RE: **DOCKET NO. 442** – New Cingular Wireless PCS, LLC application for a Certificate of Environmental Compatibility and Public Need for the construction, maintenance, and operation of a telecommunications facility located at 284 New Canaan Avenue, Norwalk, Connecticut.

Dear Attorney Baldwin:

The Connecticut Siting Council (Council) requests your responses to the enclosed questions no later than February 20, 2014.

1. At the proceeding on December 19, 2013, Cellco stated the unipole diameter needed to be a minimum of 42 inches to accommodate Cellco's antennas. It was further explained that additional space would be needed to accommodate remote radio heads behind the antennas. What unipole diameter would be necessary to accommodate this equipment?
2. Can the radio heads be mounted on a collar immediately below the antennas so that the 42 inch unipole diameter can be maintained? If so, describe the effectiveness of the units.
3. How is service compromised if radio heads are not included at this site?

Please forward an original and 15 copies to this office, and a .pdf copy via e-mail. Copies of your responses shall be provided to all parties and intervenors listed on the service list, which can be found on the Council's pending proceedings website.

Yours very truly,

Melanie Bachman
Acting Executive Director
