Re: **EM-VER-157-140721 – Cellco Partnership d/b/a Verizon Wireless
56 Norfield Road, Weston, Connecticut**

Dear Ms. Bachman:

On August 11, 2014, the Siting Council acknowledged receipt of Cellco's notice of intent to modify its telecommunications facility at 56 Norfield Road in Weston, Connecticut. The modifications involved the replacement of its antennas and installation of remote radio heads and fiber optic lines.

As a condition of the acknowledgement, Cellco was required to provide the Council with a letter stating that the recommendations made in the structural report were complied with. Attached is a Professional Engineer's Tower Modification Certification letter verifying that the installation was completed according to the structural report.

If you have any questions please do not hesitate to contact me.

Sincerely,

Kenneth C. Baldwin

Re: Tower Modification Certification

Project: Verizon Weston
56 Norfield Rd, Weston, CT

Tower Owner: Crown Castle USA
220 Lathrop Road, Candor, NY

Engineer: Paul J. Ford and Company
250 East Broad Street, Columbus, OH

Centek Project No.: 15003.037

CSC Exempt Mod Reference No.: EM-VER-157-140721

Dear Mr. Parks,

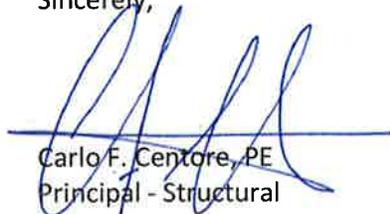

We are providing this "Tower Modification Certification" with regard to the structural components at the above referenced project.

The following are the basis for substantiating compliance with the tower modification documents prepared by Paul J. Ford and Company (PJF Project Number: 37513-0787 R4):

- Review of the Paul J. Ford and Company Structural Analysis dated 12/27/2013.
- Review of the Paul J. Ford and Company Modification Drawings S-1 thru S-8 dated 04/12/2013.
- Review of the Tower Engineering Professionals Modification Inspection Report dated 11/10/2014.
- Field observations by Centek Engineering personnel on 11/18/2015 of the completed modifications which determined all modifications were installed in general compliance with the recommendations of the structural analysis report prepared by Paul J. Ford and Company on 12/27/2013.

The modification design prepared by Paul J. Ford and Company demonstrates the tower will not exceed 100 percent of the post construction structural rating. The work under this Contract has been reviewed and found, to the Engineer's best knowledge, information and belief, to be completed in general compliance with the documents referenced above. This certification is not a review of the adequacy or effectiveness of the modification/reinforcement solution.

Sincerely,

Carlo F. Centore, PE
Principal - Structural
