Re: **EM-VER-004-150708 – Cellco Partnership d/b/a Verizon Wireless
324 Montevideo Road, Avon, Connecticut**

Dear Ms. Bachman:

On July 27, 2015, the Siting Council acknowledged receipt of Cellco's notice of intent to modify its existing telecommunications facility at 324 Montevideo Road in Avon, Connecticut. The modifications involved the replacement of antennas and the installation of remote radio heads.

As a condition of the acknowledgement, Cellco was required to provide the Council with a letter stating that it had complied with the recommendations made in the structural report attached to that filing. Attached is a Professional Engineer's Tower Modification Certification letter verifying that the installation was completed according to that structural report.

If you have any questions please do not hesitate to contact me.

Sincerely,

Kenneth C. Baldwin

Re: Tower Modification Certification

Project: Verizon Talcott Mountain
324 Montevideo Road, Avon, CT

Tower Owner: Talcott Mountain Science Center
324 Montevideo Road, Avon, CT

Engineer: Centek Engineering, Inc.
63-2 North Branford Road, Branford, CT

Centek Project No.: 16003.33

CSC Exempt Mod Reference No.: EM-VER-004-150708

Dear Mr. Parks,

We are providing this "Tower Modification Certification" with regard to the structural components at the above referenced project.

The following are the basis for substantiating compliance with the Structural Analysis prepared by Centek Engineering, Inc. (Centek Project No. 15001.047):

- Review of the Centek Engineering, Inc. Structural Analysis dated 06/02/2015.
- Field observations by Centek Engineering personnel on 10/24/16 of the completed upgrade which determined all modifications were installed in general compliance with the recommendations of the structural analysis report prepared by Centek Engineering, Inc. dated 06/02/15

The equipment upgrade structural analysis prepared by Centek Engineering, Inc. demonstrates the tower will not exceed 100 percent of the post construction structural rating. The work under this Contract has been reviewed and found, to the Engineer's best knowledge, information and belief, to be completed in general compliance with the documents referenced above. This certification is not a review of the adequacy or effectiveness of the modification solution.

Sincerely,

Carlo F. Centore, PE
Principal - Structural
