RE: Docket No. 192B – Towantic Energy, LLC Motion to Reopen and modify the June 23, 1999 Certificate of Environmental Compatibility and Public Need Based on Changed Conditions Pursuant to Connecticut General Statutes 4-181a(b) for the Construction, Maintenance and Operation of a 785 MW Dual-Fuel Combined Cycle Electric Generating Facility Located North of the Prokop Road and Towantic Hill Road Intersection in the Town of Oxford, CT – Naugatuck River Revival Group Filing an Exhibit of a DVD called “Meet The Naugatuck River” and the filing of its transcript.

Dear Chairman Stein:

I Kevin Zak wish to enter the enclosed DVD and transcript as an Exhibit.

The DVD contains video and statements regarding the fragile ecosystem of the Naugatuck River and the economic impact it has on the 14 towns that are contained within the Naugatuck River Valley.

All video has been taken in and along the Naugatuck River from Torrington to Derby and the Naugatuck State Forest.

All wildlife was filmed along the Naugatuck River and Naugatuck State Forest.

All video can be substantiated by original film clips and metadata to its authenticity provided upon request.

Respectfully,

A handwritten signature in black ink that reads "Kevin R. Zak".

Kevin R. Zak
President
Naugatuck River Revival Group

Exhibit 1: Transcript of the Naugatuck River Revival Group's video
"Meet the Naugatuck River"

- "When we try to pick out anything by itself, we find it hitched to everything else in the universe." ~ John Muir
- Meet the Naugatuck River.
- Connecticut's largest in-state river.
- Flowing 40 miles from Torrington to Derby.

- It is the Housatonic River's largest tributary.

- Like the Cuyahoga River in Ohio, she caught fire.

- This is a window into her world thru the lens of the Naugatuck River Revival Group.

Jack Walsh 00:59-02:07:13
President, United Way

This is a fantastic moment, because if you look behind me there is a river that for over 50 years disappeared. But you know if you want the history of America, I mean the history of America all up and down that river, the good the bad and the ugly. Right now we're in the middle of a renaissance, our river is back. And you know all the uses it had before for transportation, industry, world trade. We're all the beneficiaries of what it's (going) to be used for now and that's recreation. 50 years ago if you were here this was underwater and totally polluted. Now it's beautiful, it's coming back and I just want to take a second to recognize what all the people have done all the way up to Torrington I mean to reclaim this river.

Well you know what, we are all Americans and this is just another step, this is one of the greatest places in the United States even if we didn't have this for anything else to tell the story of this river. This has got to be as good an environmental cleanup story as there is in the entire country. We need to shout that out, let people know that we did that here.

Bill Purcell 02:19:09-03:04:19
President, Greater Valley Chamber of Commerce

Just two short years ago this Naugatuck River Greenway was designated by the President and the Secretary of the Interior as one of the 101 projects nationwide under what's called The Americas Great Outdoor Initiative, this is a big deal, it's a wonderful Achievement.

Wonderful valley of ours, these two communities and all the communities that share access to this marvelous river within and of itself is really a national success story.

Rosa Deluaro 03:06:20-03:38:18
U.S. Representative, 3rd District

I think with its long storied history, breathtaking natural beauty. Its unique design allows small minnows and dates to swim upstream, something that many fishways do not do and many turtles use the fishway.

What will it do? It's going to draw people back to the river. It's (going to) expose them to fish, to birds, to turtles. All sorts of nature.

The restoration has been a team effort. A testament to what is possible when a community understands the value of its own natural resources and embraces the power of conservation and by restoring this fish passage and preserving a fragile ecosystem we fulfill our obligation to our children, our children's children and the generations that follow.

Elizabeth Esty 4:32
U.S. Representative, 5th District

The transformative vision for the greenway and that has been linked to new with incredibly important initiatives which the T.I.G.E.R. grant represents: About transforming this community. Reconnecting it to the life blood of a cleaned up river.

Neil O'Leary 4:58
Mayor of Waterbury

I realize that this could be the single most important and transformational moment that I will have here as Mayor.

Chris Murphy 5:26:01
U.S. Senator

...rail, bus line and natural resources as well.
...and so that's what this grant is really about.

What are we going to do here? 1st with 14 million dollars we are going to be able to extend the access to the river. So we'll open a pathway to the river to be able to move forward some complementary funding from state and city government – the greenway projects.

Peter Rogoff 06:17:08
Under Secretary for Policy
U.S. Department of Transportation

I am here on behalf of President Obama and Secretary Foxx to formally announce the \$14.4 million dollar grant for the (W.A.T.E.R) Waterbury Active Transportation and Economic Resurgence Project. As the Mayor pointed out this project received a T.I.G.E.R grant. Tiger stands for Transportation Investment Generating Economic Recovery. And that is precisely what this project is going to do. It is going to reconnect the cities, communities to a cleaned up Naugatuck River.

Rob Klee 7:21:05
Commissioner CT DEEP

With its beautiful stonewalls, its sidewalks and steps to the river visitors will enjoy a park and a stunning landscape that includes interpretative signs of industrial history and the natural history of the river.

John Bullard 7:36.22
Northeast Regional Administrator, NOAA

...This is where we make fish. Ah, what this dam (bypass) does allowing ah, ah Shad river herring and other species to have access to 32 miles of river, is where we make fish. There is a connection and people are starting to appreciate more of the role of (forage) fish in the marine eco-system. Water connects everything as President John Kennedy said.

Jack Walsh 09:42:17
President, United Way

If you look behind me there's a river there.

Richard Blumenthal 09:46:15
U.S. Senator

It's 12 other towns. And if you look at the map which was prepared very helpfully by Healthy Valley. What you see is those towns brought together. Now we know the valley is a community and this Heritage Area also means jobs, tourism, recreation, more services provided to enable more people to come here. This designation is rare and profoundly important.

The valley is more than the sum of those 14 towns. It is something priceless and irreplaceable. The valley is a special place with a remarkable history and a profoundly exciting and inspiring future. As always we look to the past but we look even more to the future. What it will mean in the benefits to people who live here and now.

Richard Blumenthal 10:49:20
U.S. Senator

It's a quality of life measure. This site will add to countless hours of pleasure to the people of Seymour and people of Connecticut who will travel here. In the compact that we make with one generation to the next that we're going to leave this land better than we found it.

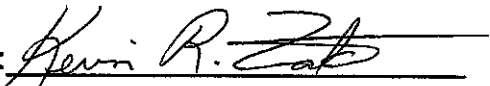

Steve Gephard 11:25:03
Supervising Fisheries Biologist, CT DEEP

And all sorts of nature in this recovering river. This park and bypass channel will help people understand what we have lost, what we are bringing back, why it is important and that we (have) all need to work together to protect these natural resources. Thank you.
