PETITION NO. 66  
Haddam, Connecticut  
August 16, 1982

Owen L. Clark, Gloria Dibble Pond, and Christopher S. Wood visited the Haddam site of the Department of Transportation/Northeast Utilities tower sharing telecommunications facility on August 16, 1982, to review the completion of work described in Petition No. 66.

The existing tower, owned by Northeast Utilities, supports several of NU's antennae. The company entered into a license agreement with DOT to permit sharing of the facility. DOT has added one 6' microwave dish and 2 UHF stick antenna to the 280' tower. The equipment is part of the Motorist Aid Call Box System.

All construction and installation has been completed as described in the petition. Final approval is recommended.

Christopher S. Wood  
Executive Director
