

Connecticut nursing homes are [required by the Centers for Medicare and Medicaid Services \(CMS\)](#) to report on the impact of COVID-19 on their residents and staff through CDC’s National Healthcare Safety Network (NHSN). This reporting is intended to reflect recent COVID-19 activity in nursing homes. Data reported here are from NHSN and reflects facility-specific COVID-19 case data in the past 2 weeks. All nursing homes follow NHSN definitions and instructions when reporting to the NHSN COVID-19 module, ensuring data are reported in a systematic way. Detailed information about COVID-19 reporting for nursing homes and NHSN can be found [here](#).

On May 11, 2021, CMS outlined [additional reporting requirements](#) for nursing homes, including COVID-19 vaccine coverage data among residents and staff. For more facility specific COVID-19 data, including vaccination rates, please see [CMS’ COVID-19 Nursing Home Data website](#).

*Note that the data reported are current for the week of reporting. CT DPH continuously updates and corrects reporting errors.*

<sup>1</sup>COVID-19-related resident deaths are defined by NHSN as residents who died from SARS-CoV-2 (COVID-19) related complications and includes resident deaths in the facility and in other locations, such as an acute care facility, in which the resident with COVID-19 was transferred to receive treatment. NHSN reporting instructions for nursing homes can be found [here](#).

<sup>2</sup>Duplication of total count of staff with COVID and/or COVID-related deaths may occur as staff work at multiple facilities during the week. NHSN methodology requires that positive staff to be included in the facility count, if the positive staff worked on location during the infectious period where a transmission risk could have occurred to residents and other staff. Please see [here](#) for more details.

<sup>‡</sup>Facility did not report for the full reporting period (numbers provided) or for the entire reporting period (blank).

CT DPH began reporting NHSN staff data on June 17, 2020 to align with CMS' requirement for weekly reporting to NHSN. Resident data reporting switched to NHSN as a data source starting July 22, 2020 after a period of data validation with the prior resident case data, which was compiled from data reporting directly from nursing homes to DPH. Due to differing data collection and processing methods between NHSN and the data sources used previously, DPH does not add the data before and after a change in data source due to the possibility of duplication of cases and deaths among prior and current data sources. To view prior nursing home reports, please see [Nursing Home and Assisted Living Facilities Data](#).

<sup>1</sup>Deaths prior to July 22 included data from the Office of the Chief Medical Examiner (OCME). Timing of OCME determinations and NHSN reporting may differ.

<sup>2</sup>COVID-19-related resident deaths are defined by NHSN as residents who died from SARS-CoV-2 (COVID-19) related complications and includes resident deaths in the facility and in other locations, such as an acute care facility, in which the resident with COVID-19 was transferred to receive treatment. NHSN reporting instructions for nursing homes can be found [here](#).

<sup>3</sup>Duplication of total count of staff with COVID-19 and/or COVID-related deaths may occur as staff work at multiple facilities during the week. NHSN methodology requires that positive staff to be included in the facility count if the positive staff worked on location during the infectious period where a transmission risk could have occurred to residents and other staff. Please see [here](#) for more details.
