Connecticut Towns with Confirmed Cases of COVID-19

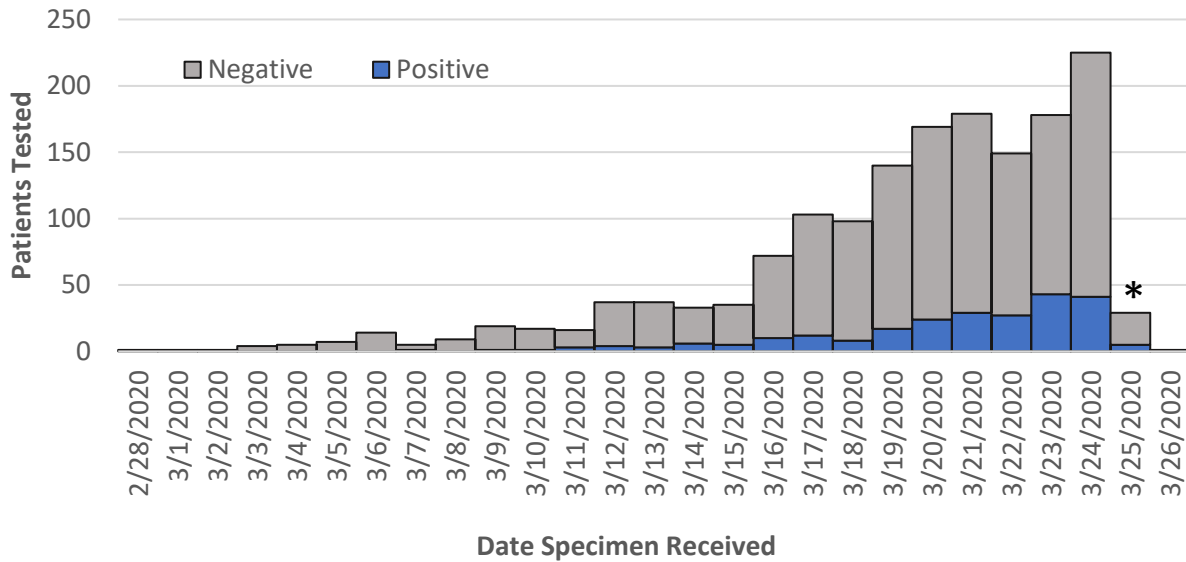

Data are preliminary and subject to change

The Dr. Katherine A. Kelley State Public Health Laboratory has tested a total of **1,561** patients for COVID-19; **238 (15%)** patients tested positive. The graph below shows the number of patients tested by date specimens were received. Hospital and commercial laboratories also are offering testing for COVID-19 in Connecticut; in total, more than **10,200** tests have been reported to date.

Patients Tested for COVID-19 at the Dr. Katherine A. Kelley State Public Health Laboratory

As of 3/28/2020 at 12PM

**Testing of specimens received since March 25 is on-going and does not reflect a decrease in testing.*

The Department of Public Health has two syndromic surveillance systems that track respiratory illness across the state. The hospital syndromic surveillance system receives near real-time information about emergency department (ED) visits from all 38 licensed, hospital EDs in Connecticut. ILI-Net receives the percentage of patient visits with influenza-like illness (ILI) from a network of outpatient healthcare providers. Due to the ongoing COVID-19 pandemic, both syndromic surveillance systems suggest that more people may be seeking care for respiratory illness than usual at this time. For more information, please see the [Weekly Influenza Update](#).
