Melanie-

Below is an e-mail string with myself and Chris Martin. DEEP is working on the response, and had requested an alternate exhibit, which I have attached. I'm working from home, but could still send 15 copies if necessary. They are requesting an extension to respond, beyond the March 27<sup>th</sup> date, please advise.

Also what are your thoughts on the May 30<sup>th</sup> decision given the latest with the latest pandemic news, have things slowed even more since the requested extension?

Thanks,  
Steve

This is fine. DEEP's response requires review and approval by our Legal Department. I hope to draft a response today but I doubt final approval will be received by March 27<sup>th</sup>. I would hope CSC would be flexible. Advising to request an extension today. Feel free to attach this email and let me of the new date if one is granted.

Thank you.

Chris-

Please let me know if this exhibit is acceptable, and if there is anything else you need.

Thanks,  
Steve

# Benz Solar - Forestland Habitat Impact Map

3/24/2020, 3:48:21 PM

 Forestland Habitat Impact

Sources: Esri, HERE, Garmin, Intermap, increment P Corp., GEBCO, USGS.

Web AppBuilder for ArcGIS  
DEEP Wildlife Division

Please provide a map with DEEP's Forest Habitat Impact map superimposed. The link is within the RFP [ArcGIS Web Application](#). It look like UCONN's forest fragmentation map was used on the existing maps. Thanks.

**Importance:** High

Chris-

On March 14<sup>th</sup> you should have received the attached Request for Core Forest Determination for the CSC 1395 petition. A response is due from DEEP to the CSC by March 27<sup>th</sup>, 2020. I'm writing to inquire if you have received the attached document in paper copy, given many are currently working from home or remotely due to COVID. I'd like to get an update to the CSC to ensure that the project permitting can stay on track.

Feel free to contact me with any questions.

Thanks,  
Steve
