Petition No. 5

An inspection of the construction made in effecting various changes in the treatment of radioactive wastes at Connecticut Yankee Power Generating Station was made by John Lombard and W.C. Joram, accompanied by Mr. Philip Ashton of NUSCo on April 2, 1975.

The project was found to be completed in accordance with the specifications set forth in the applicants letter of September 27, 1972.

A description of the changes with photographs was given to the Council on April 25, 1975, by W.C. Joram.
