RE: **TS-SPRINT-064-000925** - Sprint Spectrum L.P. (Sprint PCS) request for an order to approve tower sharing at an existing telecommunications tower located at 99 Meadow Street, Hartford, Connecticut. Revised Site Plan.

Dear Attorney Cashin:

At a public meeting held Tuesday, November 14, 2000, the Connecticut Siting Council (Council) approved the relocation of telecommunications equipment at this site as described in your letter of November 2, 2000.

The proposed site plan change is to be implemented as specified in your letter dated November 2, 2000.

Thank you for your attention and cooperation.

Very truly yours,

Mortimer A. Gelston

Re: Sprint Spectrum, LP Tower Sharing Proposal for the Spectrasite telecommunications facility located at 99 Meadow Street, Hartford, Connecticut.

Dear Mr. Rinebold:

On October 2, 2000 the Connecticut Siting Council ("Council") approved the Tower Sharing Proposal of Sprint Spectrum LP to ("Sprint") to install antennas and related equipment at the above referenced existing Spectrasite facility pursuant to C.G.S. §16-50aa.

At that time, Sprint submitted a site plan that reflected its lease area and base station equipment in the northwest area of the compound, near the entry gate. Since the date of the Council's approval of this application Spectrasite has requested that Sprint move its lease area and base station equipment into the southwest corner of the compound.

I have enclosed a copy of the proposed revised plan. The lease area and base station equipment remain the same size as previously approved, they will simply shift approximately 25' to the rear of the compound and away from the entry gate.

Please advise if this minor modification can be accomplished administratively, or if it will be added to the agenda of the next Council meeting. If it will be presented to the Council I will provide you with twenty (20) copies and one (1) original immediately.

Sincerely,

Julie M. Cashin.

RE: **TS-SPRINT-064-000925** - Sprint Spectrum L.P. (Sprint PCS) request for an order to approve tower sharing at an existing telecommunications tower located at 99 Meadow Street, Hartford, Connecticut.

Dear Attorney Cashin:

At a public meeting held Monday, October 2, 2000, the Connecticut Siting Council (Council) ruled that the shared use of this existing tower site is technically, legally, environmentally, and economically feasible and meets public safety concerns, and therefore, in compliance with General Statutes § 16-50aa, the Council has ordered the shared use of this facility to avoid the unnecessary proliferation of tower structures. This facility has also been carefully modeled to ensure that radio frequency emissions are conservatively below State and federal standards applicable to the frequencies now used on this tower.

This decision is under the exclusive jurisdiction of the Council. Any additional change to this facility may require an explicit request to this agency pursuant to General Statutes § 16-50aa or notice pursuant to Regulations of Connecticut State Agencies Section 16-50j-73, as applicable. Such request or notice shall include all relevant information regarding the proposed change with cumulative worst-case modeling of radio frequency exposure at the closest point uncontrolled access to the tower base, consistent with Federal Communications Commission, Office of Engineering and Technology, Bulletin 65. Any deviation from this format may result in the Council implementing enforcement proceedings pursuant to General Statutes § 16-50u including, without limitation, imposition of expenses resulting from such failure and of civil penalties in an amount not less than one thousand dollars per day for each day of construction or operation in material violation.

This decision applies only to this request for tower sharing and is not applicable to any other request or construction.

The proposed shared use is to be implemented as specified in your letter dated September 25, 2000.

Thank you for your attention and cooperation.

Very truly yours,

Mortimer A. Gelston
Chairman

Dear Chairman Gelston:

On behalf of the applicant, Sprint Spectrum L.P. ("Sprint PCS"), I am pleased to submit this application for a Tower Sharing Proposal for the Spectrasite telecommunications facility located at 99 Meadow Street, Hartford, Connecticut.

Enclosed are one (1) original and twenty (20) copies of this Tower Sharing Proposal requesting shared use of this facility. A check in the amount of \$500.00 to cover the filing fee is also enclosed. The City of Hartford has been sent notice of this Tower Sharing Proposal by certified mail.

Sincerely,

JULIE M. CASHIN

Request of Sprint PCS requesting approval for the shared use of the existing telecommunications facility located at 99 Meadow Street, Hartford, Connecticut.

Dated: September 25, 2000 in Milford, CT

Introduction

Sprint Spectrum, L.P. ("Sprint PCS") seeks to share a telecommunications tower located at 99 Meadow Street, Hartford, Connecticut ("Facility") and owned by Spectrasite Communications, Inc. ("Spectrasite") of 100 Regency Forest, Cary, North Carolina. Sprint PCS hereby requests a finding from the Connecticut Siting Council ("Council") that the shared use of this Facility is technically, legally, environmentally and economically feasible and meets public safety concerns in accordance with Section 16-50aa of the Connecticut General Statutes ("C.G.S."), and an order approving the proposed shared use of the Facility.

Background

The subject site, owned by Spectrasite, is located at 99 Meadow Street, Hartford, Connecticut. (See location map attached as Exhibit A.) The site currently supports a 150 foot steel self-supporting monopole ("Existing Tower") and appurtenant equipment buildings.

Tower Sharing Proposal

The purpose of this Tower Sharing Proposal is to utilize an existing facility rather than to construct a new tower in the Town of Hartford. This Facility is the most viable co-location opportunity for Sprint PCS in the area. Sprint PCS has entered into a lease agreement with Spectrasite for placement of antennas and associated equipment.

A. Existing Tower as a "Facility"

For the purposes of this Tower Sharing Proposal and pursuant to Section 16-50aa of the Connecticut General Statutes, "... Facility means a tower owned or operated for a commercial or public purpose by a person, firm, corporation or a public agency which uses such tower for transmitting or receiving signals in the electromagnetic spectrum pursuant to a Federal Communications Commission license." The Existing Tower was built to support multiple carriers. Sprint PCS will be the second carrier to locate on the Existing Tower.

B. Project Description

Sprint PCS is licensed by the Federal Communications Commission ("FCC") to provide PCS wireless service throughout the State of Connecticut, including the Plymouth area.

Sprint proposes to install as many as nine (9) panel antennas on the Existing Tower at an antenna centerline of 98 feet and a small global positioning system (GPS) antenna at an antenna height of 20 feet AGL. (See Tower Elevation attached hereto as Exhibit A). A low profile platform with PCS antennas mounted on it will be attached to the Existing Tower with an antenna rad center of 98 feet. The base station equipment associated with the antennas would be located near the base of the Existing Tower.

C. Compliance with C.G.S. § 16-50aa

Pursuant to C.G.S. § 16-50aa, “The General Assembly finds that the sharing of towers for fair consideration whenever technically, legally, environmentally and economically feasible, and whenever such sharing meets public safety concerns, will avoid the unnecessary proliferation of towers and is in the public interest.” A discussion of how the proposed co-location by Sprint PCS will be in conformance with C.G.S. § 16-50aa is outlined below:

1. Technical Analysis

Sprint PCS has reviewed the technical parameters of the existing communications facilities and determined it is extremely unlikely that the proposed Sprint PCS antennas will result in interference, due to the sectorized positioning of the antenna, vertical separation, and low power. Sprint PCS does not intend to cause interference, and will correct any interference in the unlikely event that it does occur.

The Existing Tower was designed to accommodate multiple carriers. An engineering letter dated September 5, 2000 the structural capability of the Existing Tower to accommodate the proposed Sprint installation is attached hereto as Exhibit B. As indicated in the letter, the Existing Tower is capable of supporting the installation proposed by Sprint PCS.

2. Legal Feasibility

Sprint PCS has entered into a lease agreement with Spectrasite for the purposes of locating antenna on the Existing Tower and associated equipment adjacent to the base of the Existing Tower. The Council has the authority pursuant to C.G.S. §16-50aa to issue orders approving the proposed shared use of the Facility by Sprint PCS.

3. *Environmental Feasibility*

The proposed shared use would have a minimal environmental effect for the following reasons:

- This proposed shared use will not increase the height of the Existing Tower.
- This proposed shared use will not expand the compound area beyond that already approved by the City of Hartford.
- The proposed installations by Sprint PCS will have an insignificant visual impact and will not cause any significant change or alteration in the physical or environmental characteristics of the Site.
- This proposed shared use will not increase noise levels at the Facility site boundary by six decibels.
- This proposed shared use, including operation of the Sprint PCS antennas, will not increase the total radio frequency electromagnetic radiation of the power density measured at the site to or above the standard adopted by the Federal Communications Commission. The engineering exhibit attached as Exhibit C evidences the worst-case power density for the proposed installation, calculated at the base of the Existing Tower, is $.251071\text{mW/cm}^2$ and the MPE is 25.11 %, which results in a total percentage of maximum permissible exposure of 29.13 %, based on the NCRP standard. These calculations show that Sprint PCS will be well below the FCC-mandated limits in all locations around the Existing Tower, even with extremely conservative assumptions.

- The proposed installations by Sprint PCS will not require any water or sanitary facilities, or generate air emissions or discharges to water bodies. After construction is complete, the proposed Sprint PCS installation will not generate any traffic other than periodic maintenance visits.

The proposed installation would have a de minimis visual impact, and would not cause any significant change or alteration in the physical or environmental characteristics of the existing facility. The proposed shared use of the Existing Tower by Sprint PCS is thus environmentally feasible.

4. *Economic Feasibility*

As previously mentioned, Sprint PCS and Spectrasite have agreed upon acceptable terms and entered into a lease agreement with one another. The proposed shared use of the Facility is therefore economically feasible.

5. *Public Safety Concerns*

There are no known public safety concerns associated with this Tower Sharing Proposal. As stated above, the Existing Tower will be structurally capable of supporting the Sprint PCS antennas. Sprint PCS anticipates that the provision of new or improved phone service made possible by the shared use of the Facility will enhance the safety and welfare of area residents.

Conclusions

The above Tower Sharing Proposal satisfies all of the criteria set forth in Section 16-50aa of the Connecticut General Statutes, including technical, legal, environmental and economic feasibility, and meets public safety concerns. Sprint PCS respectfully requests that the Council issue an order approving the proposed shared use.

<i>Eric Labon</i>	<i>9/11/00</i>
Name	Date

Dear Mr. Hardy:

I am writing this letter at your request to state the structural integrity of the monopole for Nextel at CT076B, South 99 Meadow Street, Hartford, CT. (FWT Design No. M98-1877-A and Job No. 21719001)

FWT has analyzed the pole to current design requirements of EIA/TIA 222-F using basic wind speed 85 mph without ice and 73 mph with 1/2" radial ice with the following antenna loading.

1st Carrier at top

- 1 - 3/4"Ø lightning rod @ top,
- 12 - Swedcom ALP-9212-N
- 1 - 12-Ft Low profile sectored mount w/ service grating.

2nd Carrier at 137' (centerline)

- 12 - Swedcom ALP-9212-N
- 1 - 12-Ft Low profile sectored mount w/ service grating.

3rd Sprint Carrier at @ 98'(centerline)

- 9 - DB980H65T4EM
- 3 - 6-Ft band-on T-arms.

FWT finds the pole and its foundation is adequately designed to withstand the loading applied as stated above.

If you need any additional information, please feel free to call me at 1-800-433-1816 ext. 5050.

Sincerely,

Ta-Wen Lee, Ph.D., P.E.
Engineering Manager
