Melanie Bachman, Esq.  
Executive Director  
Connecticut Siting Council  
Ten Franklin Square  
New Britain, CT 06051

Re: Sub-Petition No. 1293-SNS-01

Dear Ms. Bachman:

The Connecticut Light and Power Company doing business as Eversource Energy ("Eversource") is filing the attached Sub-Petition No.1293-SNS-01 with the Connecticut Siting Council ("Council"), regarding maintenance work within its transmission right-of-way in Stonington and North Stonington Connecticut. The work includes replacing 20 existing wooden transmission structures with new weathering steel transmission structures.

Eversource notified the officials of the municipalities of Stonington and North Stonington of Eversource's submission of the Sub-Petition and sent copies of the Sub-Petition to owners of directly abutting properties (see Proof of Notice).

Enclosed please find an original and 3 copies of this filing.

Please contact me at 860-728-4527 if you have any questions regarding the enclosed Sub-Petition.

Sincerely,

Enclosures

Sub-Petition  
CONNECTICUT SITING COUNCIL – PETITION NO. 1293  
TRANSMISSION FACILITY ASSET CONDITION  
MAINTENANCE IMPROVEMENTS TO COMPLY WITH  
THE UPDATED NATIONAL ELECTRIC SAFETY CODE  
CLEARANCE REQUIREMENTS

Town: Stonington and North Stonington

Sub-Petition: 1293-SNS-01

Project: 1465 Transmission Line Structure Replacement Project

Structure Locations: 20 Transmission Line Structures located in Stonington and North Stonington, Connecticut

I. Introduction:

In accordance with Condition 1 of the March 30, 2017 ruling by the Connecticut Siting Council (the "Council") (as set forth in the Council's March 31, 2017 letter) regarding Petition No. 1293, The Connecticut Light and Power Company doing business as Eversource Energy ("Eversource") submits this Sub-Petition.

II. Description of Transmission Work Activities:

Eversource's 1465 Transmission Line Structure Replacement Project (the "Project") is part of an ongoing maintenance program which evaluates the integrity of its utility structures and implements repair, upgrade or replacement in order to ensure the safe and reliable transmission of power to its customers. Due to their current condition, many structures require replacement on a portion of the 1465 Line in Stonington and North Stonington, between a location just east of Mystic Junction in Stonington and Shunock Substation in North Stonington. The 1465 Line, in its entirety, is a 115-kilovolt single-circuit line that extends from Mystic Substation in Mystic to Shunock Substation. Of the structures that will be replaced, 20 structures require a slight increase in structure height to comply with current clearance requirements. These 20 structures to be replaced are a mix of wood H-Frame and monopole structures.

Eversource plans to conduct transmission structure replacement work to remediate wood structure damage caused by structure age, weather, and woodpecker activity. The following work ("Work Activities") will be performed:

- Replace 20 existing wood structures with new weathering steel structures. Each replacement structure will be of the same design as its corresponding existing structure, though slightly taller (10 feet or less) than the existing structure. The replacement structures will be installed within 15 feet of the existing structure locations.

III. No Substantial Adverse Environmental Effect:

Eversource respectfully submits that the proposed modifications would have no "substantial adverse environmental effect" pursuant to Conn. Gen. Stat. § 16-50k, based on the following factors:

- a) All Work Activities would take place in areas within Eversource's property or existing right-of-way ("ROW") utilizing existing and proposed new permanent access roads, as well as some temporary access roads (collectively the "Work Areas"). Some of the existing access roads would be improved. Eversource can access each of the structure replacement locations utilizing its existing rights; but, it is currently working with a private landowner to obtain rights to utilize an alternative off-ROW access route that would reduce the amount of proposed access roads that would need to be installed within the ROW.
- b) Collectively, the Work Activities would result in approximately 44,470 square feet ("SF") of temporary wetland impacts, limited to temporary construction matting required for the construction of access roads and work pads for eight structures as follows:

<b>Wetland Number</b>	<b>Structure Number</b>	<b>Construction Work Pads Temporary Impacts (SF)</b>	<b>Access Roads Temporary Impacts (SF)</b>
W13	7825	±1,800	±1,040
W14	7826	±1,200	0
W15	7827	0	±3,750
W22	7836	±2,100	0
W26	7838	±3,525	±2,180
W29	7840	±9,000	0
W37	7850	±6,820	10,880
W47	7866	±2,175	0
<i>Subtotals:</i>		<i>±26,620</i>	<i>±17,850</i>
<b>TOTAL:</b>		<b>±44,470</b>	

Work would be conducted in accordance with Eversource's *Best Management Practices Manual for Massachusetts and Connecticut (Construction and Maintenance Environmental Requirements)*, September 2016 ("BMPs") to avoid impacts to nearby wetland and watercourse resources.

- c) No vernal pools are located in proximity to the Work Areas.
- d) Based on review of the Connecticut Department of Energy and Environmental Protection's ("CTDEEP") Natural Diversity Database ("NDDB"), only the Work Activities associated with the work pad for Structure 7866 are proposed within a NDDB buffered area and wetland jurisdictional area and therefore would be subject to a NDDB review request. Eversource is currently in consultation with CTDEEP regarding Eversource's proposed work in this area and will adhere to any state-listed species protection measures recommended by CTDEEP, as necessary. Any recommended measures will be incorporated into Eversource's BMPs during construction. With these protective measures, no adverse impacts to state-listed rare species are anticipated.
- e) The Work Activities will not require any tree clearing. However, Eversource may need to undertake minor tree trimming and/or vegetation removal/mowing within the managed ROW corridor to improve access to portions of the Work Areas.

- f) A Phase 1A assessment review of previously recorded cultural resources on file with the Connecticut State Historic Preservation Office conducted by Heritage Consultants, LLC (“Heritage”) revealed two previously identified archaeological sites (Site 102-98 and Whittlesey Cemetery) located within 500 feet of the Work Areas. The sites would not be affected by the Work Activities and no protection measures are necessary. No National or State Register of Historic Places properties/districts were identified within 500 feet of the Work Areas.

Based on a review of historic maps, aerial photographs and available soil profiles, seven of the proposed work pad locations and six of the access road locations were identified to possess a potential for moderate to high archaeological sensitivity. These Work Areas were subjected to a pedestrian survey and three of the work pad locations and five of the access road locations retained the initial classification of moderate to high archeological sensitivity. Heritage completed a Phase 1B cultural reconnaissance survey (shovel pit testing) at these work pad locations and four of the access road locations and found no physical evidence of cultural deposits or archaeological significance. The remaining access road location will be matted, avoiding any impact to cultural resources. Based on the forgoing, Heritage advised that no further investigation is warranted.

- g) Increases in the heights of the 20 replacement structures will average approximately 5 feet and none will exceed 10 feet.
- h) Replacement structures would be located within 15 feet of existing structures.
- i) Work Activities associated with the access to Structure 7827 are located partially within the mapped 100-year flood zone of Copps Brook. Work Activities associated with the work pad for Structure 7840 are located wholly within the mapped 100-year flood zone of Wheeler Brook. Work Activities associated with the access and work pad for Structure 7850 are located partially within the mapped 100-year flood zone associated with Anguilla Brook. Eversource would utilize its BMPs to minimize any impacts to these flood zones by utilizing temporary construction matting and/or by not placing fill that would increase the elevations of the existing or proposed road surfaces or work pads to ensure that the floodplain hydrology would not be adversely affected. With these protective measures and the use of BMPs, no adverse impact to the 100-year flood zones would result from the proposed Work Activities.
- j) No change in noise levels would result from the installation of the new structures and the applicable line would continue to comply with the State of Connecticut noise regulations.
- k) Any changes in electric and magnetic field levels outside the ROW would be negligible.

#### IV. Mitigation:

Temporary environmental effects from construction will be mitigated as follows:

- Erosion and sediment controls ("E&S") will be employed and maintained, as needed, for the duration of the Work Activities in accordance with the 2002 Connecticut Guidelines for Soil Erosion and Sediment Control and the BMPs.
- Potential impacts to wetlands and watercourses will be mitigated with the use of temporary construction matting and adherence to the BMPs.
- Any NDDB recommended rare species protective measures will be incorporated into Eversource's BMPs during construction.

- Potential impacts to the 100-year flood zones would be avoided with adherence to the BMPs and the use of temporary construction matting.
- Eversource's contractor will perform construction sequencing such that any earth materials are exposed for a minimum of time before they are covered, seeded, or otherwise stabilized to prevent erosion.
- During construction, when necessary, anti-tracking mats would be installed at construction entrances onto public roads to prevent tracking of soil onto local streets.
- Upon completion of the Work Activities, all disturbed/exposed areas would be stabilized and revegetated as needed. After the establishment of permanent ground cover, Eversource's contractor would remove the temporary E&S controls and remove/dispose of any accumulated sediments and debris from areas where such measures were used.

V. Access:

Some new permanent access roads would be constructed to facilitate access to structures within the ROW and existing access roads in upland areas may be hardened and temporarily widened at turning areas to facilitate the safe passage of construction vehicles. Construction matting would be used as temporary access roads in wetlands as well as in agricultural/maintained lawn upland areas. The matting will be removed upon completion of the Work Activities and the areas restored, as necessary.

Eversource would access the Work Areas by entering its property and/or the ROW from existing access points on public roads as follows:

Stonington

- New London Turnpike for structures 7823, 7825 and 7826
- Al Harvey Road for structures 7827, 7829 and 7830
- Wheeler Road for structures 7833, 7834, 7836, 7837, 7838 and 7840
- North Anguilla Road for structures 7850, 7852, 7853, 7856, 7858 and 7859
- Liberty Street for structure 7861 (off-ROW access from an alternative location on Liberty Street would be used if rights are obtained)

North Stonington

- Pendleton Hill Road for structure 7866

**ATTACHMENT D**  
**ABUTTER LETTER AND**  
**PROOF OF NOTICE**

October 21, 2019

Dear Neighbor,

As part of our everyday effort to deliver reliable energy to our customers and communities, we're planning work in your area to replace electric transmission structures. Maintaining the infrastructure that supports the electric lines is one of the ways Eversource ensures the safe, secure transmission of electricity throughout the region.

You're receiving this letter and a copy of the Sub-Petition because the proposed work would be taking place within the right of way on or near your property in Stonington or North Stonington. A Sub-Petition is a document with detailed information about the proposed upgrades. Eversource is submitting Sub-Petition No. 1293-SNS-01 this week to the Connecticut Siting Council (CSC) for its review and approval.

**About This Electric System Improvement: What You Can Expect**

First, we want you to know that this work will not interrupt electric service to your property.

As part of this project, we are proposing to replace, and slightly increase the height of the existing wood structures. The new, weathering steel structures will increase in height by 10 feet or less, depending on the location.

We are proposing to do the work within the existing rights of way on or near your property. The new structures will provide continued reliability of the transmission system.

**Connecticut Siting Council Process and Timing**

With this letter, Eversource is providing notice to you of its proposed work activity, as described in the enclosed Sub-Petition. If you have any comments or concerns about the project, please send them to the CSC at the following address within 30 days of the date of this letter: Melanie Bachman, Acting Executive Director; Connecticut Siting Council; Ten Franklin Square; New Britain, CT 06051. You may email them at [siting.council@ct.gov](mailto:siting.council@ct.gov). If you choose to send comments to the CSC, please reference Sub-Petition No. 1293-SNS-01 in your correspondence.

**Our Commitment to You**

We are committed to be a good neighbor and doing our work with respect for you and your property. If you would like more information about this work please call 1-800-793-2202, or send an email to [ProjectInfo@eversource.com](mailto:ProjectInfo@eversource.com). Thank you.

Sincerely,

*Eric LeBlanc*

Eric LeBlanc  
Eversource Project Manager – Transmission Maintenance

AFFIDAVIT OF SERVICE OF NOTICE

STATE OF CONNECTICUT    )  
  ) ss. Hartford  
COUNTY OF HARTFORD    )

In accordance with Condition 2 of the Connecticut Siting Council's ("Council") March 31, 2017 declaratory ruling on Petition No. 1293, I hereby certify that on October 21, 2019, I caused notice of the proposed maintenance activities including a copy of the Sub-Petition No.1293-SNS-01 of The Connecticut Light and Power Company dba Eversource Energy ("Eversource") to be served on the municipalities listed below and 19 abutters. The notice of the proposed maintenance activities states that comments or concerns regarding the maintenance activities described in the Sub-Petition should be submitted to the Council within 30 days of the date of such notice.

Municipal Official:

Town of Stonington  
The Honorable Robert Simmons, First Selectman  
152 Elm Street  
Stonington, CT 06378

Town of North Stonington  
The Honorable Michael Uργο, First Selectman  
40 Main Street  
North Stonington, CT 06359

  
James L. Smith  
Project Siting Specialist

On this the 21<sup>st</sup> day of October 2019, before me, the undersigned representative, personally appeared, James L. Smith, known to me (or satisfactorily proven) to be the person whose name is subscribed to the foregoing instrument and acknowledged that he executed the same for the purposes therein contained.

In witness whereof, I hereunto set my hand and official seal.

  
Notary Public  
My Commission expires: 9/30/22
