Re: Southington Solar One Training to Local Fire and Emergency Responders

Chief Paul,

I'm reaching out to introduce you to Verogy. We are a Hartford-based renewable energy developer currently developing a Solar Farm at 1012 East Street in Southington. The project was approved by the Connecticut Siting Council on May 21, 2021 and we are currently working through our final conditions of that approval, prior to starting construction later in July.

This letter will accompany a full set of permit plan drawings for the project, both the electrical and civil drawings. Should you have any questions on these drawings, please feel free to contact me directly and we can either answer your questions or set up a meeting to discuss in greater detail. Additionally, we would like to take this opportunity to offer training or any additional information, to your department, specific to the solar farm, its operational parameters, and emergency protocols. Please feel free to let me know your thoughts on this and if you have any specific questions or would like to discuss setting time aside to walk through the emergency protocols for the solar farm.

Thanks in advance for your time and consideration.

Sincerely,

Bryan Fitzgerald
Director of Development
