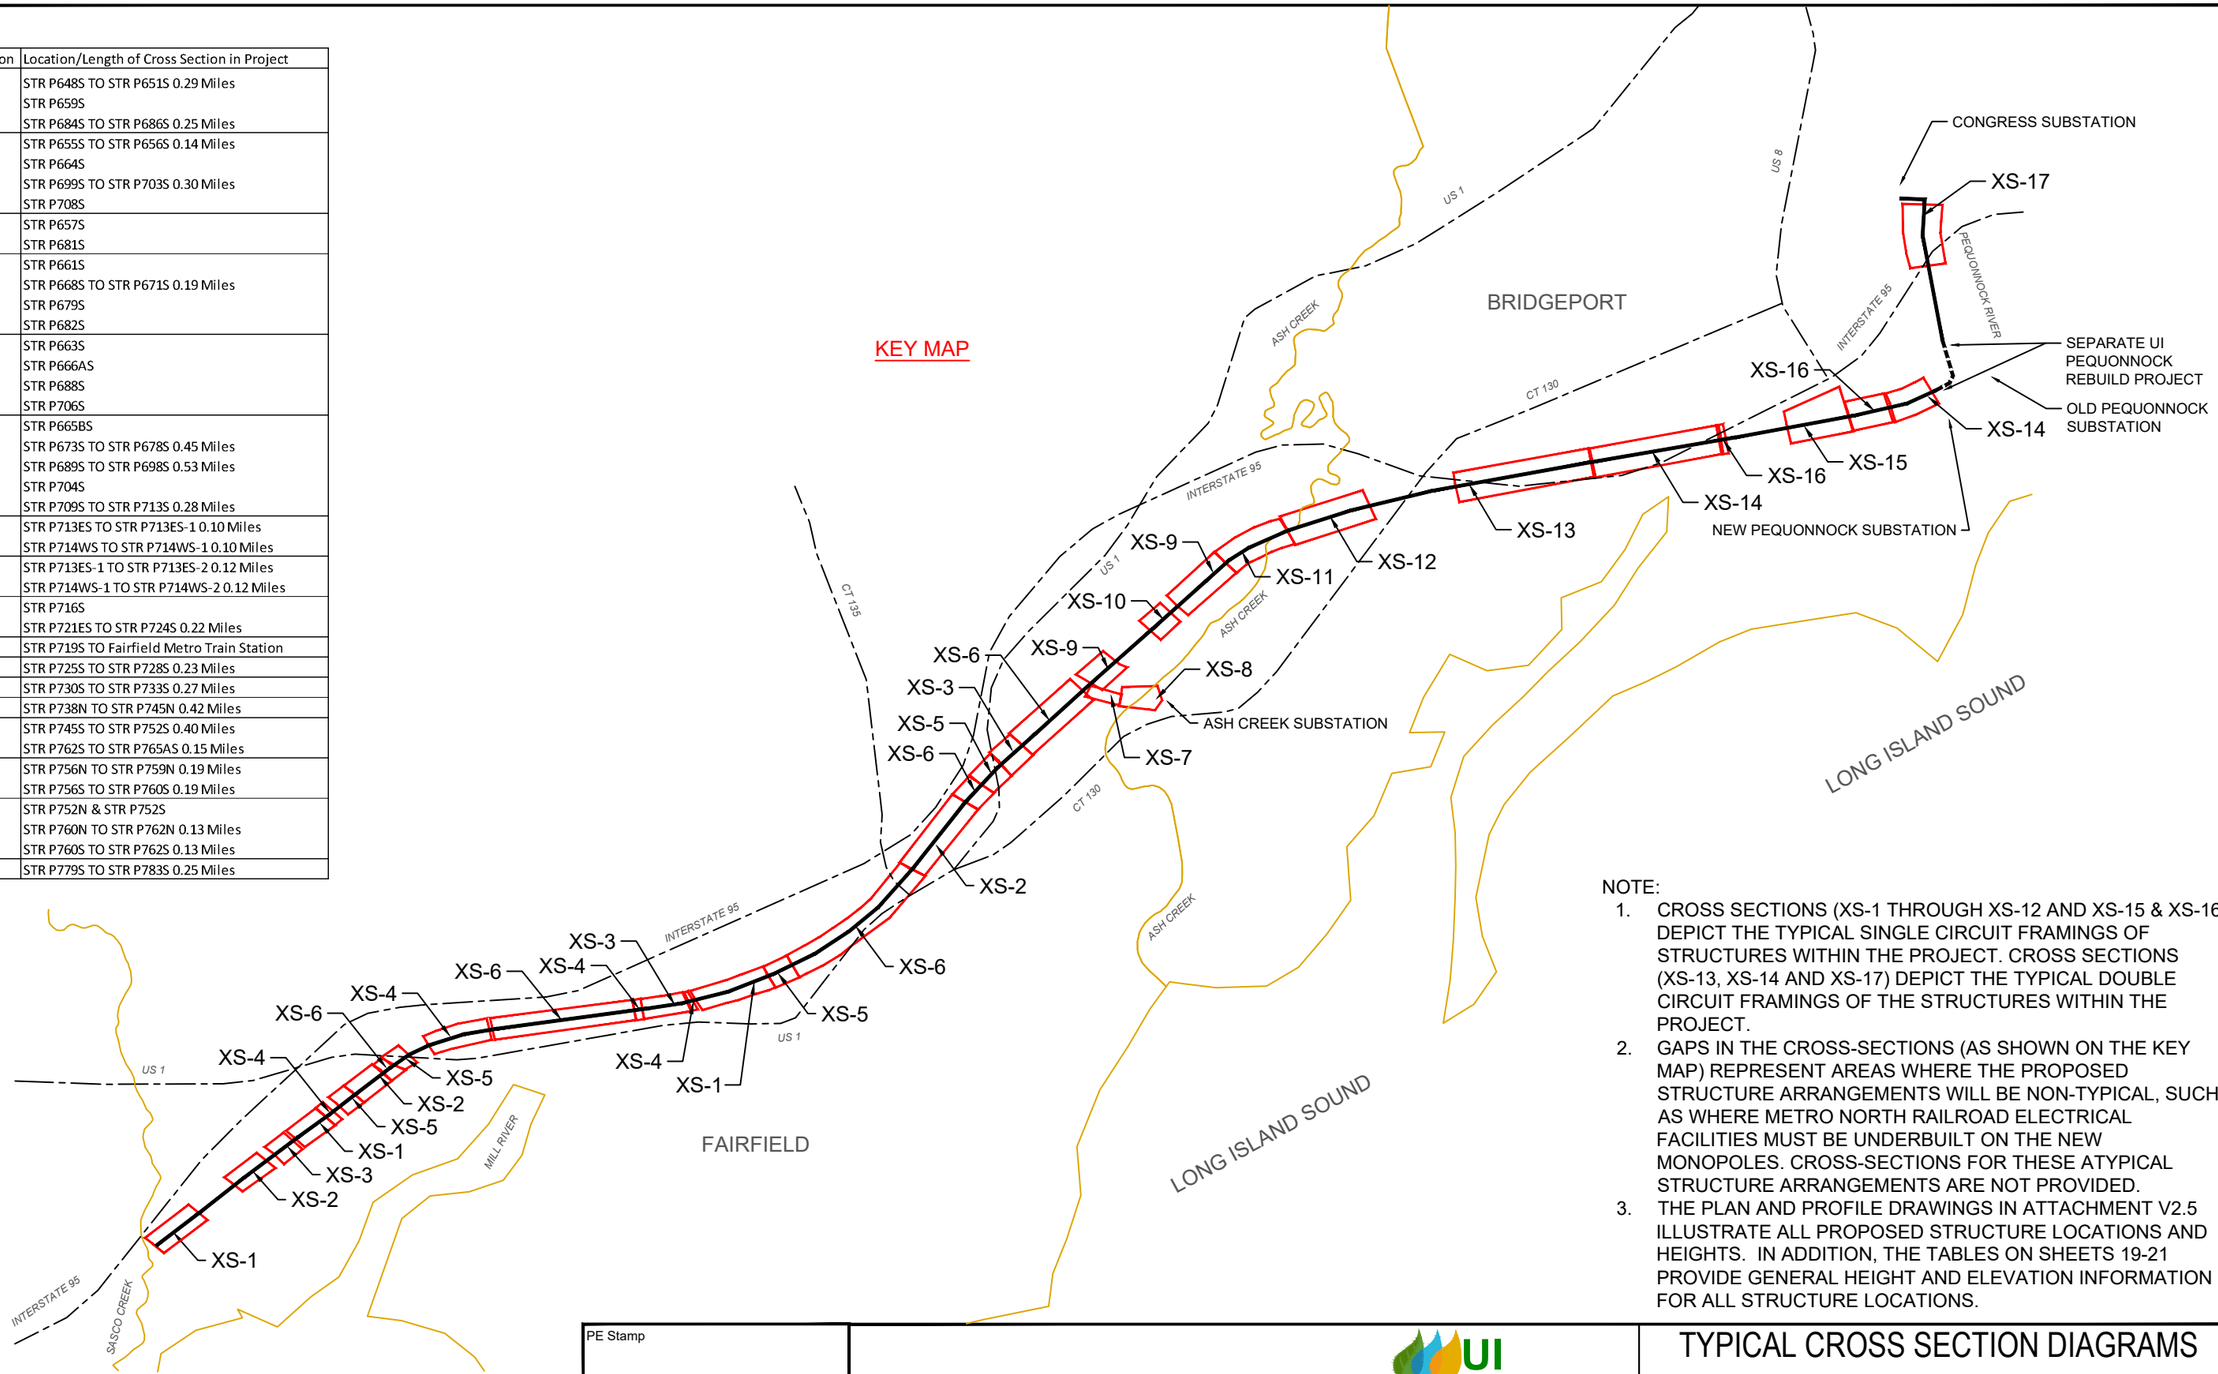
Cross Section 17	STR P779S TO STR P783S 0.25 Miles



NOTE:

1. CROSS SECTIONS (XS-1 THROUGH XS-12 AND XS-15 & XS-16) DEPICT THE TYPICAL SINGLE CIRCUIT FRAMINGS OF STRUCTURES WITHIN THE PROJECT. CROSS SECTIONS (XS-13, XS-14 AND XS-17) DEPICT THE TYPICAL DOUBLE CIRCUIT FRAMINGS OF THE STRUCTURES WITHIN THE PROJECT.
2. GAPS IN THE CROSS-SECTIONS (AS SHOWN ON THE KEY MAP) REPRESENT AREAS WHERE THE PROPOSED STRUCTURE ARRANGEMENTS WILL BE NON-TYPICAL, SUCH AS WHERE METRO NORTH RAILROAD ELECTRICAL FACILITIES MUST BE UNDERBUILT ON THE NEW MONOPOLES. CROSS-SECTIONS FOR THESE ATYPICAL STRUCTURE ARRANGEMENTS ARE NOT PROVIDED.
3. THE PLAN AND PROFILE DRAWINGS IN ATTACHMENT V2.5 ILLUSTRATE ALL PROPOSED STRUCTURE LOCATIONS AND HEIGHTS. IN ADDITION, THE TABLES ON SHEETS 19-21 PROVIDE GENERAL HEIGHT AND ELEVATION INFORMATION FOR ALL STRUCTURE LOCATIONS.

CADD Drawing, DO NOT REVISE MANUALLY.

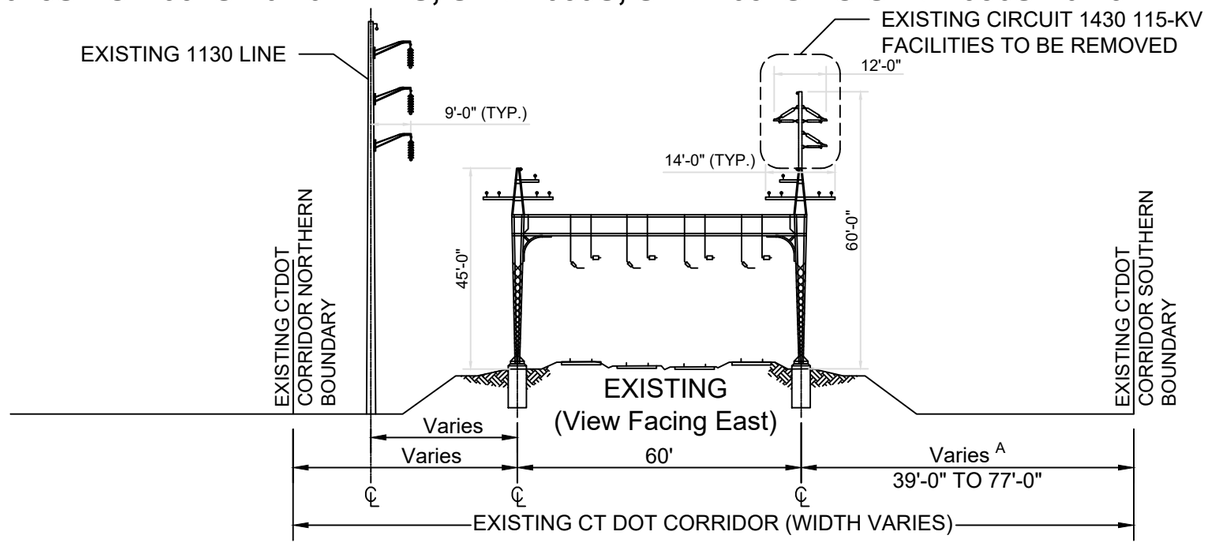
APP.	---	CROSS SECTION KEY MAP	0-0C
DATE:	09/10/2021		

CROSS SECTION 1

EAST OF SASCO CREEK (P648S) TO ASH CREEK SUBSTATION (FAIRFIELD)
STR P648S TO P651S - 0.29 MILES, STR P659S, STR P684S TO STR P686S - 0.25 MILES

NOTES:

1. DEPICTED STRUCTURES ARE STEEL TANGENT STRUCTURES. THE VERTICAL ARRANGEMENT MINIMIZES CONDUCTOR BLOWOUT AND THUS, THE AMOUNT OF NEW PERMANENT UI EASEMENT REQUIRED.
2. THE EXISTING CATENARY STRUCTURES SUPPORT METRO NORTH RAILROAD ELECTRICAL FACILITIES CONSISTING UP TO TWO (2) SIGNAL WIRES, 2 OR 3 FEEDER WIRES, AND ONE (1) AERIAL GROUND WIRE.
3. EXISTING CIRCUIT 1130 STEEL POLE STRUCTURES MAY SUPPORT METRO NORTH RAILROAD ELECTRICAL FACILITIES CONSISTING UP TO TWO (2) SIGNAL WIRES AND 2 OR 3 FEEDER WIRES, AND ONE (1) AERIAL GROUND WIRE.
4. THE CT DOT CORRIDOR CONTAINS FOUR (4) RAILROAD TRACKS IN THIS AREA OPERATED BY METRO NORTH RAILROAD.
5. A 15'-0" CLEARANCE MUST BE MAINTAINED BETWEEN THE NEW 115-KV CONDUCTORS AND THE EXISTING CATENARY STRUCTURES SO THAT METRO NORTH RAILROAD CAN MAINTAIN THEIR EQUIPMENT WITHOUT REQUIRING AN OUTAGE ON THE 115-KV FACILITIES.
6. EXISTING VEGETATION WITHIN THE CT DOT CORRIDOR VARIES BY LOCATION. REFER TO ATTACHMENTS V2.3 AND V2.4: PROJECT MAPS AND DRAWINGS, FOR LOCATIONS OF PROPOSED TREE REMOVAL.
7. TO COMPLY WITH UI STANDARD TRANSMISSION VEGETATION MANAGEMENT PLANS, UI REQUIRES VEGETATION MANAGEMENT IN THE AREA THAT IS 18'-0" FROM EACH STRUCTURE CENTER (25'-0" FROM CONDUCTOR ATTACHMENT POINT). IN LOCATIONS WHERE THE CT DOT CORRIDOR BOUNDARY IS GREATER THAN 18'-0" FROM THE PROPOSED STRUCTURE LOCATION, UI WILL NOT NEED ANY PERMANENT EASEMENT FROM ADJACENT LANDOWNERS TO ACHIEVE THESE CLEARANCES.
8. NO PROJECT ACTIVITIES WILL OCCUR ON THE EXISTING 1130 LINE WHICH IS LOCATED ON INDEPENDENT MONOPOLES ON THE NORTH SIDE OF THE METRO NOTH RAILROAD TRACKS.



[A] THE WIDTH OF THE EXISTING CT DOT CORRIDOR IN THE PROJECT AREA IS HIGHLY VARIABLE. REFER TO ATTACHMENTS V2.3 AND V2.4: PROJECT MAPS AND DRAWINGS, FOR CT DOT CORRIDOR BOUNDARIES.

[B] THIS DISTANCE AVERAGES 14'-6" BUT CAN RANGE FROM 4'-0" TO 21'-6". REFER TO THE TABLE ON SHEET 19 FOR EXACT DISTANCES.

[C] THE DISTANCE BETWEEN THE PROPOSED 115-KV SINGLE-CIRCUIT STRUCTURES AND THE EXISTING CT DOT CORRIDOR SOUTHERN BOUNDARY VARIES. REFER TO THE TABLE ON SHEET 19 FOR EXACT DISTANCES.

[D] THE HEIGHTS OF THE NEW 115-KV SINGLE-CIRCUIT STRUCTURES VARY. REFER TO THE TABLE ON SHEET 19 FOR EXACT STRUCTURE HEIGHTS.

CK.	MSP	NO.	REV.
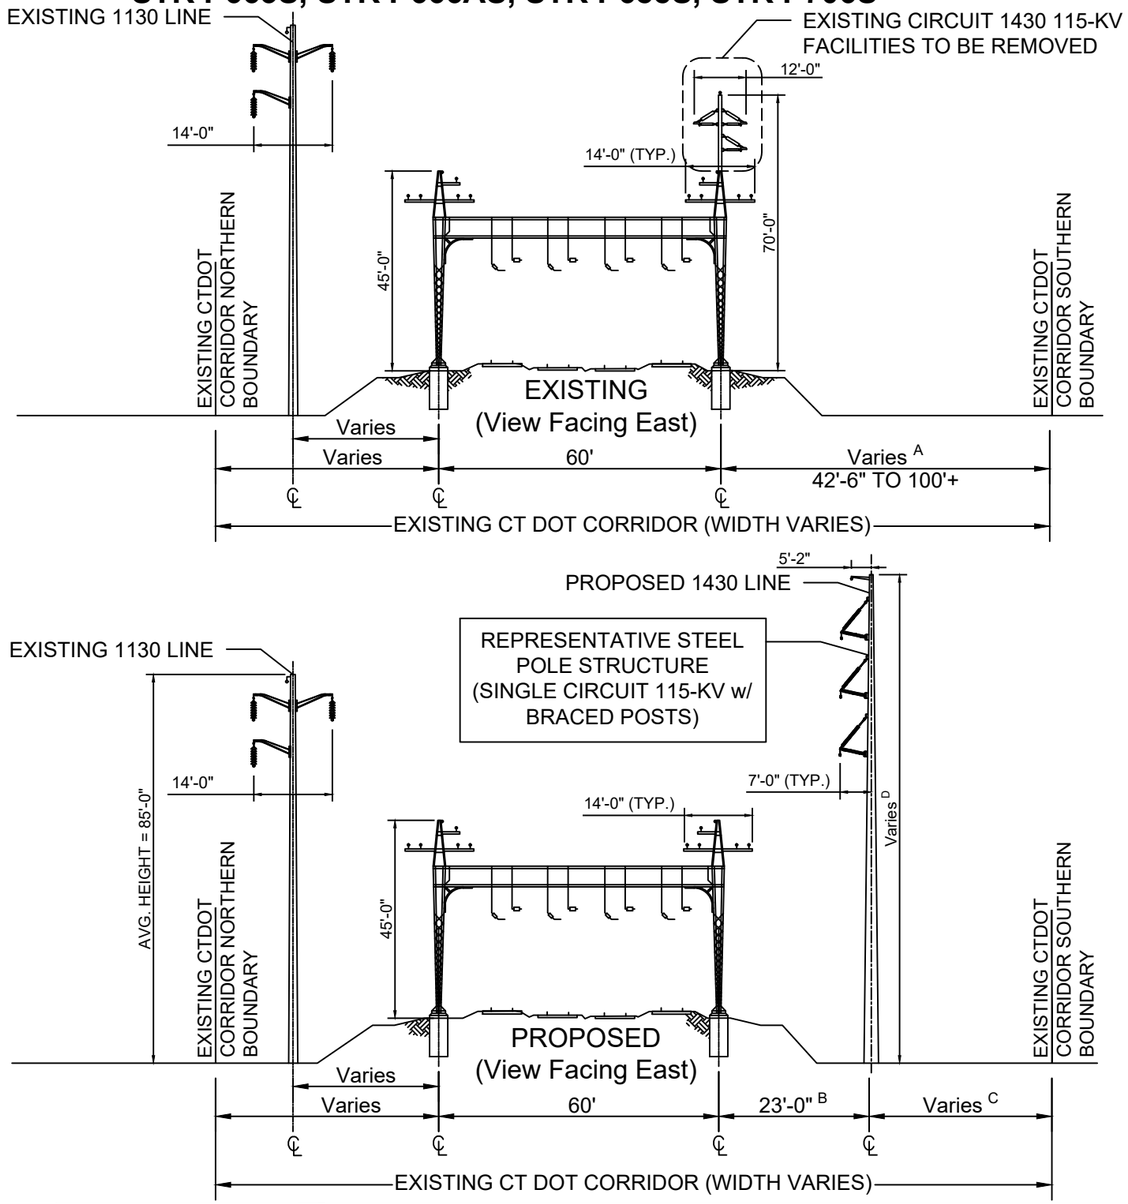
APP.	---	XS-4	0-0C
DATE:	4/15/2022		

CROSS SECTION 5
EAST OF SASCO CREEK (P648S) TO ASH CREEK SUBSTATION (FAIRFIELD)
STR P663S, STR P666AS, STR P688S, STR P706S

NOTES:

1. DEPICTED STRUCTURES ARE STEEL TANGENT STRUCTURES. THE VERTICAL ARRANGEMENT MINIMIZES CONDUCTOR BLOWOUT AND THUS, THE AMOUNT OF NEW PERMANENT UI EASEMENT REQUIRED.
2.
3. THE EXISTING CATENARY STRUCTURES SUPPORT METRO NORTH RAILROAD ELECTRICAL FACILITIES CONSISTING UP TO TWO (2) SIGNAL WIRES, 2 OR 3 FEEDER WIRES, AND ONE (1) AERIAL GROUND WIRE.
4. EXISTING CIRCUIT 1130 STEEL POLE STRUCTURES MAY SUPPORT METRO NORTH RAILROAD ELECTRICAL FACILITIES CONSISTING UP TO TWO (2) SIGNAL WIRES AND 2 OR 3 FEEDER WIRES, AND ONE (1) AERIAL GROUND WIRE.
5. THE CT DOT CORRIDOR CONTAINS FOUR (4) RAILROAD TRACKS IN THIS AREA OPERATED BY METRO NORTH RAILROAD.
6. A 15'-0" CLEARANCE MUST BE MAINTAINED BETWEEN THE NEW 115-KV CONDUCTORS AND THE EXISTING CATENARY STRUCTURES SO THAT METRO NORTH RAILROAD CAN MAINTAIN THEIR EQUIPMENT WITHOUT REQUIRING AN OUTAGE ON THE 115-KV FACILITIES.
7. EXISTING VEGETATION WITHIN THE CT DOT CORRIDOR VARIES BY LOCATION. REFER TO ATTACHMENTS V2.3 AND V2.4: PROJECT MAPS AND DRAWINGS, FOR LOCATIONS OF PROPOSED TREE REMOVAL.
8. TO COMPLY WITH UI STANDARD TRANSMISSION VEGETATION MANAGEMENT PLANS, UI REQUIRES VEGETATION MANAGEMENT IN THE AREA THAT IS 18'-0" FROM EACH STRUCTURE CENTER (25'-0" FROM CONDUCTOR ATTACHMENT POINT). IN LOCATIONS WHERE THE CT DOT CORRIDOR BOUNDARY IS GREATER THAN 18'-0" FROM THE PROPOSED STRUCTURE LOCATION, UI WILL NOT NEED ANY PERMANENT EASEMENT FROM ADJACENT LANDOWNERS TO ACHIEVE THESE CLEARANCES.
9. NO PROJECT ACTIVITIES WILL OCCUR ON THE EXISTING 1130 LINE WHICH IS LOCATED ON INDEPENDENT MONOPOLES ON THE NORTH SIDE OF THE METRO NOTH RAILROAD TRACKS.



[A] THE WIDTH OF THE EXISTING CT DOT CORRIDOR IN THE PROJECT AREA IS HIGHLY VARIABLE. REFER TO ATTACHMENTS V2.3 AND V2.4: PROJECT MAPS AND DRAWINGS, FOR CT DOT CORRIDOR BOUNDARIES.

[B] THIS DISTANCE AVERAGES 23'-0" BUT CAN RANGE FROM 13'-0" TO 50'-0". REFER TO THE TABLE ON SHEET 19 FOR EXACT DISTANCES.

[C] THE DISTANCE BETWEEN THE PROPOSED 115-KV SINGLE-CIRCUIT STRUCTURES AND THE EXISTING CT DOT CORRIDOR SOUTHERN BOUNDARY VARIES. REFER TO THE TABLE ON SHEET 19 FOR EXACT DISTANCES.

[D] THE HEIGHTS OF THE NEW 115-KV SINGLE-CIRCUIT STRUCTURES VARY. REFER TO THE TABLE ON SHEET 19 FOR EXACT STRUCTURE HEIGHTS.

STR P756N TO STR P759N & STR P756S TO STR P760S - 0.19 MILES

NOTES:

1. DEPICTED STRUCTURES ARE STEEL TANGENT STRUCTURES. THE VERTICAL ARRANGEMENT MINIMIZES CONDUCTOR BLOWOUT AND THUS, THE AMOUNT OF NEW PERMANENT UI EASEMENT REQUIRED.

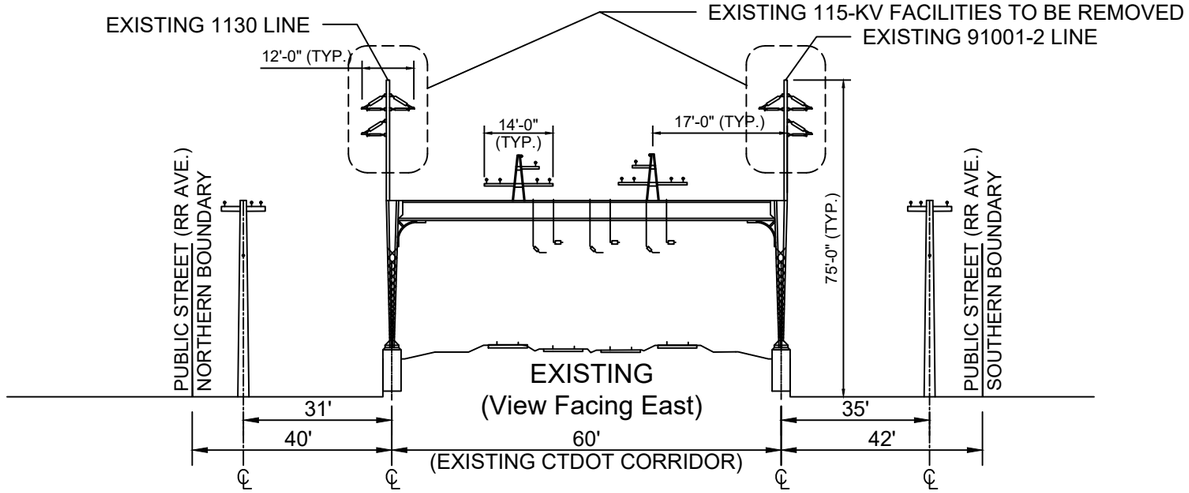
2. THE EXISTING CATENARY STRUCTURES SUPPORT METRO NORTH RAILROAD ELECTRICAL FACILITIES CONSISTING OF TWO (2) SIGNAL WIRES, 2 OR 3 FEEDER WIRES, AND ONE (1) AERIAL GROUND WIRE, INSET 17' FROM BOTH THE NORTHERN AND SOUTHERN CATENARY SUPPORT COLUMNS.

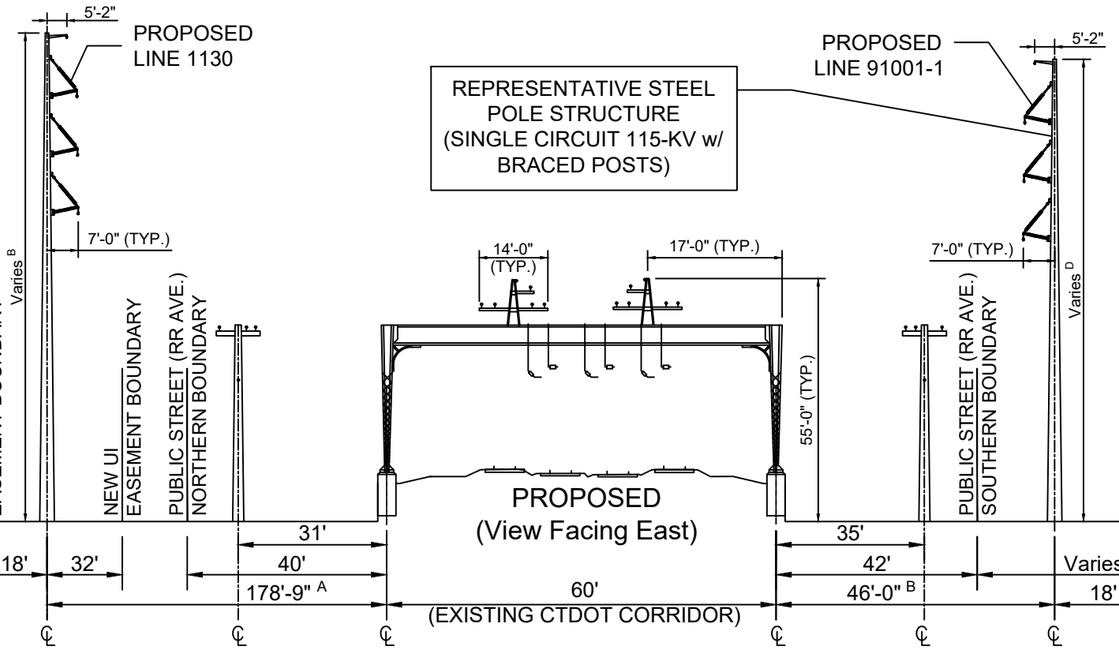
3. THE CT DOT CORRIDOR CONTAINS FOUR (4) ELEVATED RAILROAD TRACKS IN THIS AREA OPERATED BY METRO NORTH RAILROAD, AND IS BOUNDED ON BOTH SIDES BY A PUBLIC STREET (RAILROAD AVENUE).

4. TO MAINTAIN A.D.A. COMPLIANCE IN CITY SIDEWALKS, IT WAS DEEMED NECESSARY TO PLACE HE PROPOSED MONOPOLES ON PRIVATE PROPERTY, NORTH OR SOUTH OF THE SIDEWALK AND EXISTING UI DISTRIBUTION LINE. DUE TO THE AMOUNT OF RESIDENTIAL PROPERTIES ADJACENT TO THE NORTH SIDE OF RAILROAD AVENUE IN THIS AREA, IT WAS DEEMED PREFERENTIAL TO LIMIT IMPACTS TO THESE PROPERTIES AND ROUTE THE LINE FURTHER AWAY FROM RAILROAD AVENUE AND CLOSER TO I-95.

5. UI DISTRIBUTION LINES EXIST WITHIN PUBLIC SPACE, BOTH NORTH AND SOUTH OF RAILROAD AVENUE. THESE DISTRIBUTION LINES WILL REMAIN UNCHANGED FROM EXISTING CONDITIONS.

6. TO COMPLY WITH UI STANDARD TRANSMISSION VEGETATION MANAGEMENT PLANS, UI REQUIRES VEGETATION MANAGEMENT IN THE AREA THAT IS 25'-0" FROM CONDUCTOR ATTACHMENT POINTS. IN LOCATIONS WHERE THE SURROUNDING ENVIRONMENT REQUIRES A PROPOSED STRUCTURE TO BE PLACED OUTSIDE OF THE CT DOT CORRIDOR, UI PROPOSES TO ACQUIRE A PERMANENT EASEMENT FROM ADJACENT LANDOWNERS TO ACHIEVE THESE CLEARANCES.





[A] THIS DISTANCE AVERAGES 178'-9" BUT CAN RANGE FROM 57'-0" TO 317'-0". REFER TO THE TABLE ON SHEET 21 FOR EXACT DISTANCES.

[B] THIS DISTANCE AVERAGES 46'-0" BUT CAN RANGE FROM 45'-0" TO 48'-0". REFER TO THE TABLE ON SHEET 21 FOR EXACT DISTANCES.

[C] THE WIDTH OF UI'S REQUIRED NEW PERMANENT EASEMENT VARIES. REFER TO THE TABLE ON SHEET 21 FOR EXACT DISTANCES.

[D] THE HEIGHTS OF THE NEW 115-KV SINGLE-CIRCUIT STRUCTURES VARY. REFER TO THE TABLE ON SHEET 21 FOR EXACT STRUCTURE HEIGHTS.

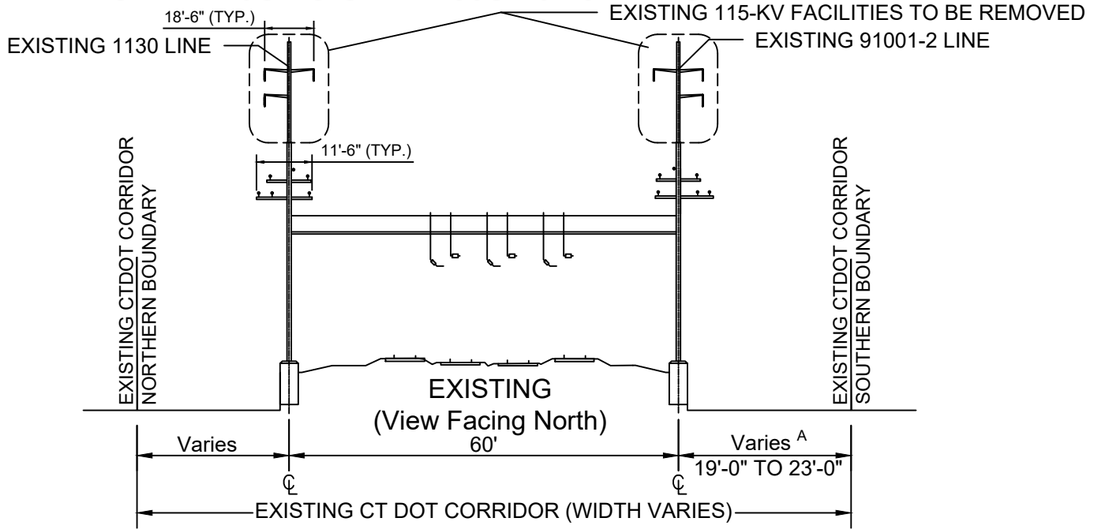
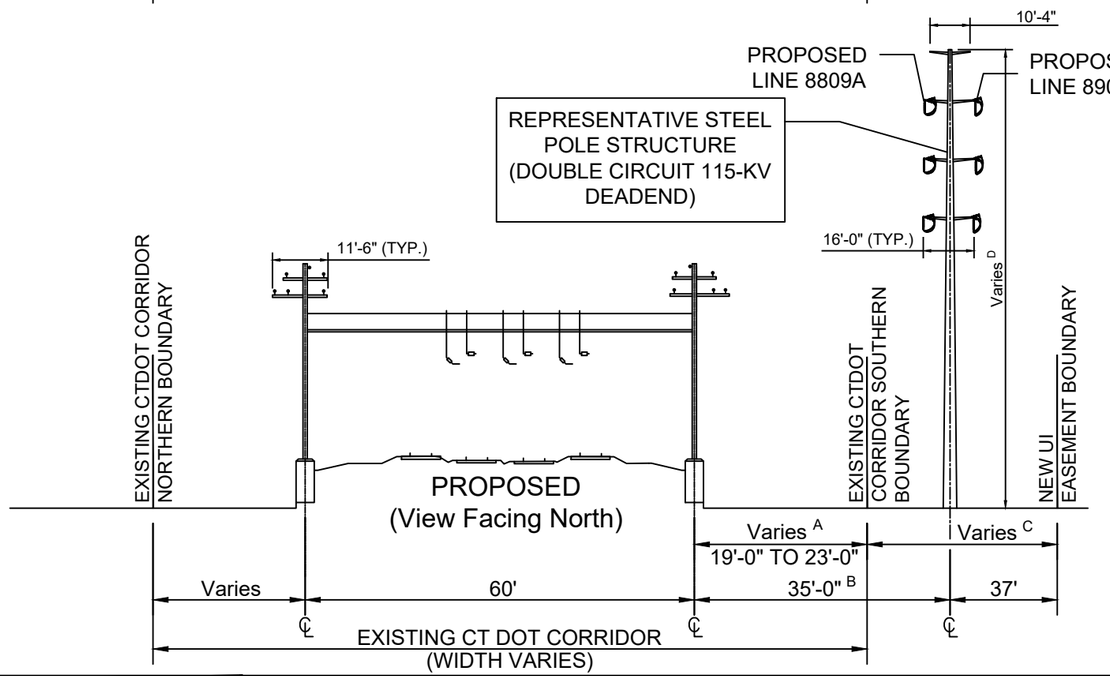
CROSS SECTION 17
PEQUONNOCK SUBSTATION TO CONGRESS STREET SUBSTATION (BRIDGEPORT)
STR P779S TO STR P783S - 0.25 MILES





NOTES:

1. THE EXISTING CATENARY STRUCTURES SUPPORT METRO NORTH RAILROAD ELECTRICAL FACILITIES CONSISTING OF TWO (2) SIGNAL WIRES, 2 OR 3 FEEDER WIRES, AND ONE (1) AERIAL GROUND WIRE, BOTH ON THE NORTHERN AND SOUTHERN CATENARY SUPPORT COLUMNS.

2. THE CT DOT CORRIDOR CONTAINS FOUR (4) RAILROAD TRACKS IN THIS AREA OPERATED BY METRO NORTH RAILROAD.

3. A 15'-0" CLEARANCE MUST BE MAINTAINED BETWEEN THE NEW 115-KV CONDUCTORS AND THE EXISTING CATENARY STRUCTURES SO THAT METRO NORTH RAILROAD CAN MAINTAIN THEIR EQUIPMENT WITHOUT REQUIRING AN OUTAGE ON THE 115-KV FACILITIES.

4. TO COMPLY WITH UI STANDARD TRANSMISSION VEGETATION MANAGEMENT PLANS, UI REQUIRES VEGETATION MANAGEMENT IN THE AREA THAT IS 37'-0" FROM EACH STRUCTURE CENTER (29'-0" FROM CONDUCTOR ATTACHMENT POINT). IN LOCATIONS WHERE THE SURROUNDING ENVIRONMENT REQUIRES A PROPOSED STRUCTURE TO BE PLACED OUTSIDE OF THE CT DOT CORRIDOR, UI PROPOSES TO ACQUIRE A PERMANENT EASEMENT FROM ADJACENT LANDOWNERS TO ACHIEVE THESE CLEARANCES.

5. DISTANCE FROM NORTHERN CATENARY STRUCTURE TO CT DOT CORRIDOR NORTHERN BOUNDARY WILL REMAIN UNCHANGED FROM EXISTING CONDITIONS.

[A] THE WIDTH OF THE EXISTING CT DOT CORRIDOR IN THE PROJECT AREA IS HIGHLY VARIABLE. REFER TO ATTACHMENTS V2.3 AND V2.4: PROJECT MAPS AND DRAWINGS, FOR CT DOT CORRIDOR BOUNDARIES.

[B] THIS DISTANCE AVERAGES 35'-0" BUT CAN RANGE FROM 30'-0" TO 40'-0". REFER TO THE TABLE ON SHEET 21 FOR EXACT DISTANCES.

[C] THE WIDTH OF UI'S REQUIRED PERMANENT EASEMENT VARIES. REFER TO THE TABLE ON SHEET 21 FOR EXACT DISTANCES.

[D] THE HEIGHTS OF THE NEW 115-KV DOUBLE-CIRCUIT STRUCTURES VARIES. REFER TO THE TABLE ON SHEET 21 FOR EXACT STRUCTURE HEIGHTS.

FAIRFIELD-CONGRESS RAILROAD TRANSMISSION LINE 115-kV REBUILD PROJECT

1” = 400’ SCALE MAPSHEET INDEX
FARIFIELD TO CONGRESS RAILROAD TRANSMISSION LINE 115-KV REBUILD PROJECT

Mapsheet	Town / City	Proposed Structures	Proposed Removals and Modifications to Existing Structures [1, 2, 3, 4]
400 Scale Key Sheet	Fairfield, Bridgeport	N/A – Overview / Key Sheet	N/A – Overview / Key Sheet
1 of 7	Fairfield	Transmission Line Structures P648S through P661S; Re-establish Circuit 1430 connection on P648S	Remove Existing Bonnets and 115-kV Components on Catenary Structures 648S, 648AS, 648BS, 649S, 649AS, 649BS, 650S, 651S, 651AS, 651BS, 652S, 652AS, 652BS, 653S, 654S, 654AS, 654BS, 655S, 655AS 655BS, 656S, 656AS, 656BS 657S, 658S, through 661S; Remove Circuit 1430 connection on 648S
2 of 7	Fairfield	Transmission Line Structures P661S through P681S	Remove Existing Bonnets and 115-kV Components on Catenary Structures 661S through 665S, 665AS, 665BS, 667S through 680S, 680AS, 681S, 682S; Reconductor Existing Transmission Structures TP667ES and TP668S with 115-kV Transmission Line and Components
3 of 7	Fairfield	Transmission Line Structures P681S through P703S	Remove Existing Bonnets and 115-kV Components on Catenary Structures 682S through 687S, 687AS, 688S through 697S, 697AS, 698S through 703S;
4 of 7	Fairfield	Transmission Line Structures P703S through P723S; Ash Creek Substation Interconnection Replacement	Remove Existing Bonnets and 115-kV Components on Catenary Structures 703S, 703AS, 704S through 706S, 706AS, 707S through 710S, 710AS, 711S, 711AS, 712S through 720S, 720AS, 721S, 721AS, 722S, 723S; Remove 115-kV Components and Lattice Towers AC1, AC2 and AC3 leading to the Ash Creek Substation; Reconductor Existing Transmission Structures TP717S and TP718S with 115-kV Transmission Line and Components
5 of 7	Fairfield, Bridgeport	Transmission Line Structures P723S through P737S, P736NN through P742N	Remove Existing Bonnets and 115-kV Components on Catenary Structures 723S through 733S, 736S, 736AS, 737N/737S, 738N, 738AS, 738BN, 739N/739S through 742N/742S; Remove 115-kV Components and Top Portion of Pole 736N; Reconductor Existing Transmission Structure TP734S, TP735S and TP735N with 115-kV Transmission Line and Components
6 of 7	Bridgeport	Transmission Line Structures P742N through P760N/P760S; OPGW Installation on Existing Transmission Structures R1 through R5 to Resco Substation	Remove Existing Bonnets and 115-kV Components on Catenary Structures 742N/742S through 752N/752S, 753N, 756S, 757N/757S through 760N/760S; Install Remove Shield Wire Existing Transmission Structure R1 through R5 to Resco Substation, TP753S, TP754N, TP755S, and TP756N with 115-kV Transmission Line and Components
7 of 7	Bridgeport	Transmission Line Structures P760N/P760S through P783N; Temporary Transmission Line Structure TMP774N: Congress Substation Interconnection Replacement	Remove Existing Bonnets and 115-kV Components on Catenary Structures 760N/760S through 765N/765S, 765AN/765AS, 765BN/765BS, 777N/777S, 777AN/777AS, 778N/778S, 778AN/778AS, 779N/779S, 779AN/779AS, 780N/708S through 783N/783S; Remove 115-kV Components and Poles 775N, 775AS; Remove 115-kV Components and Lattice Tower North Tower above the MNR railroad tracks; Removals are subject to change based on coordination with the New Pequonnock Substation Project (Separate UI Project, refer to CSC Docket No. 283) Reconductor Existing Transmission Structures TP784N at Congress Substation with 115-kV Transmission Line and Components

Historic places in the following text will be abbreviated as such: National Register of Historic Places - NRHP, State Register of Historic Places - SRHP, Local Historic District - LHD. See Phase 1A Report in Appendix D of the MCF Filing for details on Cultural Resources.

[1] Typically, removal of the existing bonnets, hardware, conductors, and shield wire will be completed where proposed work indicates “Remove Existing Bonnets and Existing 115-kV Components”. Existing bonnets on catenary structures will remain in place where proposed work is specified as “Remove 115-kV Components”. Typically, shield wire for MNR facilities will be re-established on existing catenary structures to maintain shield wire protection and clearances to MNR signal wires. Refer to Volume 2, Attachment V2.5, Plan and Profile Drawings, for installation requirements and details.

[2] Wetlands and watercourses shown on the aerial-based mapping were field delineated within the Project area, including the CT DOT corridor and adjacent areas. These resources may extend further beyond the proposed Project limits. Publicly available Geographic Information System (GIS) datasets were utilized to depict resources outside of the proposed Project area as shown in Attachments V2.3 and V2.4.

[3] The initial structure spotting (original engineering design basis) commenced with the assumption that new double and/or single-circuit monopoles would be offset from each existing catenary structure. The poles were assigned numbers (e.g., P692S) that corresponded to the nearest catenary structure. As work on the Project design proceeded, proposed poles were shifted or eliminated to account for site-specific constraints (e.g., longer than originally planned span lengths to avoid or minimize poles in sidewalks). As a result, 31 of the originally planned monopoles have been eliminated. Because the poles were not re-numbered after these design changes, there are certain gaps in the structure numbers identified on the Volume 2 maps. The numbers of the structures that were eliminated from the Project design are: 653, 658, 660, 662, 670, 672, 674, 680, 683, 687, 694, 697, 702, 705, 707, 716, 722, 729, – all in Fairfield; and 731, 732, 741, 747, 761, 763, 764, 776, 777, 778, 780, 781, 782 – all in Bridgeport.

[4] “Reconductor with 115-kV Transmission Line and Components” typically means removal of existing 115-kV conductor cables, insulators, and hardware from an existing structure and replacement with new 115-kV conductors, insulators, and hardware installed on the existing structure in accordance with project requirements.

MAPSHEET 1 of 7 – Fairfield to Congress Railroad Transmission Line 115-kV Rebuild Project
Proposed Route, CT DOT Railroad Corridor – east of Sasco Creek to CT DOT Railroad Corridor - west of Old Post Rd
Town of Fairfield, Fairfield County, CT

AREA DESCRIPTION

Existing Land Use

- Residential
- Commercial
- Industrial/Business
- Recreational / Open Space
  - Southport Beach, 1505 Pequot Ave, Southport
  - Sasco Creek Beach, 138 Beachside Ave, Westport
  - Sasqua Wildflower Preserve – Aspetuck Land Trust, 297 Westway Rd, Southport
  - H. Smith Richardson Wildlife Preserve, 39 Sasco Creek Rd, Westport
  - Kings Highway West Open Space- Sasco Creek Marsh, 999 Kings Highway W, Southport
  - Perry's Green, 703 Harbor Rd, Southport
  - Southgate Lane Open Space, 139 S Gate Lane, Southport
  - Westway Road Open Space - Sasco Creek Marsh, 593 Westway Rd, Southport

Zoning[1]

- Town of Fairfield
  - Residence R-3 District (R-3)
  - Residence A District (A)
  - Residence B District (B)
  - Designed Residence District (DRD)
  - Neighborhood Designed Business District (NDD)
  - Designed Commercial District (DCD)
  - Residence C District (C)
  - Designed Industrial District (DI)

Natural Systems

- State/Federal Jurisdictional Wetlands and Watercourses
- FEMA 100-Year and 500-Year Flood Zones
- CT DEEP Inland Wetland Soils
- CT DEEP Tidal Wetland Soils
- CT NDDB Area
- CT DEEP Coastal Management Area
- Sasco Creek

Visual Character

- CT DOT Railroad Corridor (Metro North Railroad)
- Urban-suburban environments with lawns and landscaping, low profile commercial buildings, and parking areas.
- Tidal floodplain, deciduous woodlands, and waterway environments

Community Facilities

- Southport Train Station, 96 Station Street & 400 Center Street, Southport
- Wakeman Boys & Girls Club Summer Camp, 385 Center St, Southport
- Southport Cong Preschool-Toddler Program, 524 Pequot Ave, Southport
- Trinity Parish Nursery School, 651 Pequot Ave, Southport
- The Southport School, 214 Main St, Southport

Historic and Cultural Resources

- Southport Railroad Stations (North and South), 96 Station Street and 400 Center Street, Southport - NRHP
- Southport Historic District, Southport – NRHD/SRHD/LHD

CT DOT PROPERTY: RAILROAD CORRIDOR DESCRIPTION AND PROPOSED UI FACILITIES

CT DOT Property

- Total Corridor Width: Varies, 86 - 304 feet
- Number of Railroad Tracks (Metro North Railroad) = 4
- Distance from center of existing southern catenary structure to southern CT DOT Corridor boundary = Varies, 4 – 40 feet
- Southport Train Station

UI 115-kV Transmission Lines and Proposed Project Activities

- 1430 line on south side of CT DOT Corridor: Remove Existing Bonnets and 115-kV Components on Catenary Structures 648S, 648AS, 648BS, 649S, 649AS, 649BS, 650S, 651S, 651AS, 651BS, 652S, 652AS, 652BS, 653S, 654S, 654AS, 654BS, 655S, 655AS 655BS, 656S, 656AS, 657S, 658S, through 661S
- 1430 line on south side of CT DOT Corridor: Rebuild 115-kV Transmission Line on single circuit monopoles
  - Construct Transmission Line Structures P648S through P661S
- 1130 Line along north side of CT DOT Corridor to remain

Proposed UI Easement Boundary Outside of CT DOT Corridor Boundary

- North Side: 0 feet
- South Side: 0 feet, except for: P654S to P659S - 15 to 42 feet, and P661S – 14 feet

Wetlands, Watercourses and Waterbodies

- Tidal Watercourse Sasco Creek – E1UBL
- Tidal Wetland TW-A – E2EMP5d
- Wetland W-B – PEM
- Watercourse WC-2 – R5UBh1

Railroad Corridor Vegetation

- None on CT DOT railroad corridor within existing catenary structures and rail clear zones (managed and maintained by CT DOT).
- Stands of mixed deciduous/evergreen trees and shrubs within CT DOT corridor boundary outside of CT DOT maintained limits.
- Wetland/watercourse cover types noted above.

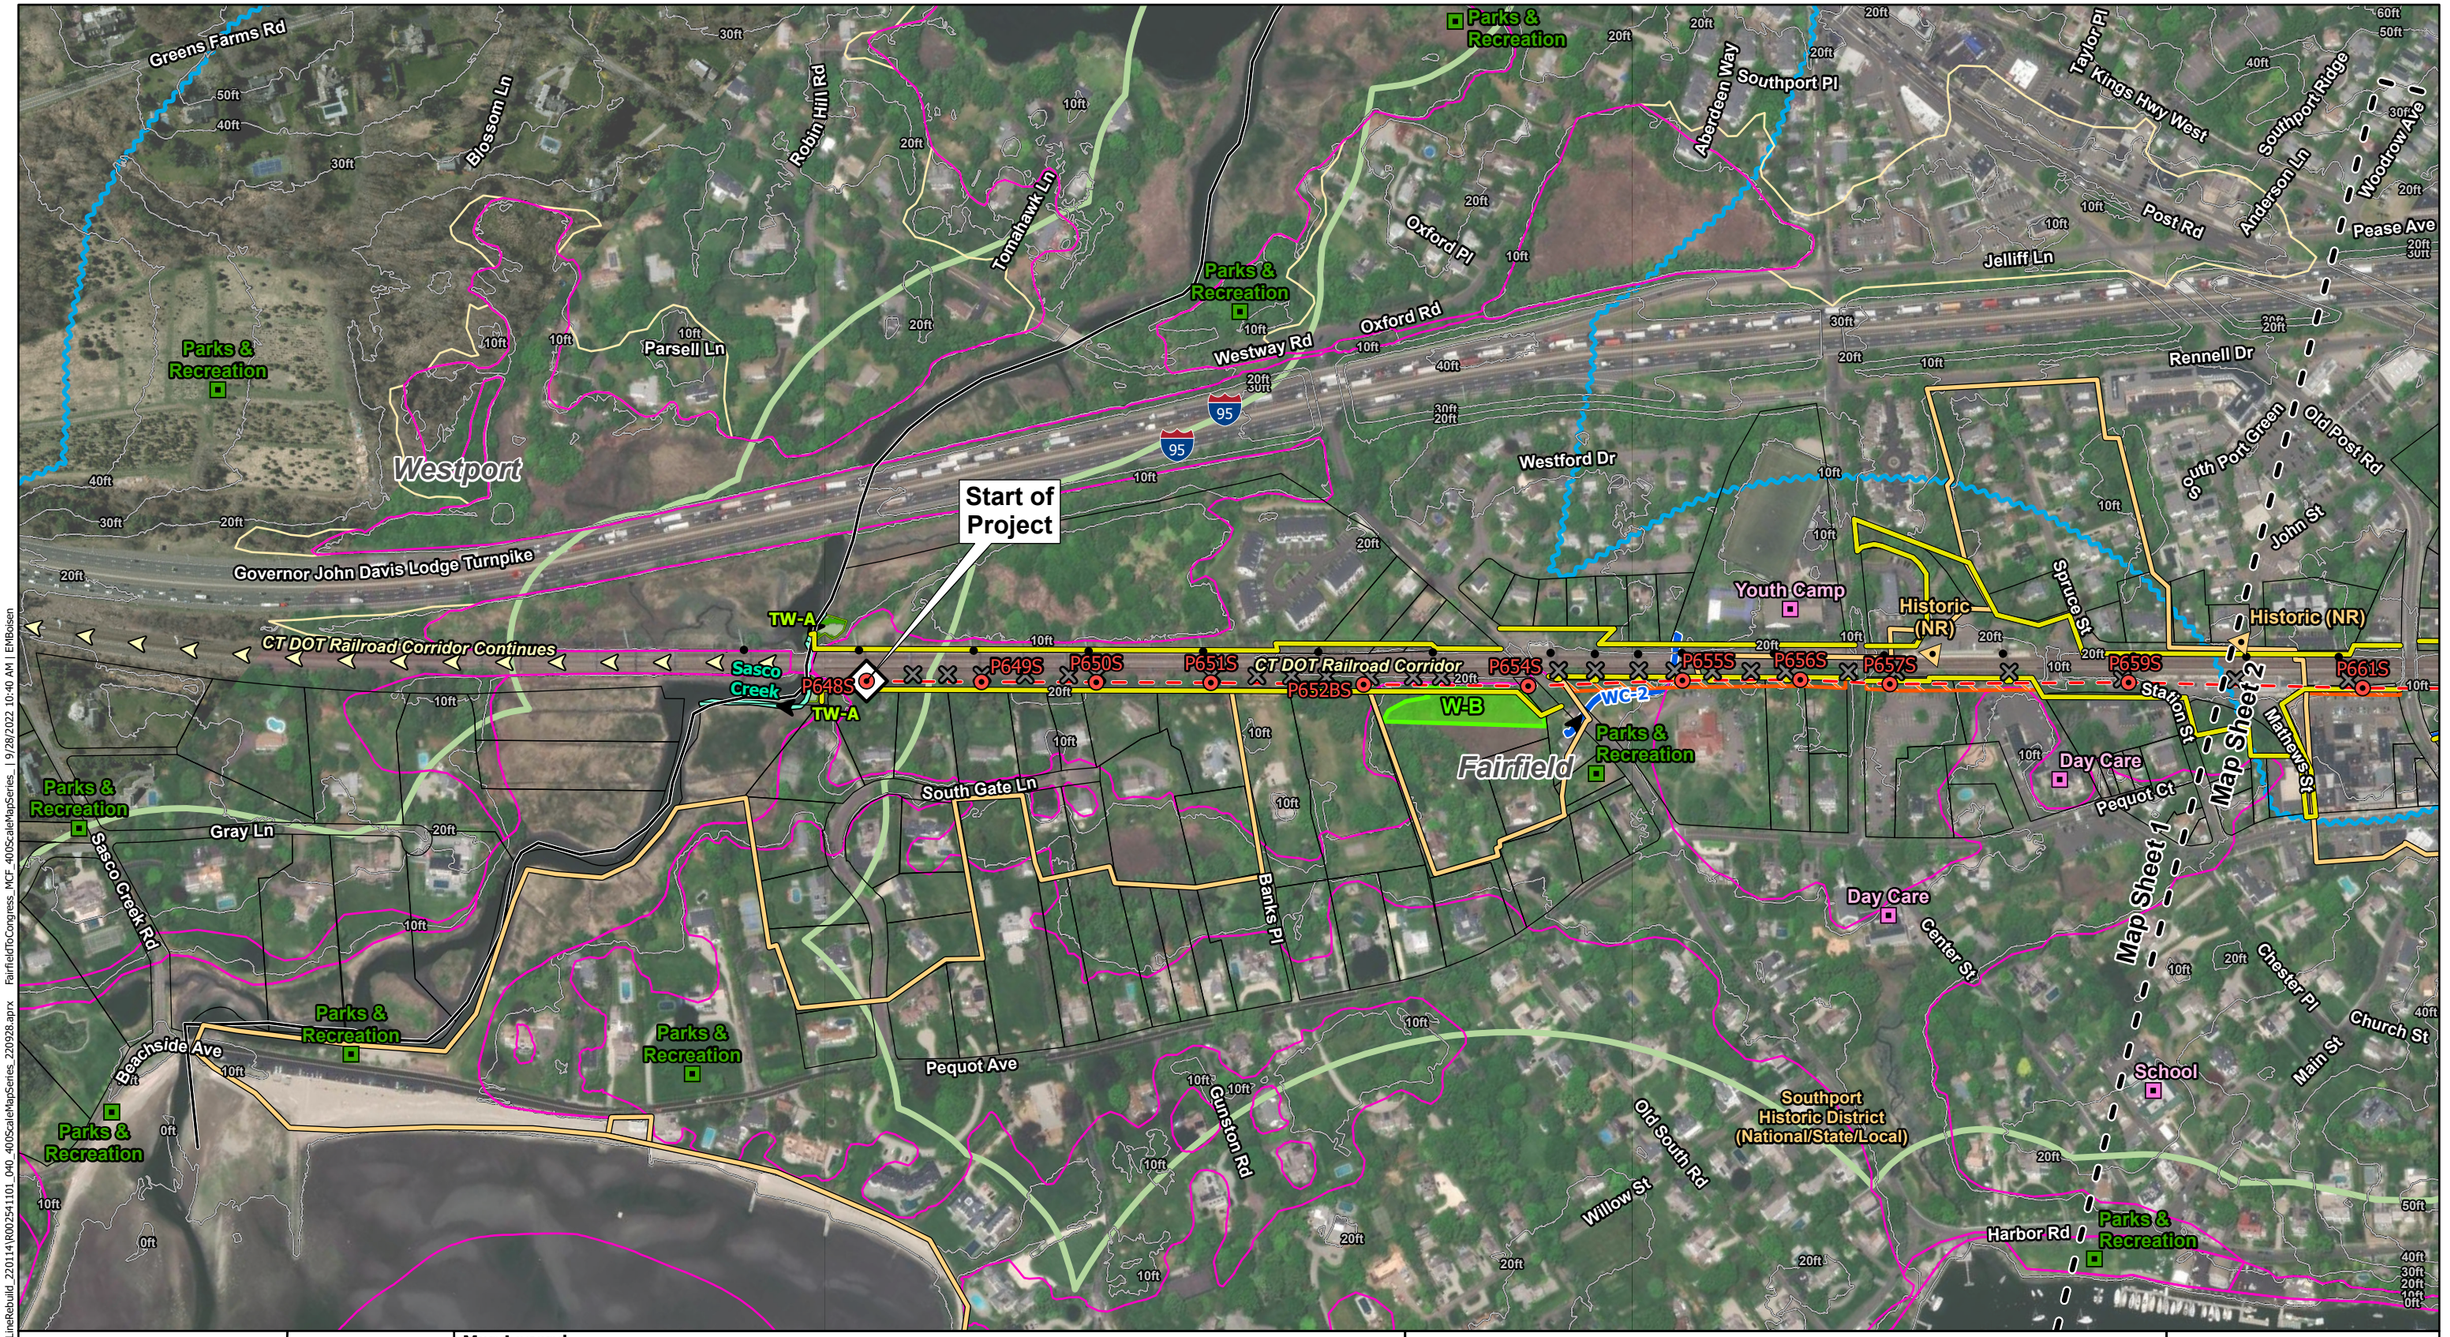
Terrain

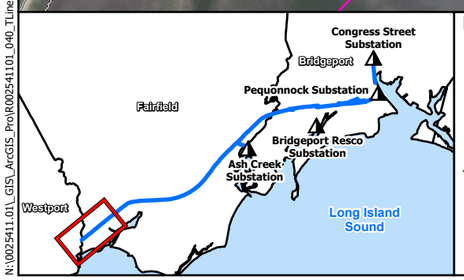
- Flat railroad corridor area with variably steep, ballasted embankment slopes bordered by generally flat terrain
- Existing elevated railroad corridor bridge over Westway Road, Center Street and Station Street

Road Crossings / Major Utility Crossings[2]

- Westway Road, Center Street, Station Street

[1] Zoning Designations along the Proposed Route are included on the UI 115-kV Railroad Project 100-scale maps, also see Attachment V2.1 Overview Maps and Legends for Zoning District Key
[2] UI would coordinate with other underground and overhead utility companies, municipalities, CT DOT and Metro North Railroad regarding the location of utility and transportation facilities





Map Legend

- Proposed Single Circuit Transmission Line Structure
- Start of Project Location
- Existing Bonnet To Be Removed
- Proposed Centerline of Rebuilt 115-kV Line

CT DOT CORRIDOR TO ASH CREEK SUBSTATION DESCRIPTION AND PROPOSED UI FACILITIES

Existing UI ROW

- Total UI ROW Width: Varies, 40 - 192 feet

Proposed UI 115-kV Transmission Lines and Proposed Project Activities

- 1430 and 91001-2 lines in UI ROW: Remove 115-kV Components and Lattice Towers AC1, AC2 and AC3 leading to the Ash Creek Substation
- 1430 line on east side of UI ROW to Ash Creek Substation: Rebuild 115-kV Transmission Line on single circuit monopoles
  - Construct Transmission Line Structures P713ES, P713ES-1, P713ES-2
- 91001-2 line on west side of UI ROW to Ash Creek Substation: Rebuild 115-kV Transmission Line on single circuit monopoles
  - Construct Transmission Line Structures P714WS, P714WS-1, P714WS-2, P714WS-3
- Rebuild of existing 115-kV transmission interconnection at Ash Creek Substation

Proposed Additional UI Easement

- West Side: 0 feet (Kenard St ROW) / East Side: 0 to 42 feet

UI ROW Vegetation, Wetlands, and Waterbodies

- Freshwater and tidal marshes, tidal mud flats, and low deciduous trees and shrubs
- Wetland W-H – PEM/PSS
- Tidal Wetland TW-I – E1UBL
- Tidal Watercourses TWC-11, TWC-12 – R5UBh1
- Tidal Watercourse Ash Creek – E1UBL

Terrain

- Flat marsh areas with walking trails in conservation area
- Riverbanks and riparian areas along Ash Creek and an island within the creek

CT DOT PROPERTY: RAILROAD CORRIDOR DESCRIPTION AND PROPOSED UI FACILITIES

CT DOT Corridor Property

- Total Corridor Width: Varies, 99 - 189 feet
- Number of Railroad Tracks (Metro North Railroad) = 4
- Distance from center of existing southern catenary structure to southern CT DOT Corridor boundary = Varies, 19 - 70 feet

CT DOT PROPERTY: RAILROAD CORRIDOR DESCRIPTION AND PROPOSED UI FACILITIES (continued)

Proposed UI 115-kV Transmission Lines and Proposed Project Activities

- 1430 line on south side of CT DOT Corridor: Remove Existing Bonnets and 115-kV Components on Catenary Structures 703S, 703AS, 704S through 706S, 706AS, 707S through 710S, 710AS, 711S, 711AS, 712S, 713S
- 91001-2 line on south side of CT DOT Corridor: Remove Existing Bonnets and 115-kV Components on Catenary Structures 714S through 720S, 720AS, 721S, 721AS, 722S, 723S
- 1430 line on south side of CT DOT Corridor: Rebuild 115-kV Transmission Line on single circuit monopoles to the south of the railroad tracks
  - Construct Transmission Line Structures P703S through P713S
- 91001-2 line on south side of CT DOT Corridor: Rebuild 115-kV Transmission Line on single circuit monopoles to the south of the railroad tracks
  - Construct Transmission Line Structures P716S through P723S
  - Reconductor[2] 115-kV Components on existing Transmission Line Structures TP717S and TP718S
- 1130 Line along north side of CT DOT Corridor to remain

Proposed UI Easement Boundary Outside of CT DOT Corridor Boundary

- North Side: 0 feet / South Side: 0 feet, except for: P707S to P723S - 0 to 35 feet

Wetlands, Watercourses and Waterbodies

- Wetland W-G – PEM
- Wetland W-H – PEM/PSS
- Watercourses WC-7, WC-8, WC-9, WC-10 – R5UBh1

CT DOT Railroad Corridor Vegetation

- None on CT DOT railroad corridor within existing catenary structures and rail clear zones (managed and maintained by CT DOT)
- Stands of mixed deciduous/evergreen trees and shrubs within CT DOT corridor boundary outside of CT DOT maintained limits
- Wetland/watercourse cover types noted above
- Tidal marsh grass and vegetation associated with Ash Creek floodplain

Terrain

- Flat railroad corridor area with variably steep, ballasted embankment slopes bordered by flat to hilly terrain
- Railroad corridor passes under existing elevated roadway overpass at US Highway 1, Grasmere Avenue, Ash Creek Boulevard, and Black Rock Turnpike

Road Crossings / Major Utility Crossings[3]

- US Highway 1, Grasmere Avenue, Ash Creek Blvd, Black Rock Turnpike

[1] Zoning Designations along the Proposed Route are included on the UI 115-kV Railroad Project 100-scale maps, also see Attachment V2.1 Overview Maps and Legends for Zoning District Key
[2] "Reconductor 115-kV Components" typically means removal of existing 115-kV conductor cables, insulators, and hardware from the existing structure and replacement with new 115-kV conductors, insulators, and hardware installed on the existing structure in accordance with project requirements.
[3] UI would coordinate with other underground and overhead utility companies, municipalities, CT DOT and Metro North Railroad regarding the location of utility and transportation facilities

AREA DESCRIPTION

Existing Land Use

- Residential, Commercial, Industrial/Business
- Commercial
- Industrial/Business
- Recreational / Open Space
  - West End Park, 1600 CT Route 130, Bridgeport

Zoning[1]

- Town of Fairfield
  - Designed Industrial District (DI)
  - Commerce Drive Area Designed District (CDADD)
- City of Bridgeport
  - Mixed Residential 1 (NX3)
  - Mixed-Use Centers (MX2)
  - Neighborhood Mix 2 (NX2)
  - Heavy Commercial-Wholesale (CX)
  - Industrial (I)
  - Residential-Office Center (RX2)

Natural Systems

- State/Federal Jurisdictional Wetlands and Watercourses
- FEMA 100-Year and 500-Year Flood Zones
- CT DEEP Inland Wetland Soils / CT DEEP Tidal Wetland Soils
- CT NDDB Area
- CT DEEP Coastal Management Area
- Ash Creek

Visual Character

- CT DOT Railroad Corridor (Metro North Railroad)
- Urban-suburban environments, low profile commercial/industrial buildings, and parking areas
- Waterway environments

Community Facilities

- Bright Beginnings Early Childhood Program, 356 Black Rock Turnpike, Fairfield
- Family Child Care, 1668 Fairfield Ave, Bridgeport
- Liz Learn and Play Child Care, 77 Davis Ave, Bridgeport
- Mary Immaculate Day Care Center, 1111 Wordin Ave, Bridgeport
- Steamulating Young Minds Imagination Academy, 246 Lenox Ave, Bridgeport
- Sunflower Family Learning Center, 24 Whittier St, Bridgeport
- West End Child Care, 361 Bird St, Bridgeport
- Geraldine Claytor Magnet Academy, 240 Ocean Terrace, Bridgeport
- Park City Prep Charter School, 1550 State St, Bridgeport
- Whittier Elementary School, 82 Whittier St, Bridgeport
- Wakeman Boys And Girls Club Smilow Burroughs Summer Camp, 2414 Fairfield Ave, Bridgeport

Historic and Cultural Resources

- Cassidy House, 691 Ellsworth Street, Bridgeport - NRHP
- Railroad Avenue Industrial District, Bridgeport – NRHD
- West End Congregation – Achavath Achim Synagogue, 725 Hancock Ave - NRHP

CT DOT PROPERTY: RAILROAD CORRIDOR DESCRIPTION AND PROPOSED UI FACILITIES

CT DOT Corridor Property

- Total Corridor Width: Varies, 66 - 236 feet
- Number of Railroad Tracks (Metro North Railroad) = 4
- Distance from center of existing southern catenary structure to southern CT DOT Corridor boundary = Varies, 2 – 48 feet
- Distance from center of existing northern catenary structure to northern CT DOT Corridor boundary = Varies, 2 – 120 feet

Proposed UI 115-kV Transmission Lines and Proposed Project Activities

- 91001-2 line on south side of CT DOT Corridor: Remove Existing Bonnets and 115-kV Components on Catenary Structures 723S through 733S, 736S, 736AS, 737S, 738AS, 739S through 742S
- 1130 line on north side of CT DOT Corridor: Remove Existing Bonnets and 115-kV Components on Catenary Structures 737N, 738N, 738BN, 739N through 742N
- 1130 line on north side of CT DOT Corridor: Remove 115-kV Components and Top Portion of Pole 736N
- 91001-2 line on south side of CT DOT Corridor: Rebuild 115-kV Transmission Line on single circuit monopoles
  - Construct Transmission Line Structures P723S through P737S. Cross over railroad tracks from P737S to P737N
  - Reconductor[2] 115-kV Components on existing Transmission Line Structure TP734S and TP735S
- 1130 line on north side of CT DOT Corridor: Rebuild 115-kV Transmission Line on single circuit monopoles
  - Construct Transmission Line Structures P736NN
  - Reconductor[2] 115-kV Components on existing Transmission Line Structure TP735N
- 91001-2 and 1130 lines on north side of CT DOT Corridor: Rebuild 115-kV Transmission Line on double circuit monopoles
  - Construct Transmission Line Structures P737N through P740N, P742N
- 1130 line on north side of CT DOT Corridor to remain until TP735N

Proposed UI Easement Boundary Outside of CT DOT Corridor Boundary

- North Side: 0 feet, except for: P737N to P742N - 29 feet to 79 feet
- South Side: 0 feet, except for: P723S to P737S - 0 feet to 23 feet

Wetlands, Watercourses and Waterbodies

- Tidal Watercourse Ash Creek - E1UBL
- Tidal Wetland TW-J – E1UBL

Railroad Corridor Vegetation

- None on CT DOT railroad corridor within existing catenary structures and rail clear zones (managed and maintained by CT DOT)
- Stands of mixed deciduous/evergreen trees and shrubs within CT DOT corridor boundary outside of CT DOT maintained limits
- Wetland/watercourse cover types noted above

Terrain

- Flat railroad corridor area with variably steep, ballasted embankment slopes bordered by generally flat terrain
- Existing elevated railroad corridor bridge over Ash Creek, Fairfield Avenue, and Bostwick Avenue

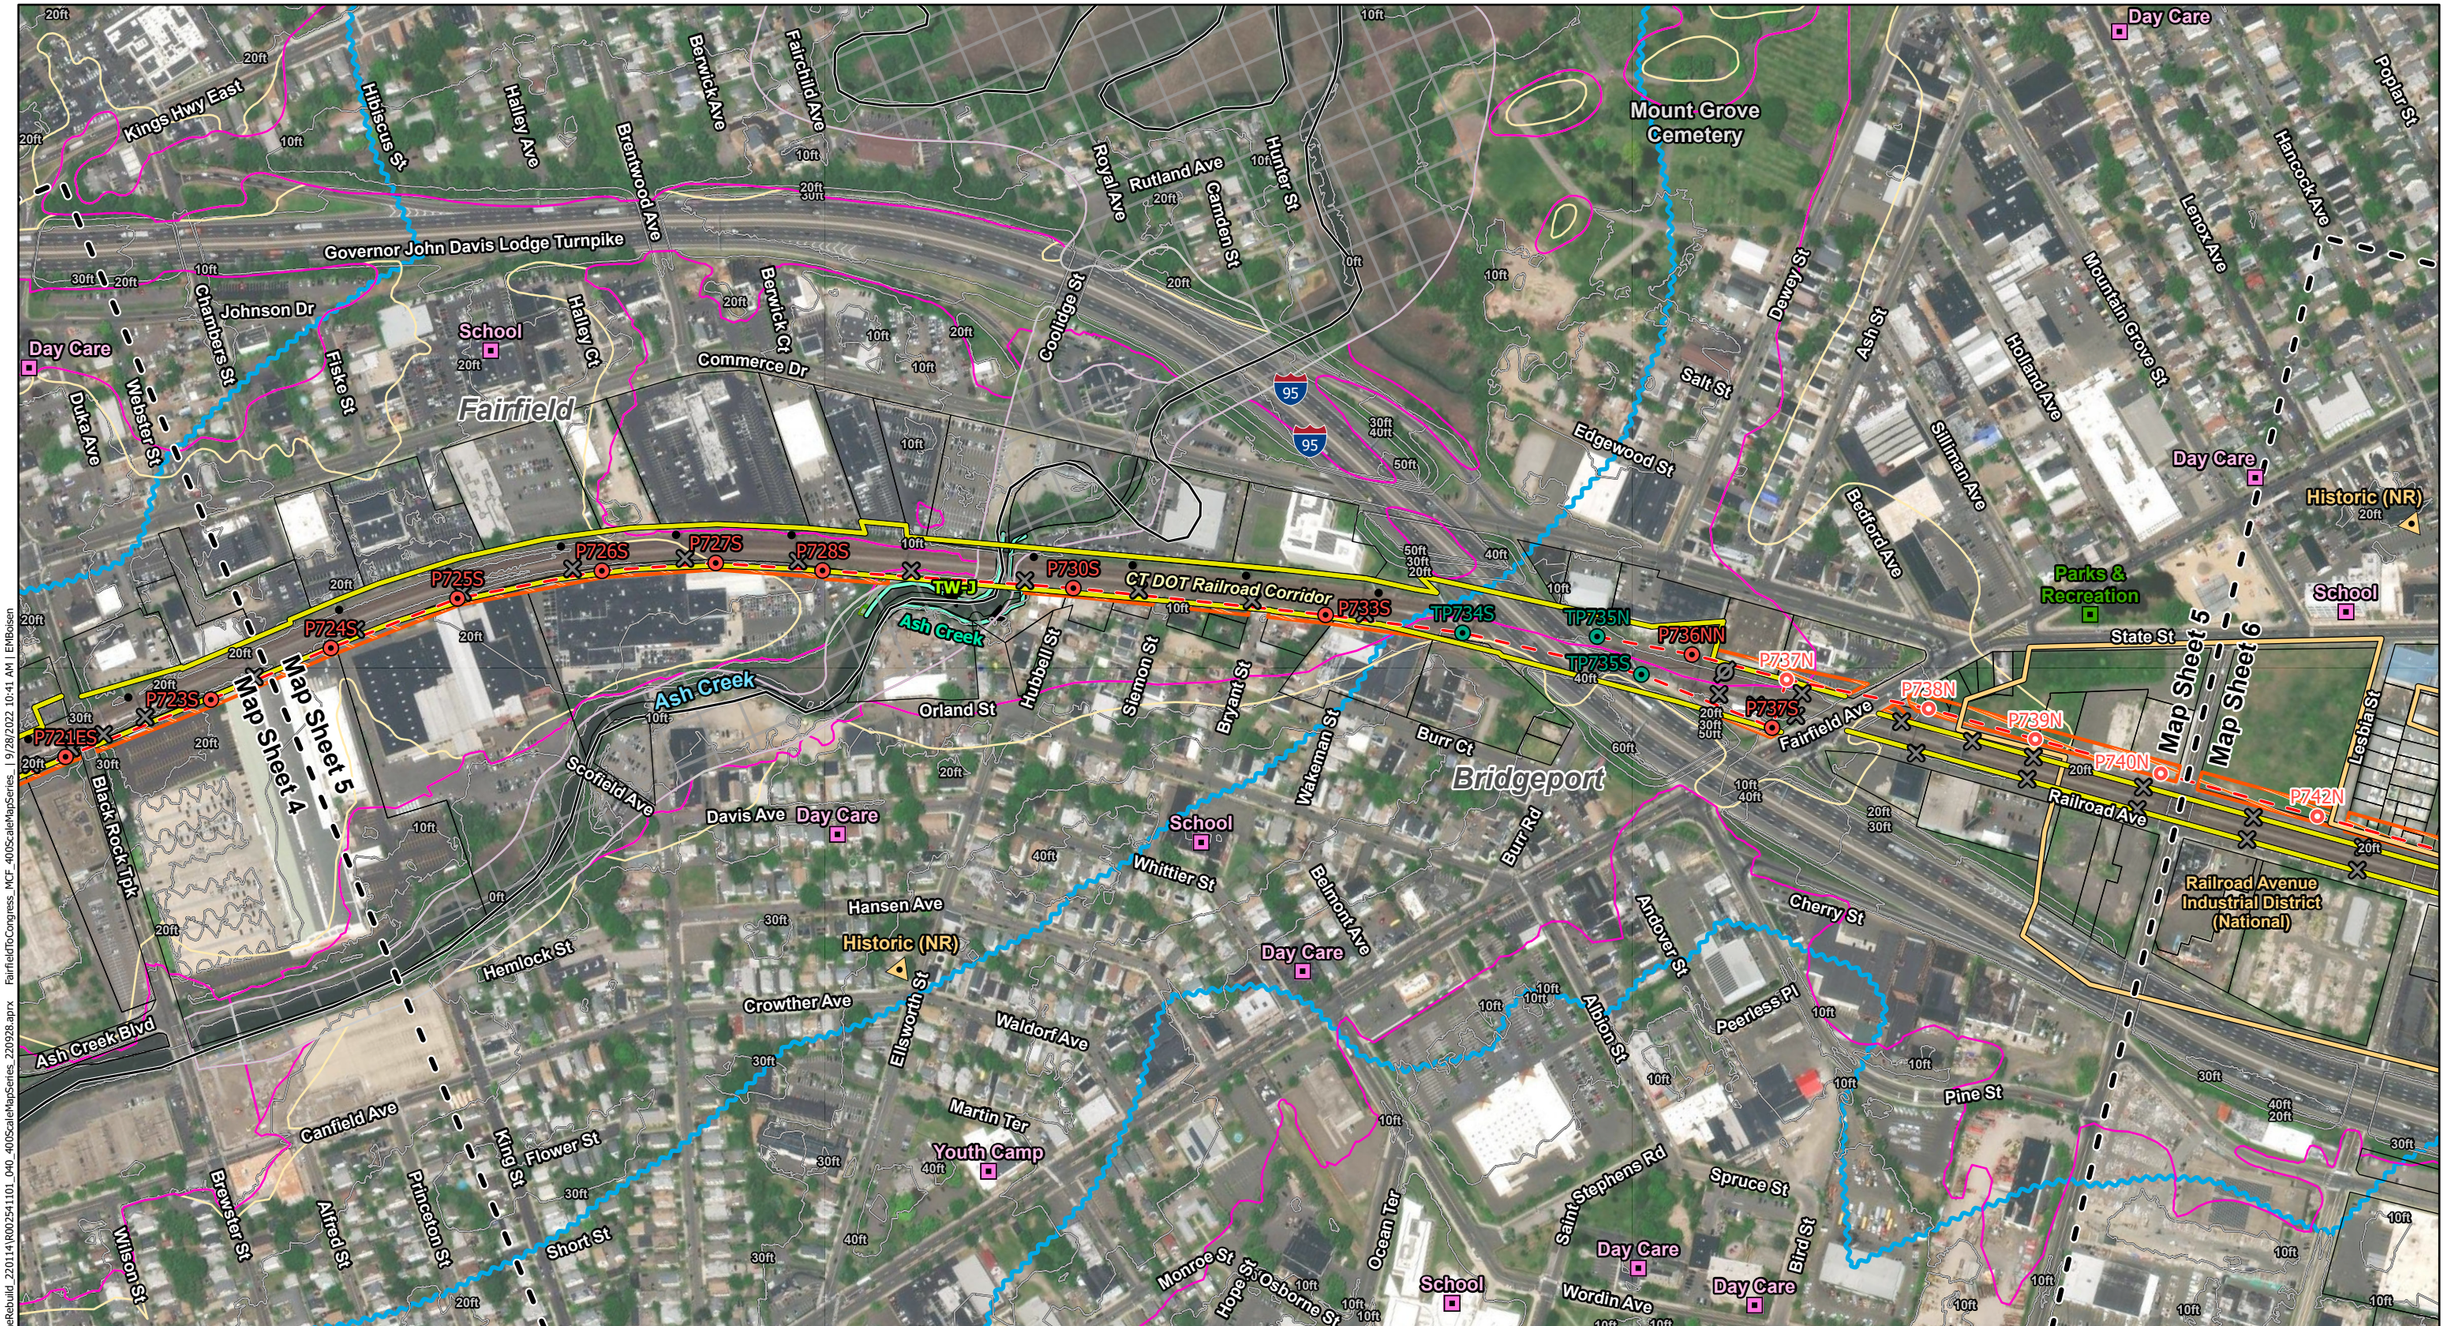
Road Crossings, Railroad Crossings and Major Utility Crossings[3]

- Interstate 95, Fairfield Avenue, Bostwick Avenue
- Metro North 4 track Crossing between P737S and P737N

[1] Zoning Designations along the Proposed Route are included on the UI 115-kV Railroad Project 100-scale maps, also see Attachment V2.1 Overview Maps and Legends for Zoning District Key

[2] "Reconductor 115-kV Components" typically means removal of existing 115-kV conductor cables, insulators, and hardware from the existing structure and replacement with new 115-kV conductors, insulators, and hardware installed on the existing structure in accordance with project requirements

[3] UI would coordinate with other underground and overhead utility companies, municipalities, CT DOT and Metro North Railroad regarding the location of utility and transportation facilities



Map Legend

- Proposed Single Circuit Transmission Line Structure
- Proposed Double Circuit Transmission Line Structure
- Existing Structure to be Reconductored
- Existing Bonnet To Be Removed
- Existing Steel Pole Top To Be Removed & Capped
- Proposed Centerline of Rebuilt 115-kV Line
- Existing CTDOT Corridor Boundary
- Proposed UI Permanent Easement
- Existing Transmission Structure to Remain
- National or State Historic Resource Area
- Community Facility
- Open Space Recreation Area
- Historic (NR) Resource
- Parcel Boundary
- Municipal Boundary
- FEMA Floodway
- FEMA 100-Year Floodplain
- FEMA 500-Year Floodplain
- 10ft Contour
- Field Delineated Wetland
- Delineated Watercourse
- Delineated Tidal Wetland
- Delineated Tidal Watercourse
- CT DEEP Coastal Area

- Division Street Historic District – NRHD
- Barnum/Palliser Historic District – NRHD/SRHD/LHD
- Marina Park Historic District - NRHD

HOWARD AVENUE: RESCO SUBSTATION OPGW LINE DESCRIPTION AND PROPOSED UI FACILITIES

Howard Avenue Public ROW

- Total Width: 60 feet

Proposed UI 115-kV Transmission Lines and Proposed Project Activities

- 91001-3 tap line to Resco Substation: Rebuild Overhead Fiber Optic Line (OPGW) and associated components on existing single circuit monopoles (Structures RT1 through RT5) and into the Resco Substation

Proposed UI Easement Boundary Outside of Howard Avenue

- No new easement is anticipated for the tap line

Terrain

- Flat, urban streetscape

Road Crossings / Major Utility Crossings[3]

- Cherry Street, Interstate 95, Pine Street, Wordin Avenue

CT DOT PROPERTY: RAILROAD CORRIDOR DESCRIPTION AND PROPOSED UI FACILITIES

CT DOT Corridor Property

- Total Corridor Width: 66 feet
- Number of Railroad Tracks (Metro North Railroad) = 4
- Distance from center of existing catenary structures to CT DOT Corridor boundaries = 2 feet

Proposed UI 115-kV Transmission Lines and Proposed Project Activities

- Remove Existing Bonnets and 115-kV Components on Catenary Structures 742N/742S through 752N/752S, 753N, 756S, 757N/757S through 760N/760S
- 91001-2 and 1130 lines on north side of CT DOT Corridor: Rebuild 115-kV Transmission Line on double circuit monopoles
  - Construct Transmission Line Structures P742N through P744N, P745WN, P745N
- 91001-1 and 1130 lines on south side of CT DOT Corridor: Rebuild 115-kV Transmission Line on double circuit monopoles
  - Construct Transmission Line Structure P745S through P752S. Cross over railroad tracks from P745S to P745N. Cross over railroad tracks again from P752S to P752N.
- 91001-1 line on south side of CT DOT Corridor: Rebuild 115-kV Transmission Line on single circuit monopoles
  - Construct Transmission Line Structures P756S, P758S, P760S
  - Reconductor[2] 115-kV Components on existing Transmission Line Structure TP753S and TP755S
- 1130 line on north side of CT DOT Corridor: Rebuild 115-kV Transmission Line on single circuit monopoles
  - Construct Transmission Line Structures P752N, P756N through P760N
  - Reconductor[2] 115-kV Components on existing Transmission Line Structure TP754N and TP756N

Proposed UI Easement Boundary Outside of CT DOT Corridor Boundary

- North Side: 0 feet, except for: P742N to P745N - 76 feet, and P752N to P762N - 30 feet to 50 feet
- South Side: 0 feet, except for: P745S to P762S – 30 feet to 82 feet

Railroad Corridor Vegetation

- None on CT DOT railroad corridor within existing catenary structures and rail clear zones (managed and maintained by CT DOT)

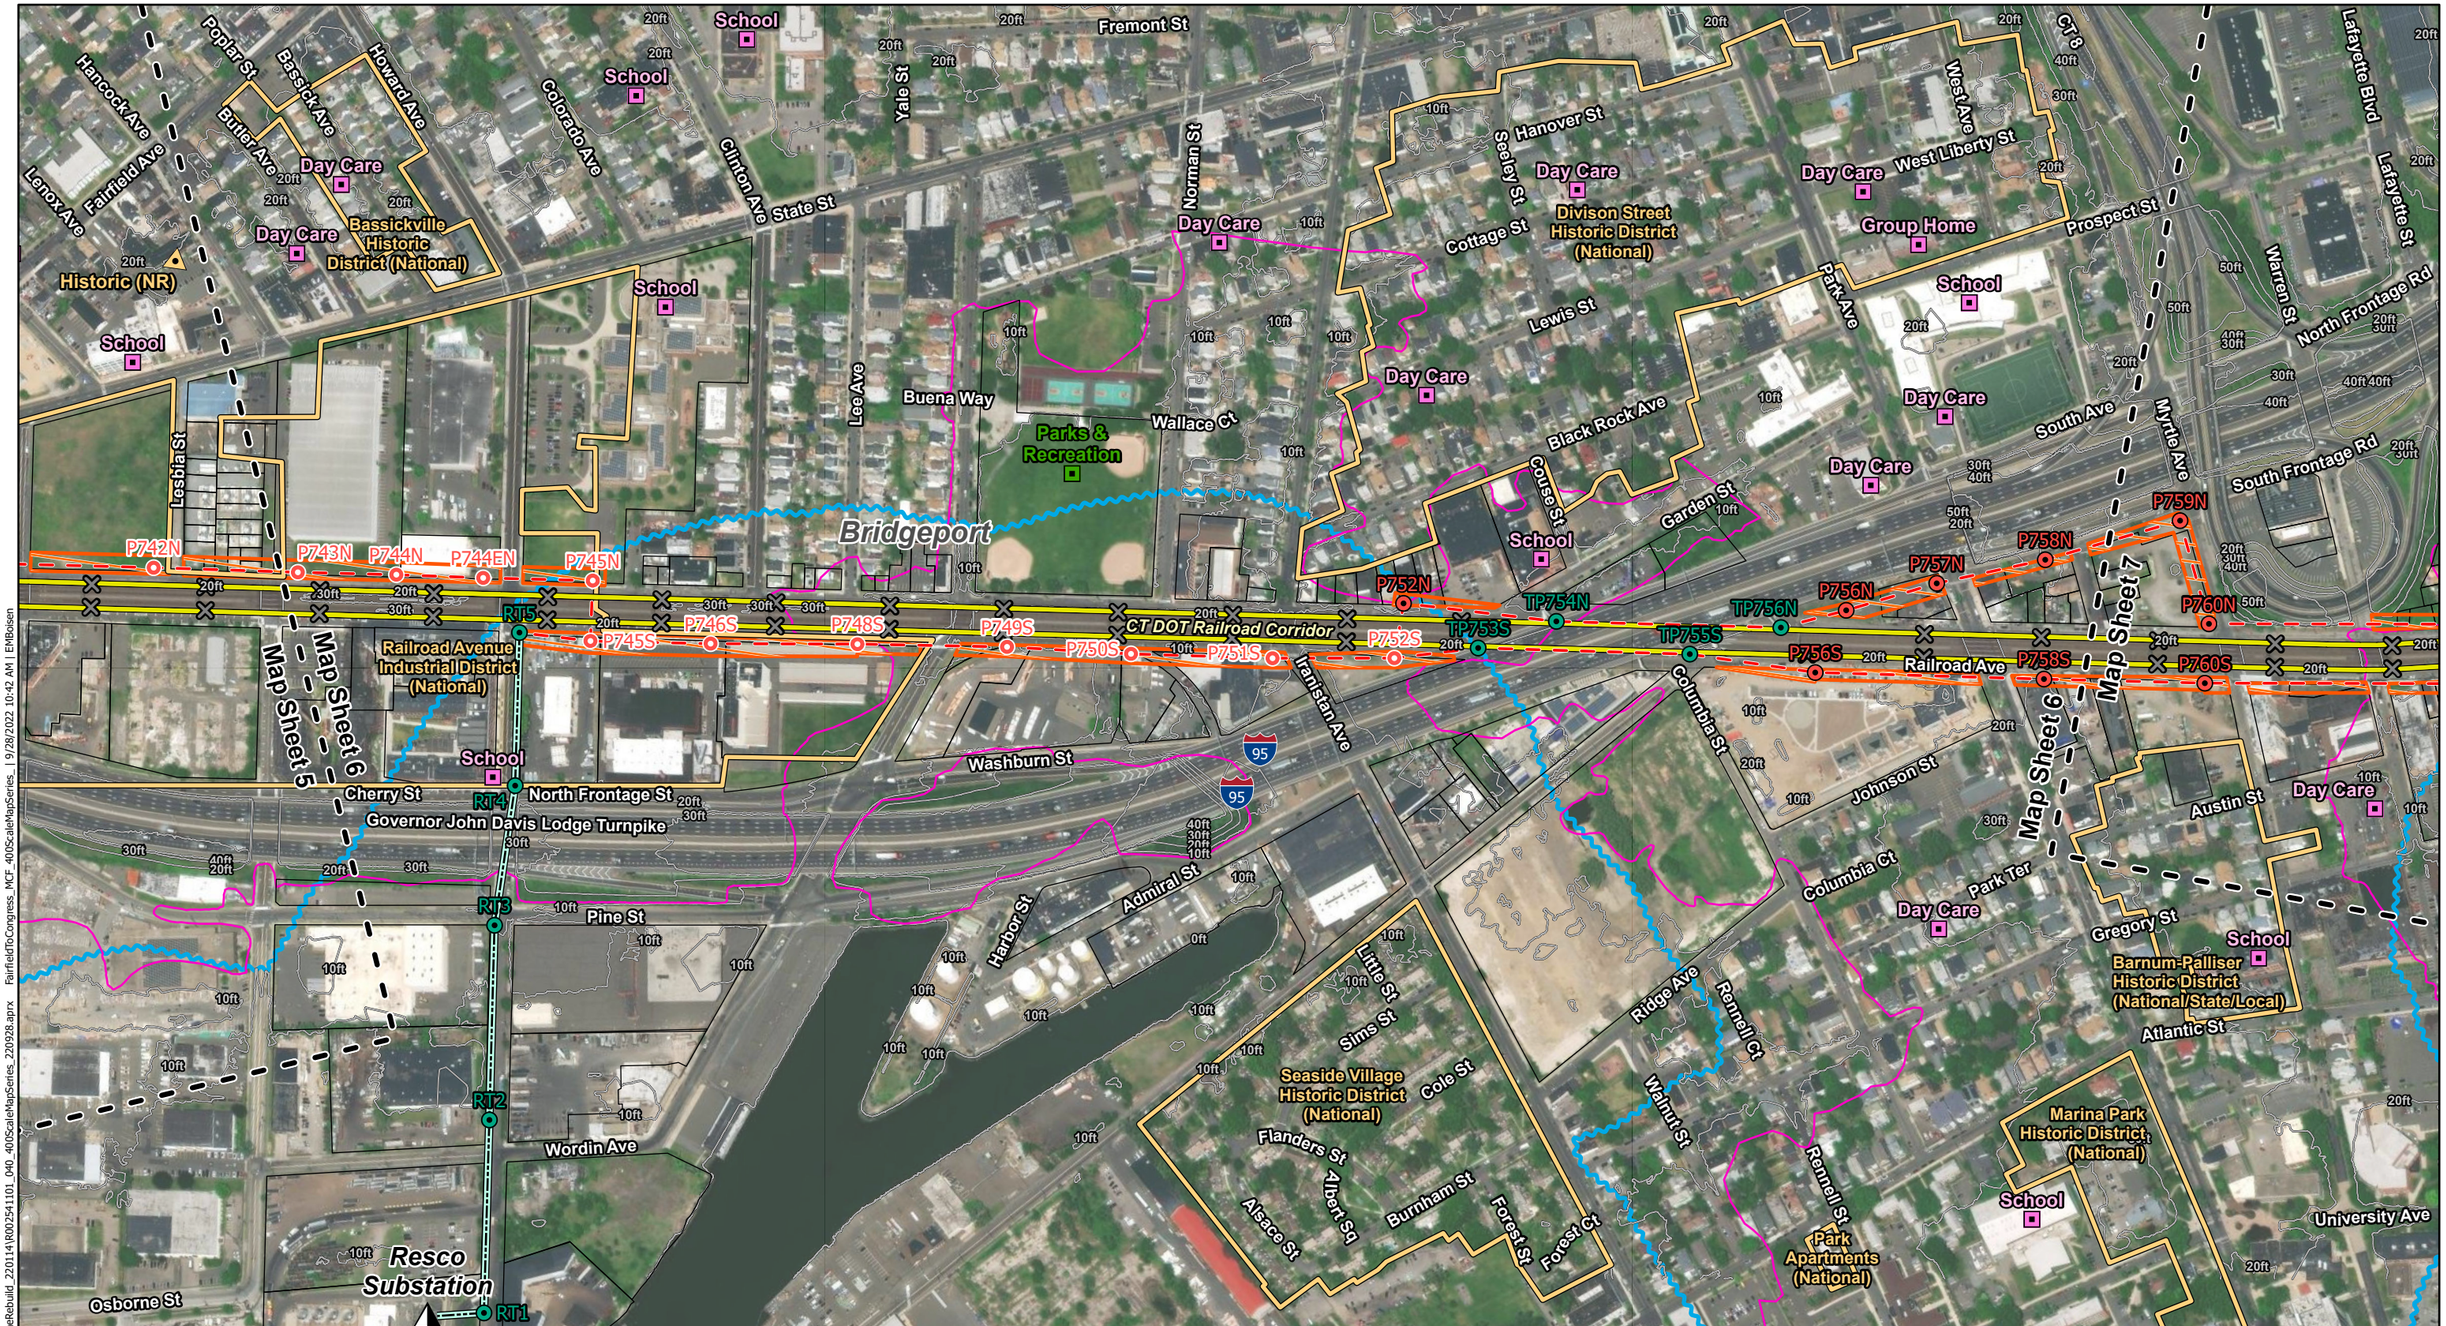
Terrain

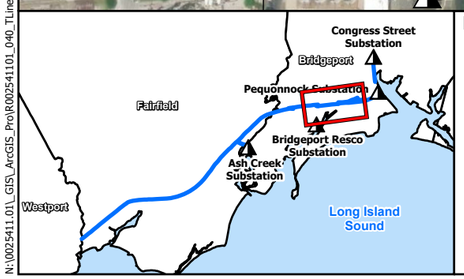
- Flat railroad corridor area with variably steep, ballasted embankment slopes bordered by variably hilly terrain
- Existing elevated railroad corridor bridge over Hancock Avenue, Howard Avenue, Wordin Avenue, Iranistan Avenue, South Avenue, and Park Avenue

Road Crossings / Major Utility Crossings[3]

- Hancock Avenue, Howard Avenue, Wordin Avenue, Iranistan Avenue, Interstate 95, South Avenue, Park Avenue
- Metro North 4 track Crossings between P745N and P745S; and P752S and P752N

[1] Zoning Designations along the Proposed Route are included on the UI 115-kV Railroad Project 100-scale maps, also see Attachment V2.1 Overview Maps and Legends for Zoning District Key
[2] "Reconductor 115-kV Components" typically means removal of existing 115-kV conductor cables, insulators, and hardware from the existing structure and replacement with new 115-kV conductors, insulators, and hardware installed on the existing structure in accordance with project requirements
[3] UI would coordinate with other underground and overhead utility companies, municipalities, CT DOT and Metro North Railroad regarding the location of utility and transportation facilities





Map Legend

- Proposed Single Circuit Transmission Line Structure
- Proposed Double Circuit Transmission Line Structure
- Existing Structure to be Reconductored
- Substation
- Existing Bonnet To Be Removed
- Proposed Centerline of Rebuilt 115-kV Line
- Existing CTDOT Corridor Boundary
- Proposed UI Permanent Easement
- Proposed Overhead Fiber Optic
- National or State Historic Resource Area
- Community Facility
- Open Space Recreation Area
- Historic (NR) Resource
- Parcel Boundary
- FEMA 100-Year Floodplain

MAPSHEET 7 of 7 – **Fairfield to Congress Railroad Transmission Line 115-kV Rebuild Project**
Proposed Route, CT DOT Railroad Corridor – Myrtle Avenue to CT DOT Railroad Corridor – Congress Street Substation, west of Congress Street
City of Bridgeport, Fairfield County, CT

AREA DESCRIPTION

Existing Land Use

- Residential
- Commercial
- Industrial/Business
  - UI Congress Substation, 55 Congress St
  - UI Pequonnock Substation: (New) 1 Kiefer St / (Old) 1 Atlantic St
- Recreational / Open Space
  - McLevy Green, 102 Bank St
  - Baldwin Plaza, 1135 Broad St
  - Riverfront Park, 208 Housatonic Ave
  - Majestic Park, 1471 Main St

Zoning[1]

- City Bridgeport
  - Residential-Office Center (RX2), Downtown Edge (DX2), Civic and Institutional (P2)
  - Parks and Open Space (P1)
  - Utility-Energy Infrastructure (P4)
  - Detention-Correction Facilities (P5)

Natural Systems

- State/Federal Jurisdictional Wetlands and Watercourses
- FEMA 100-Year Flood Zones
- CT NDDB Area
- CT DEEP Coastal Management Area
- Pequonnock River

Visual Character

- CT DOT Railroad Corridor (Metro North Railroad)
- Urban environments with single and multi-family housing, low profile and high rise commercial/industrial buildings, and parking areas
- Waterfront and harbor environments

Community Facilities

- Bridgeport Transportation Center, 525-710 Water St
- Bridgeport and Port Jefferson Ferry Terminal, 1 Ferry Access Rd
- Bridgeport YMCA/Kolbe Educational Center, 401 Kossuth St
- Donna's Little Doves Child Development Center, 215 Warren St
- Early Childhood Laboratory School, 900 Lafayette Blvd
- Jaime A Hulley Child Care Center, 460 Lafayette St
- Lighthouse Summer Program, 45 Lyon Terrace
- Bridgeport Hospital Center for Sleep Medicine, 1070 Main St
- Capital Preparatory Harbor Upper School, 777 Main St
- Housatonic Community College, 900 Lafayette Blvd
- The Bridge Academy, 160 Pulaski St
- Horizons at Greens Farms Academy, 1057 Broad St

Historic and Cultural Resources

- Bridgeport Downtown South Historic District – NRHD
- Mary and Eliza Freeman Houses, 352-354 & 358-360 Main St – NRHP
- Barnum/Palliser Historic District – NRHD/SRHD/LHD
- Bishop William D. Cottage Development Historic District – NRHD
- David Perry House, 531 Lafayette St – NRHP
- A.M.E. Zion Church, 427 Broad St - SRHP
- A.M.E. Zion Church Parsonage, 12 Gregory St – SRHP
- Charles A Nicholas Meat Market, 388 East Main Street – SRHP
- Ralph's Barber Shop, 420 East Main Street - SRHP
- CT Railway and Lighting Co. Car Barn (demolished), 55 Congress St - NRHP
- Golden Hill Historic District – NRHD
- Palace and Majestic Theaters, 1315-1357 Main St - NRHP
- Bridgeport Downtown North and South Historic Districts – NRHD
- Pequonnock River Railroad Bridge, RR ROW at Pequonnock River – NRHP
- East Bridgeport Historic District – NRHD
- East Main Street Historic District – NRHD

- Canal Boats – Berkshire No. 7, Elmer S. Dailey, Priscilla Dailey, Bridgeport Harbor – NRHP and Underwater Archaeological Resources

CT DOT PROPERTY: RAILROAD CORRIDOR DESCRIPTION AND PROPOSED UI FACILITIES

CT DOT Corridor Property

- Total Corridor Width: Varies, 66 - 210 feet
- Number of Railroad Tracks (Metro North Railroad) = 4
- Distance from center of existing southern catenary structure to southern CT DOT Corridor boundary = Varies, 2 – 80 feet
- Distance from center of existing northern catenary structure to northern CT DOT Corridor boundary = Varies, 2 – 80 feet

Proposed UI 115-kV Transmission Lines and Proposed Project Activities

- Remove Existing Bonnets and 115-kV Components on Catenary Structures 760N/760S through 765N/765S, 765AN/765AS, 765BN/765BS, 777N/777S, 777AN/777AS, 778N/778S, 778AN/778AS, 779N/779S, 779AN/779AS, 780N/708S through 783N/783S
- Remove 115-kV Components and Poles 775N, 775AS
- Remove 115-kV Components and Lattice Tower "North Tower" above the MNR railroad tracks
- 1130 line on north side of CT DOT Corridor: Rebuild 115-kV Transmission Line on single circuit monopoles
  - Construct Transmission Line Structure P762N

Proposed UI 115-kV Transmission Lines and Proposed Project Activities (continued)

- 91001-1 and 1130 lines on south side of CT DOT Corridor: Rebuild 115-kV Transmission Line on double circuit monopoles
  - Construct Transmission Line Structures P762S, 765AS
- 8809A and 8909B lines on south side of CT DOT Corridor: Rebuild 115-kV Transmission Line on double circuit monopoles
  - Construct Transmission Line Structures P775S, P779S, P783S
- 8809A and 8909B lines on north side of CT DOT Corridor: Rebuild 115-kV Transmission Line on double circuit monopoles
  - Construct Transmission Line Structures P783N
  - Reconductor[2] 115-kV Components on existing Transmission Line Structure TP784N at Congress Substation

Proposed UI Easement Boundary Outside of CT DOT Corridor Boundary

- North Side: 0 feet, except for: P783N - 63 feet
- South Side: 0 feet, except for: P762S to P765AS – 53 to 101 feet and P775S to P783S – 0 feet to 74 feet

Wetlands, Watercourses and Waterbodies

- Pequonnock River – E1UBL

Railroad Corridor Vegetation

- None on CT DOT railroad corridor within existing catenary structures and rail clear zones (managed and maintained by CT DOT)
- Stands of shrubs within CT DOT corridor boundary outside of CT DOT maintained limits
- Watercourse cover types noted above

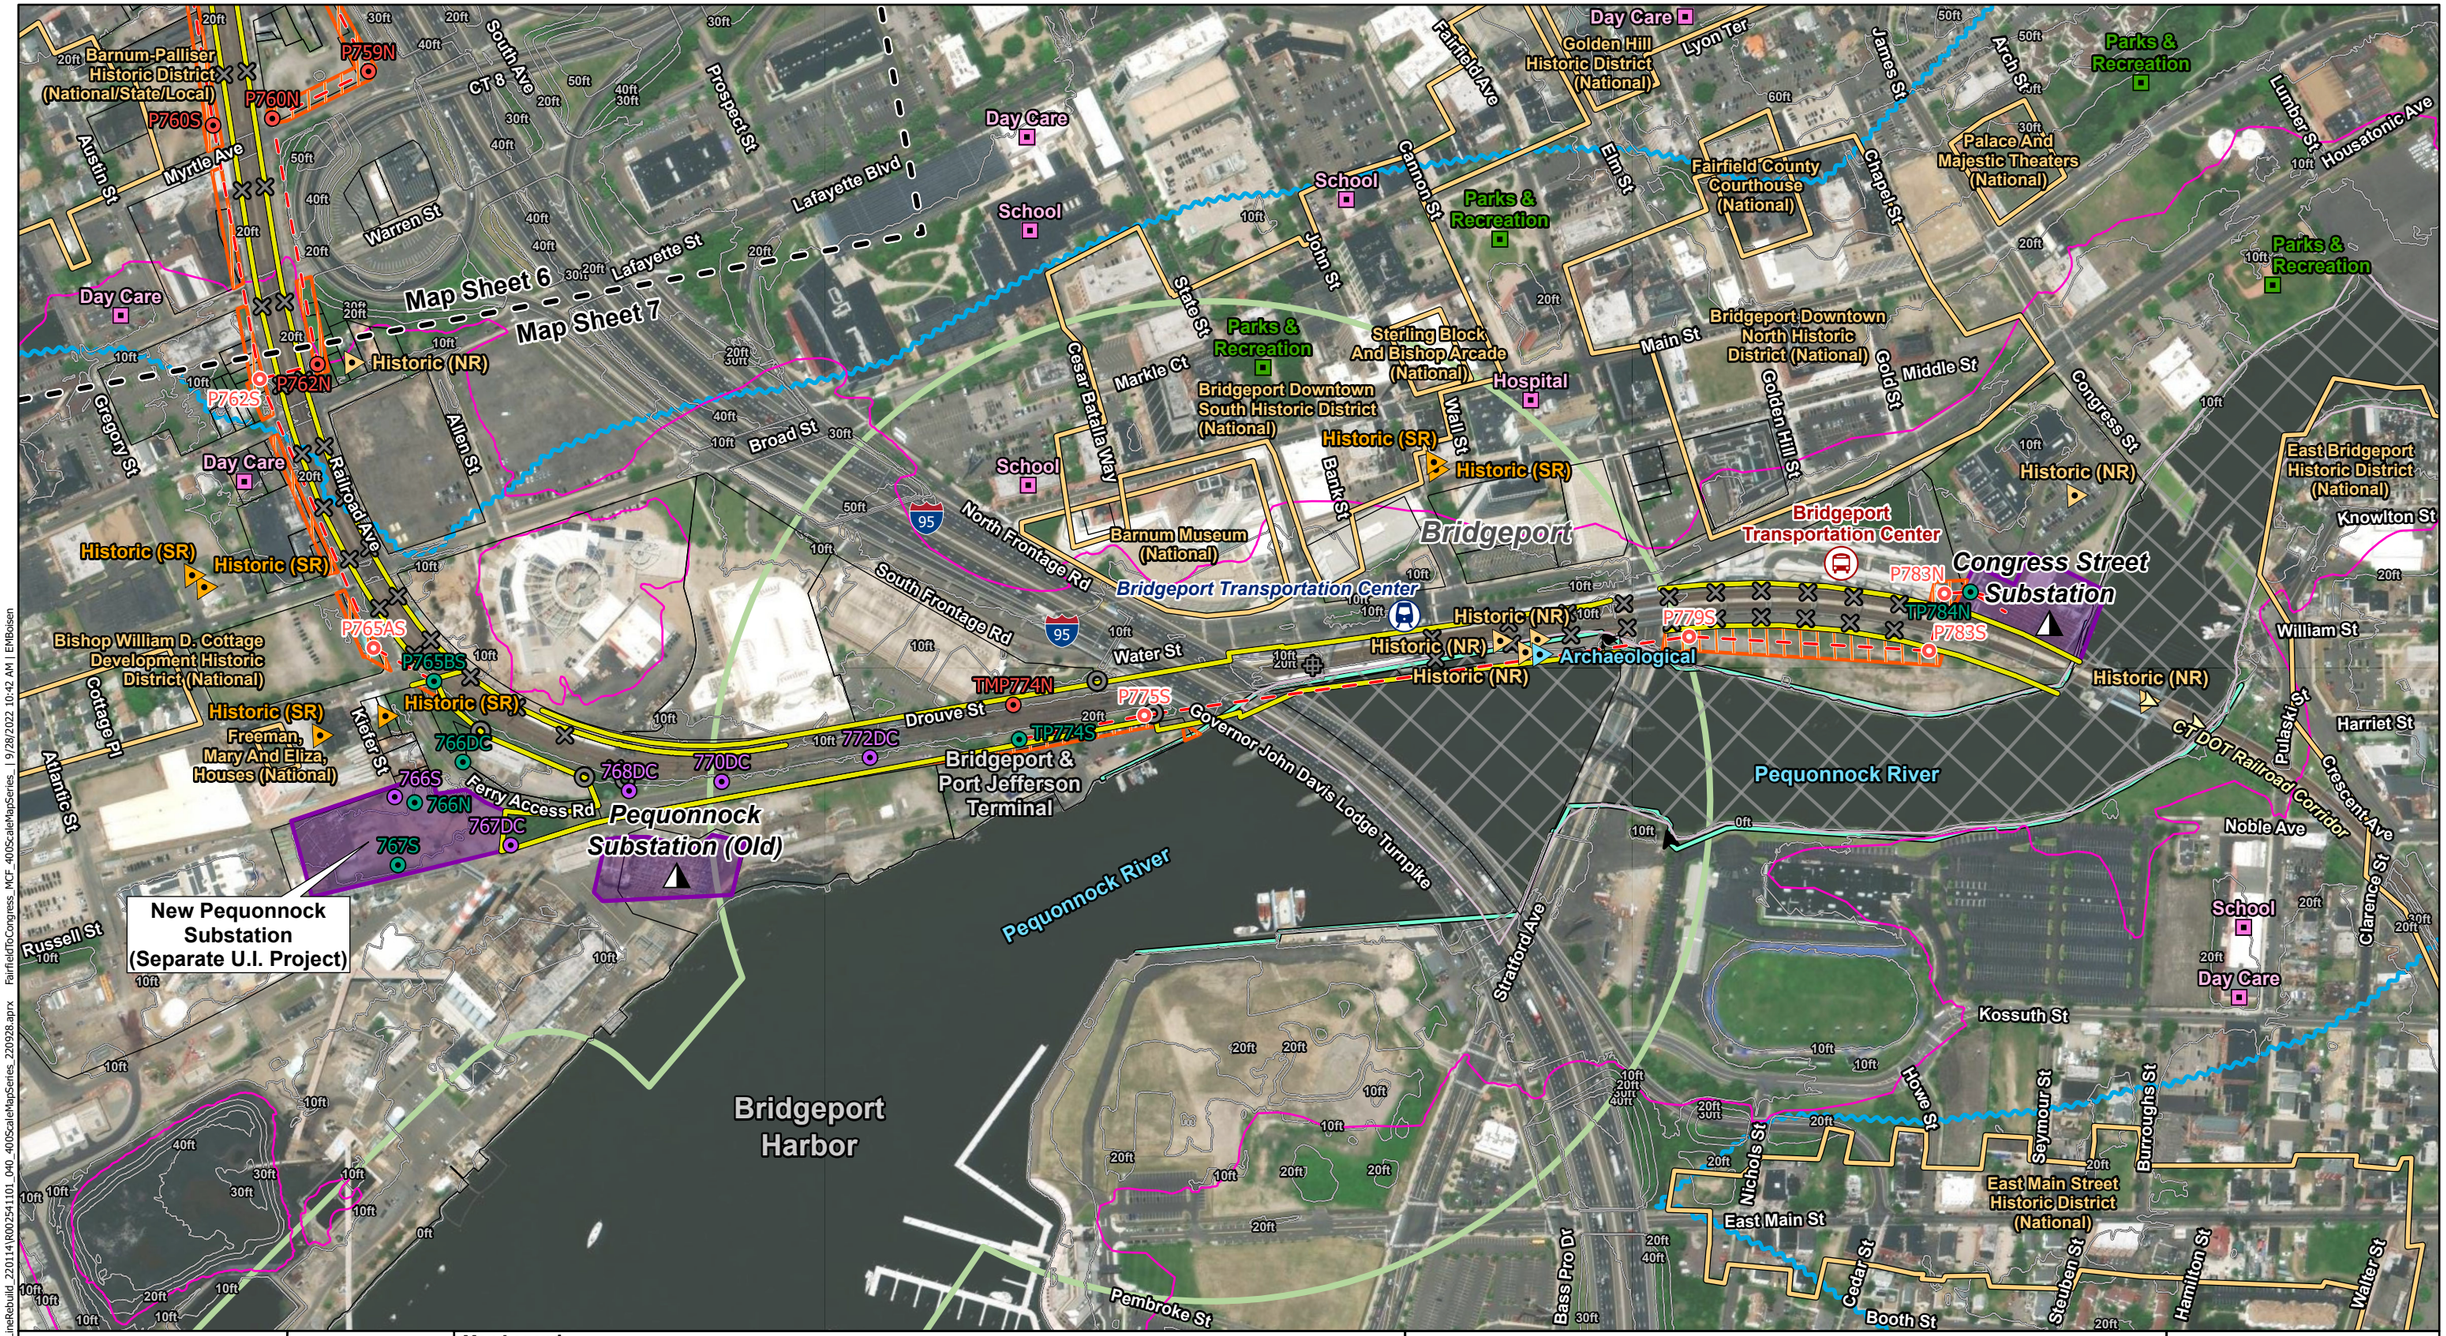
Terrain

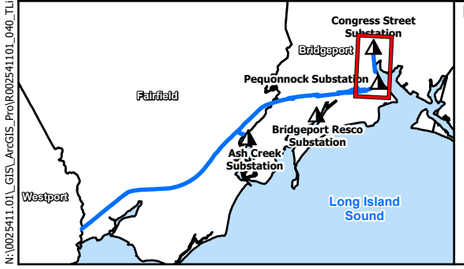
- Flat railroad corridor area with variably steep, ballasted embankment slopes bordered by flat to hilly terrain
- Existing elevated railroad ROW over a concrete box culvert at Cove River
- Existing elevated railroad corridor bridge over Myrtle Avenue, Warren Street, Lafayette Street, Broad Street, and Stratford Avenue

Road Crossings / Major Utility Crossings[3]

- Myrtle Avenue, Warren Street, Lafayette Street, Broad Street, Interstate 95, Stratford Avenue

[1] Zoning Designations along the Proposed Route are included on the UI 115-kV Railroad Project 100-scale maps, also see Attachment V2.1 Overview Maps and Legends for Zoning District Key
[2] "Reconductor 115-kV Components" typically means removal of existing 115-kV conductor cables, insulators, and hardware from the existing structure and replacement with new 115-kV conductors, insulators, and hardware installed on the existing structure in accordance with project requirements
[3] UI would coordinate with other underground and overhead utility companies, municipalities, CT DOT and Metro North Railroad regarding the location of utility and transportation facilities





Map Legend

- Proposed Single Circuit Transmission Line Structure
- Proposed Double Circuit Transmission Line Structure
- New Pequonnock Structure
- Existing Structure to be Reconductored
- Substation
- Existing UI Steel Pole To Be Removed
- Existing UI Lattice Tower To Be Removed
- Existing Bonnet To Be Removed
- Proposed Centerline of Rebuilt 115-kV Line
- Existing CTDOT Corridor Boundary
- Proposed UI Permanent Easement
- National or State Historic Resource Area
- Community Facility
- Open Space Recreation Area
- Train Station
- Historic (NR) Resource
- Historic (SR) Resource
- Archaeological Location
- UI-Owned Property
- Parcel Boundary
- FEMA Floodway
- FEMA 100-Year Floodplain
- 10ft Contour
- Field Delineated Wetland
- Delineated Watercourse
- Delineated Tidal Watercourse
- CT DEEP Coastal Area
- Natural Diversity Database Area (NDDB)

9 of 29	Fairfield	Transmission Line Structures P688S through P691S	Remove Existing Bonnets and 115-kV Components on Catenary Structures on 687S, 687AS, 688S through 691S; Remove 115-kV Components and X-braced 3 Pole Structure west of Catenary Structure 687S
10 of 29	Fairfield	Transmission Line Structures P692S, P693S, P695S, P696S	Remove Existing Bonnets and 115-kV Components on Catenary Structures on 692S through 696S
11 of 29	Fairfield	Transmission Line Structures P698S through P701S	Remove Existing Bonnets and 115-kV Components on Catenary Structures on 697S, 697AS, 698S, 699S through 701S
12 of 29	Fairfield	Transmission Line Structures P703S through P706S	Remove Existing Bonnets and 115-kV Components on Catenary Structures on 702S, 703S, 703AS, 704S through 706S
13 of 29	Fairfield	Transmission Line Structures P707S through P710S, P710AS, P711AS	Remove Existing Bonnets and 115-kV Components on Catenary Structures on 706AS, 707S through 710S, 710AS, 711S, 711AS
14 of 29	Fairfield	Transmission Line Structures P712S, P713S, P713WS, P714ES, P716S	Remove Existing Bonnets and 115-kV Components on Catenary Structures on 712S through 716S Remove Existing 115-kV Components and Lattice Tower AC1
15 of 29	Fairfield/Bridgeport	Ash Creek Substation Interconnection Replacement; Transmission Line Structures P713WS-1, P714ES-1, P713WS-2, P714ES-2	Remove Existing 115-kV Components and Lattice Towers AC2, and AC3
16 of 29	Fairfield	Transmission Line Structures P719S, P720S, P721ES	Remove Existing Bonnets and 115-kV Components on Catenary Structures on 719S, 720S, 720AS, 721S Remove Existing southern Bonnets and 115-kV Components on both sides of Black Rock Turnpike
17 of 29	Fairfield	Transmission Line Structures P723S through P726S	Remove Existing Bonnets and 115-kV Components on Catenary Structures on 722S through 726S
18 of 29	Fairfield/Bridgeport	Transmission Line Structures P727S, P728S, P730S	Remove Existing Bonnets and 115-kV Components on Catenary Structures on 727S through 731S
19 of 29	Bridgeport	Transmission Line Structures P733S, P736NN	Remove Existing Bonnets and 115-kV Components on Catenary Structures on 732S, 733S, 736S, 736AS Remove 115-kV Components and Top Portion of Pole 736N
20 of 29	Bridgeport	Transmission Line Structures P737N through P740N	Remove Existing Bonnets and 115-kV Components on Catenary Structures on 737N/737S, 738N, 738AS, 738BN, 739N/739S through 741N/741S
21 of 29	Bridgeport	Transmission Line Structures P742N through P744N, P745WN, P745N, P745S, RT5	Remove Existing Bonnets and 115-kV Components on Catenary Structures on 742N/742S through 746N/742S; Replace Overhead Fiber Optic Line on Existing Structure RT5
22 of 29	Bridgeport	Transmission Line Structures RT1 through RT4; Resco Substation Fiber Interconnection	Replace Overhead Fiber Optic Line on Existing Structures RT1 through RT4
23 of 29	Bridgeport	Transmission Line Structures P746S, P747S, P749S through P751S	Remove Existing Bonnets and 115-kV Components on Catenary Structures on 747S through 751S
24 of 29	Bridgeport	Transmission Line Structures P752S, P752N, P756S, P756N	Remove Existing Bonnets and 115-kV Components on Catenary Structures on 752N/752S, 753N, 756S
25 of 29	Bridgeport	Transmission Line Structures P757N, P758N, P759N, P760N, P758S, P760S	Remove Existing Bonnets and 115-kV Components on Catenary Structures on 757N/757S through 761N/761S
26 of 29	Bridgeport	Transmission Line Structures P762S, P765AS	Remove Existing Bonnets and 115-kV Components on Catenary Structures on 762N/762S through 765N/765S, 765AN/765AS, 765BN/765BS
27 of 29	Bridgeport	Temporary Transmission Line Structure TMP774N	No removals on this sheet. Removals are subject to change based on coordination with the New Pequonnock Substation Project (Separate UI Project, refer to CSC Docket No. 283)

1" = 100' SCALE MAPSHEET INDEX (continued) FAIRFIELD TO CONGRESS RAILROAD TRANSMISSION LINE 115-KV REBUILD PROJECT			
28 of 29	Bridgeport	Transmission Line Structures P775S	Remove Existing Bonnets and 115-kV Components on Catenary Structures on 777N/777S, 777AN/777AS, 778N/778S, 778AN/778AS; Remove 115-kV Components and Lattice Tower "North Tower" above the MNR railroad tracks; Remove 115-kV Components and Poles 775N, 775AS
29 of 29	Bridgeport	Transmission Line Structures P779S, P783S, P783N	Remove Existing Bonnets and 115-kV Components on Catenary Structures on 779N/779S, 779AN/779AS, 780N/708S through 783N/783S

[1] Typically, removal of the existing bonnets, hardware, conductors, and shield wire will be completed where proposed work indicates "Remove Existing Bonnets and Existing 115-kV Components". Existing bonnets on catenary structures will remain in place where proposed work is specified as "Remove 115-kV Components". Typically, shield wire for MNR facilities will be re-established on existing catenary structures to maintain shield wire protection and clearances to MNR signal wires. Refer to Volume 2, Attachment V2.5, Plan and Profile Drawings, for installation requirements and details.

[2] Wetlands and watercourses shown on the aerial-based mapping were field delineated within the Project area, including the CT DOT corridor and adjacent areas. These resources may extend further beyond the proposed Project limits. Publicly available Geographic Information System (GIS) datasets were utilized to depict resources outside of the proposed Project area as shown in Attachments V2.3 and V2.4.

[3] The initial structure spotting (original engineering design basis) commenced with the assumption that new double and/or single-circuit monopoles would be offset from each existing catenary structure. The poles were assigned numbers (e.g., P692S) that corresponded to the nearest catenary structure. As work on the Project design proceeded, proposed poles were shifted or eliminated to account for site-specific constraints (e.g., longer than originally planned span lengths to avoid or minimize poles in sidewalks). As a result, 31 of the originally planned monopoles have been eliminated. Because the poles were not re-numbered after these design changes, there are certain gaps in the structure numbers identified on the Volume 2 maps. The numbers of the structures that were eliminated from the Project design are: 653, 658, 660, 662, 670, 672, 674, 680, 683, 687, 694, 697, 702, 705, 707, 716, 722, 729, – all in Fairfield; and 731, 732, 741, 747, 761, 763, 764, 776, 777, 778, 780, 781, 782 – all in Bridgeport.

THIS PAGE LEFT BLANK INTENTIONALLY

Attachment V2.5

PLAN AND PROFILE DRAWINGS:

FAIRFIELD TO CONGRESS RAILROAD TRANSMISSION LINE 115-kV REBUILD PROJECT

THIS PAGE LEFT BLANK INTENTIONALLY

INTRODUCTION

This attachment contains Plan and Profile Drawings prepared as part of the engineering design of the Fairfield to Congress Transmission Line 115-kV Rebuild Project (Project) as proposed by UI. The Plan and Profile Drawings contained in this Attachment depict the locations of the proposed structures in relation to the CT DOT corridor and the existing railroad infrastructure along with a profile of the proposed structures, conductors, and wires in relation to existing ground surface. As listed below, the Plan and Profile Drawings are organized into seven segments, proceeding from West-to-east along the Project route:

- Sasco Creek in the Town of Fairfield (interconnection with Eversource) to UI's Ash Creek Substation in the City of Bridgeport (3.96 miles)
- UI's Ash Creek Substation in the City of Bridgeport to P737S in the City of Bridgeport (1.59 miles)
- TP735N in the City of Bridgeport to P737N in the City of Bridgeport (0.10 miles)
- P737N in the City of Bridgeport to Resco Tap in the City of Bridgeport (0.56 miles)
- P745S in the City of Bridgeport to UI's Resco Substation in the City of Bridgeport (0.36 miles)
- P745S in the City of Bridgeport to New Pequonnock Substation in the City of Bridgeport (interconnection at P765BS of UI's New Pequonnock Substation being constructed under a separate UI project, CSC Docket No. 483) (1.12 miles)
- New Pequonnock Substation in the City of Bridgeport (interconnection at P774S of UI's New Pequonnock Substation being constructed under a separate UI project, CSC Docket No. 483) to Congress Street Substation in the City of Bridgeport (0.52 miles)

Notes:

1. Gray shading on Plan and Profile Drawings denotes critical energy infrastructure information that has been redacted.
2. These Plan and Profile Drawings reflect the Project's 50% engineering design (April 2022).
3. These Plan and Profile Drawings cover the approximately 7.6 miles of the CT DOT railroad corridor between catenary structures B648S and Congress Street Substation and the 0.23-mile connection from the CT DOT railroad corridor to Ash Creek Substation. The 0.3 mile segment of UI's existing 115-kV lines that will be removed from the railroad catenary structures and rebuilt along the CT DOT corridor between the Old and New Pequonnock Substations are part of UI's separate Pequonnock Substation Rebuild Project.

The following legends are applicable the Plan and Profile Drawings contained in Attachment V2.5:
