Re: **EM--VER-060-150326 – Cellco Partnership d/b/a Verizon Wireless
331 Killingworth Road (Route 80), Guilford, Connecticut**

Dear Ms. Bachman:

On April 24, 2015, the Siting Council acknowledged receipt of Cellco's notice of intent to modify its existing telecommunications facility at 331 Killingworth Road in Guilford, Connecticut. The modifications involved the replacement of antennas and the installation of remote radio heads.

As a condition of the acknowledgement, Cellco was required to provide the Council with a letter stating that it had complied with the recommendations made in the structural report attached to that filing. Attached is a Professional Engineer's Tower Modification Certification letter verifying that the installation was completed according to that structural report.

If you have any questions please do not hesitate to contact me.

Sincerely,

A handwritten signature in black ink, appearing to read "Kenneth C. Baldwin".

Kenneth C. Baldwin

RE: Tower Modification Certification

Project: Verizon Guilford North CT
331 Killington North Rd. (Rt. 80) Guilford, CT 06417

Tower Owner: SBA Engineering & Environmental

Engineer: FDH Engineering

APT Project No.: CT141AWS9830 Guilford North

CSC Exempt Mod Reference No.: EM-VER-060-150326

Dear Mr. Parks,

All-Points Technology Corporation, P.C. (APT) is providing this 'Tower Modification Certification' with regard to the structural components at the above referenced project.

The following are the basis for substantiating compliance with the tower modification documents prepared by On-Air Engineering, LLC:

- Review of FDH Engineering's Structural Analysis (FDH project #15BEQG1400) dated 2/27/15;
- Review of On-Air Engineering, LLC's AWS Site Modification drawing dated 6/10/16;
- Review of FDH Engineering's Modification Inspection report (FDH project #15BEQG1400) dated 5/19/15; and
- Field Observations by APT personnel on 5/4/17 of the completed modifications which determined all modifications were installed in general compliance with the recommendations of the aforementioned structural analysis.

The structural analysis prepared by FDH Engineering demonstrates the tower will not exceed 100 percent of the post construction structural rating. The work under this Contract has been reviewed and found, to the Engineer's best knowledge, information and belief, to be completed in general compliance with the documents referenced above. This certification is not a review of the adequacy or effectiveness of the modification/reinforcement solution.

Sincerely,
All-Points Technology Corporation, P.C.

Robert E. Adair, P.E.
Principal
