RE: **DOCKET NO. F-2012/2013** – Connecticut Siting Council Review of the Ten-Year Forecast of Connecticut Electric Loads and Resources

Dear Attorney McDermott:

The Connecticut Siting Council (Council) requests your responses to the enclosed questions no later than May 11, 2012. To help expedite the Council's review, please file individual responses as soon as they are available.

Please forward an original and 15 copies to this office, as well as one electronic Adobe .pdf version via email. In accordance with the State Solid Waste Management Plan, the Council is requesting that all filings be submitted on recyclable paper, primarily regular weight white office paper. Please avoid using heavy stock paper, colored paper, and metal or plastic binders and separators. A list of parties and intervenors is enclosed. Fewer copies of bulk material may be provided as appropriate.

Yours very truly,

Linda Roberts
Executive Director

LR/MP

c: Council Members
Parties and Intervenors

Docket F-2012/2013
UI Pre-Hearing Interrogatories
Set One

1. Provide the predicted (not actual) 50/50 forecast loads for 2002 through 2011 from The United Illuminating Company's (UI) 2002 forecast report.
2. Explain the methodology of how historical actual peak load data are converted to weather-normalized historical peak load data.
3. Provide a break-down of the projected number of megawatts (MW) of load reduction for UI's territory due to conservation, load response/load management, and distributed generation (if applicable) for each year from 2012 through 2021. If possible, also include a similar estimated break-down by megawatt-hours or gigawatt-hours.
4. Provide the basic underlying assumptions associated with the distributed generation (DG) included in the 2012 UI Forecast, including but not limited to the DG projects approved, number of megawatts of each DG project, the number of units expected to go into service or the assumed probability that they will go into service, etc.
5. Does UI's 2012 Forecast include any additions due to possible loads and/or electrical energy consumption from electric vehicles? If yes, provide any assumptions made regarding electric vehicles.
6. Is UI's Extreme Weather forecast in Exhibit 1 essentially the same as the Extreme Weather Forecast provided in Exhibit 2, except for the exclusion of conservation and load management (C&LM), DG, and new larger customer planned loads in Exhibit 2? Are these both 90/10 forecasts?
7. In Exhibit 3 of the UI's 2012 forecast report, which town(s) would the Naugatuck Valley 115-kV Reliability Improvement Project be located in?
