**RE: Docket No. 466: Frost Bridge to Campville 115-kV Project
Decision and Order Condition #8 – Second Year Operating Report**

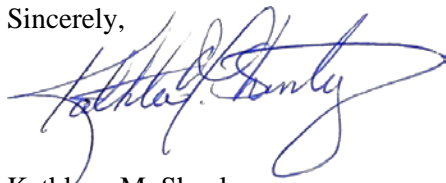

Dear Melanie Bachman:

On April 16, 2018, in Docket 466, the Connecticut Siting Council (“Council”) granted a Certificate of Environmental Compatibility and Public Need for The Connecticut Light and Power Company doing business as Eversource Energy (“Eversource”) of the Frost Bridge to Campville 115-kV Project (Modifications to the Frost Bridge and Campville Substation, and New 115-kV Transmission Line and Related Transmission Line Modifications.) Condition #8 of the Council’s Decision & Order directed that Eversource “provide the Council an operating report within three months after the conclusion of the first year of operation of all facilities herein, and annually thereafter for a period of three years, with information relative to the condition, safety, reliability and operation of the transmission systems”.

In compliance with Condition #8, Eversource herewith submits that the overall operating condition and safety of the new 115-kV line extending from Eversource’ Frost Bridge Substation to Campville Substation and related substation modifications has been excellent. There have been no forced outages since the line went into service.

Should you or other Council members have any questions regarding this submission, please do not hesitate to contact me via e-mail at kathleen.shanley@eversource.com or telephone at (860) 728-4527.

Sincerely,

Kathleen M. Shanley
