

Biography

Vincent Ginter, P.Eng., M.Sc.
Engineering Manager
Urban Solution Group

Vince holds Bachelor's (B.Sc.) and Master's Degrees (M.Sc.) in Mechanical Engineering from the University of Calgary and is a registered professional engineer.

Vince brings more than 18 years of experience in research and development, product development, manufacturing, business-development, and consulting; seven years of which are at a senior management level. He brings an in-depth and broad-based knowledge of products ranging from renewable/sustainable turbine-based power generation systems for run of river & waste pressure/fuel/heat power projects, to polymer manufacturing pilots, production/processing equipment for the oil and gas industries, industrial noise control & acoustic modelling.

He most recently served as Vice President of Engineering for a Canadian based environmental noise company in charge of new technologies, generating intellectual property, and steering technology development for both engineering and acoustic modeling efforts as well as manufactured noise mitigation equipment and installation. He was also heavily involved in identifying and developing strategic partnerships and overseeing operations.

As Engineering Manager at Urban Solution Group, Vince is responsible for developing new environmental noise modelling methodologies compliant with various industry regulations as well as maintaining Urban's leading position in the market through development of industry leading technology and intellectual property.
