COMPLETED WORK INSPECTION Petition No. 9

An inspection of the relocated and reconstructed existing transmission line, in the town of Brookfield, to accommodate construction of the new Route 7 highway, was made on March 5, 1975, by W.C. Joram, Executive Director.

The project has been completed in accordance with the specifications set forth in the applicants letter to the Council dated November 22, 1975. Same clearing of the new right of way was required which was carried out in conformance with the Guide Lines of Public Act 575.

A description of the modification with color slides was presented to the Council on March 11, 1975.

Petition No. 10

An inspection of the reinsulated existing transmission line between Rocky River Hydro Station and Gales Junction, and the rebuilt transmission line between Gales Junction and Bulls Bridge hydro station, was made on March 5, 1975 by W.C. Joram, Executive Director.

The project has been completed in accordance with the specifications set forth in the applicants letter to the Council dated November 22, 1972. There was no indication of any additional clearing on the right of way.

A description of the modifications with color slides was presented to the Council on March 11, 1975.

Petition No. 11

An inspection of the reinsulated existing transmission line between Brookfield Junction and Rocky River Hydro Plant was made on March 5, 1975, by W.C. Joram, Executive Director.

The project has been completed in accordance with the specifications set forth in the applicants letter to the Council dated November 22, 1972. There is no indication that there was any additional clearing along the right of way.

A description of the modifications with color slides of the site was presented to the Council on March 11, 1975.
