Kathleen M. Shanley
Manager – Transmission Siting
Eversource Energy
P.O. Box 270
Hartford, CT 06141

RE: **PETITION NO. 1346** - The Connecticut Light and Power Company d/b/a Eversource Energy declaratory ruling, pursuant to Connecticut General Statutes §4-176 and §16-50k, for the replacement and relocation of an existing telecommunications facility and an existing relay and control enclosure located at Manchester Substation, 250 Olcott Street, Manchester, Connecticut, and related substation improvements.

Dear Ms. Shanley:

The Connecticut Siting Council (Council) is in receipt of your email correspondence of September 16, 2020 regarding temporary changes to work hours for the above-referenced declaratory ruling issued by the Council on July 20, 2018.

Pursuant to Condition No. 1 of the Council's Decision of July 20, 2018, your request to perform work from 7:00 a.m. to 10:00 p.m. on Sunday, September 20, 2020; Sunday, September 27, 2020; and Sunday, October 4, 2020 is hereby approved.

The extended work hours are necessary to accommodate the cut over process from the existing control enclosure to the new control enclosure that requires de-energization of the transformers during a CONVEX-approved outage.

The work will primarily take place inside the control enclosures. The only noise will be from vehicles driven by workers entering and exiting the substation.

This approval applies only to the request for extended work hours in your email of September 16, 2020. Any significant changes to the project require advance Council notification and approval.

Thank you for your attention and cooperation.

Sincerely,

s/Melanie A. Bachman

Melanie A. Bachman
Executive Director

MB/MP

Subject: Petition 1346 - Manchester Substation - Extended Work Hours - Sunday, 9/20/20; Sunday, 9/27/20 and Sunday, 10/4

Dear Ms. Bachman:

We are requesting staff review and approval for extended work hours for the above referenced project on Sunday, 9/20; Sunday, 9/27 and Sunday, 10/4 from 7AM-10PM. Eversource is requesting these additional work hours in order to accommodate the cut over process from the existing control enclosure to the new control enclosure in order to stay on track with the project schedule. This work can only be accomplished with the transformers de-energized and CONVEX has restricted the transformer outages to weekends only.

The work during the extended hours will be primarily inside the control enclosures. The only noise generated will be by the vehicles driven by the workers to arrive and leave the substation.

We have notified the Town of Manchester of our intention to submit this request to the Council and they do not object to these extended work hours.

Please do not hesitate to contact me should you have any questions regarding this request. Thank you for your consideration of this matter.
