

## COVID-19 Update April 16, 2020

As of **April 16, 2020**, a total of **15884** laboratory-confirmed cases of COVID-19 have been reported among Connecticut residents (Figure 1). **One thousand nine hundred twenty-six** patients are currently hospitalized. There have been **971** COVID-19-associated deaths.

**Day-to-day changes reflect newly reported cases, deaths, and tests that occurred over the last several days to week.** All data in this report are preliminary; data for previous dates will be updated as new reports are received and data errors are corrected. Hospitalization data were collected by the Connecticut Hospital Association. Deaths\* reported to either the OCME or DPH are included in the daily COVID-19 update.

**\*For public health surveillance, COVID-19-associated deaths include persons who tested positive for COVID-19 around the time of death and persons who were not tested for COVID-19 whose death certificate lists COVID-19 disease as a cause of death or a significant condition contributing to death.**

Overall Summary	Total	Change Since Yesterday

## Syndromic Surveillance

The Department of Public Health EpiCenter hospital emergency department (ED) syndromic surveillance system receives near real-time information from all 38 licensed, hospital EDs in Connecticut. The percentage of individuals seeking care for “unexplained fever/flu” syndrome ED visits is monitored to identify individuals that may have symptoms consistent with COVID-19; this differs from the “fever/flu” syndrome in the weekly influenza report since patients with a known diagnosis (e.g., influenza, strep throat) are not included. **The syndromic surveillance systems suggest that many more people are seeking care for respiratory illnesses, including COVID-19, in the past four weeks.**

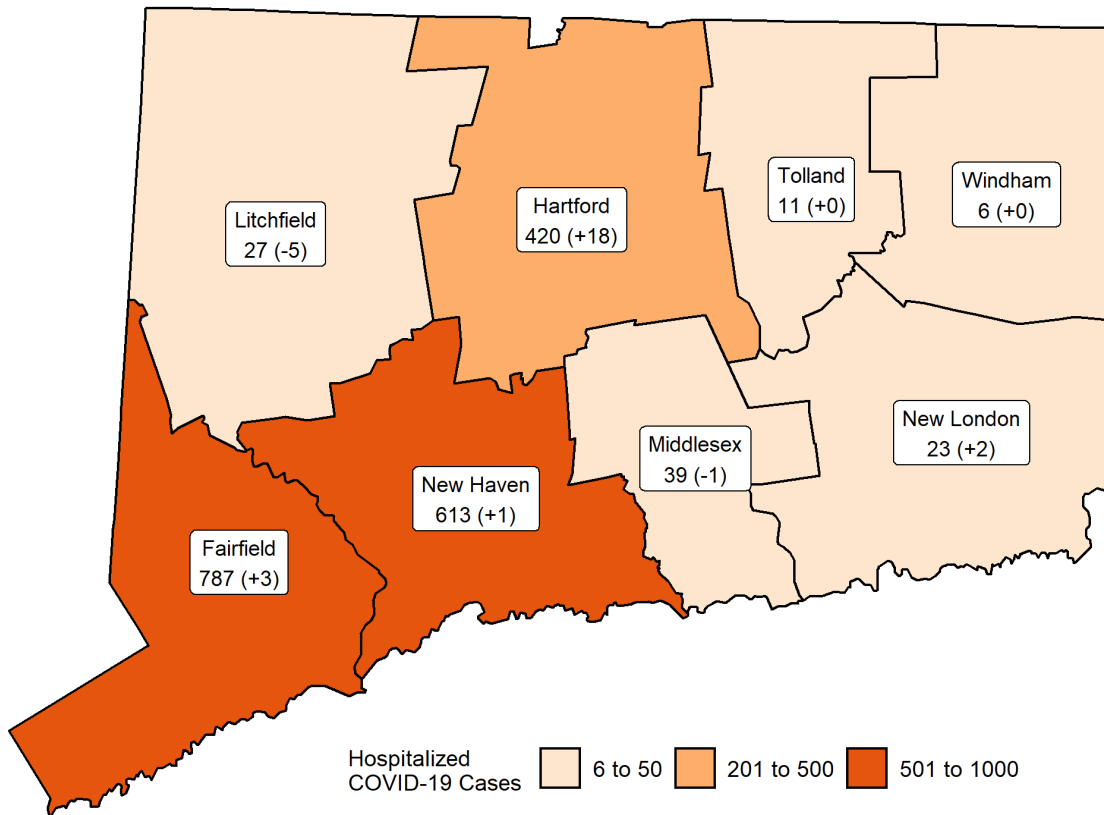

## Hospitalization Surveillance

The map below shows the number of patients currently hospitalized with laboratory-confirmed COVID-19 by county based on data collected by the Connecticut Hospital Association. The distribution is by location of hospital, not patient residence. The labels indicate the number of patients currently hospitalized with the change since yesterday in parentheses.

## Laboratory Surveillance

The Dr. Katherine A. Kelley State Public Health Laboratory has tested a total of **3636** patients for COVID-19; **1202 (33%)** patients tested positive. The graph below shows the number of patients tested by date specimens were received. Hospital and commercial laboratories also are offering testing for COVID-19 in Connecticut; in total, more than **53122** tests have been reported to date.

*Testing of specimens received since April 14 is ongoing and does not reflect a decrease in testing.*

## Characteristics of Laboratory-Confirmed COVID-19 Cases and Associated Deaths

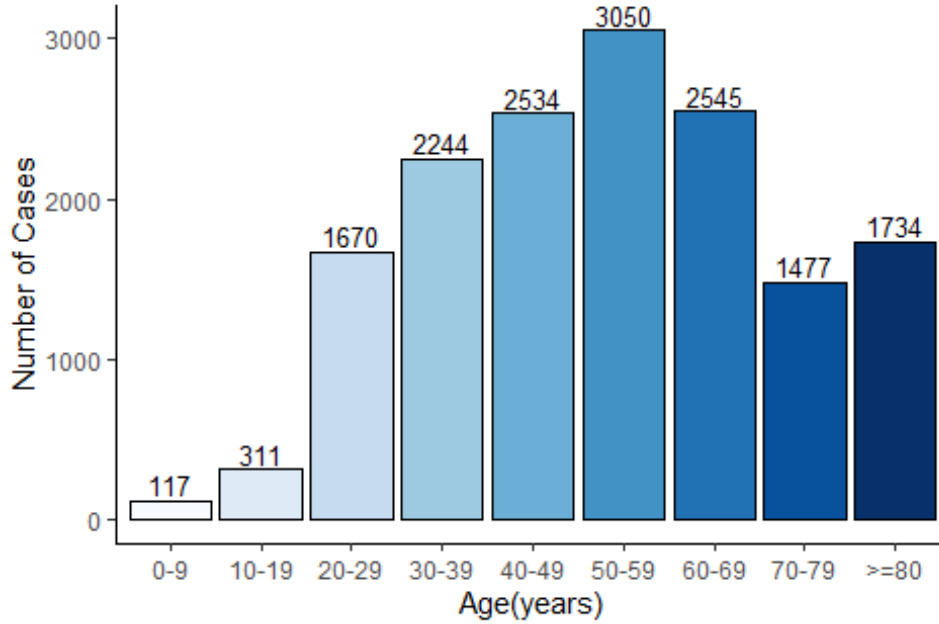

Test results may be reported several days after the result. Data are incomplete for most recent dates shaded in grey. Data from previous dates are routinely updated.

Counts may not add up to total case count because demographic data may be missing.
