

**The Connecticut Light and Power Company
Docket No. F-2013/2014**

**Late Filed Exhibit HD-01
Dated: 06/18/2013
Q-LF-001
Page 1 of 1**

**Witness: Vinay K. Ananthachar
Request from: Connecticut Siting Council**

Question:

Will certain funding sources for C&LM programs continue to be used in 2013 and beyond (CEEFF; RGGI and RECs). See pgs. 3 and 19 of our FLR.

Response:

In 2013, the electric energy efficiency programs utilize four sources of funding. These sources of revenue are the 3 mil electric charge, ISO New England's ("ISO-NE") Forward Capacity Market, Class III Renewable Energy Credits, and Regional Greenhouse Gas Initiative ("RGGI"). In addition to energy efficiency programs, Connecticut Light and Power's ("CL&P") Demand Response Program is funded solely through revenues from the ISO-NE Forward Capacity Market. House Bill 6360, which passed in June, 2013 allows funding of electric energy efficiency to increase from 3 mills up to a total of 6 mills, with PURA approval. Beyond 2013, Class III Renewable Energy Credits will not be used as a funding source as a result of House Bill 6360. It is anticipated that the remaining funding sources (absent Class III) will continue to be used in a similar fashion including fully funding the Demand Response program through the ISO Forward Capacity Market.
