Re: **EM-VER-134-150410 – Cellco Partnership d/b/a Verizon Wireless
46 Brendan Street, Stafford, Connecticut**

Dear Ms. Bachman:

On May 6, 2015, the Siting Council acknowledged receipt of Cellco's notice of intent to modify its telecommunications facility at 46 Brendan Street in Stafford, Connecticut. The modifications involved the replacement of its antennas, the installation of remote radio heads and the installation of a new fiber optic antenna cable.

As a condition of the acknowledgement, Cellco was required to provide the Council with a letter stating that the recommendations made in the structural report were complied with. Attached is a Professional Engineer's Tower Modification Certification letter verifying that the installation was completed according to the structural report.

If you have any questions please do not hesitate to contact me.

Sincerely,

Kenneth C. Baldwin

Re: Tower Modification Certification

Project: Verizon Stafford
46 Brandon St, Stafford, CT

Tower Owner: Crown Castle
3530 Torington way, Suite 300
Charlotte, NC 28277

Engineer: Paul J Ford and company
250 East Broad Street, Suite 600
Columbus, Ohio 43215

Centek Project No.: 15003.029

CSC Exempt Mod Reference No.: EM-VER-134-150410

Dear Mr. Parks,

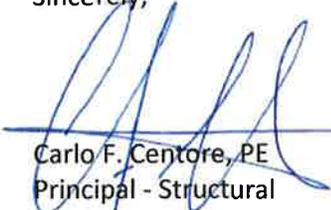

We are providing this "Tower Modification Certification" with regard to the structural components at the above referenced project.

The following are the basis for substantiating compliance with the tower modification documents prepared by Paul J. Ford and Company (PJF Project Number: 37515-0530.002.7700):

- Review of the Paul J. Ford and Company Structural Analysis dated 03/03/2015.
- Review of the Paul J. Ford and Company Monopole Reinforcement and Retro Fit drawings dated 03/03/15.
- Review of FDH's Modification Inspection Report dated 06/02/15.
- Field observations by Centek Engineering personnel on 05/12/16 of the completed modifications which determined all modifications were installed in general compliance with the aforementioned documents

The modification design prepared by Paul J. Ford and Company demonstrates the tower will not exceed 100 percent of the post construction structural rating. The work under this Contract has been reviewed and found, to the Engineer's best knowledge, information and belief, to be completed in general compliance with the documents referenced above. This certification is not a review of the adequacy or effectiveness of the modification/reinforcement solution.

Sincerely,

Carlo F. Centore, PE
Principal - Structural
