Connecting Students through the Comcast Performance Starter Program

Districts should take the following steps to connect students from families that **do not** qualify for Internet Essentials and do not have Internet at home:

1. Open this spreadsheet
2. Save a copy, appending your district's name to the beginning of the file name (e.g., "Anytown Comcast Performance Starter - Address Serviceability") so I can identify it easily
3. Paste the district and family address information in your new copy of the spreadsheet
   IMPORTANT
   DO NOT include student names
   DO NOT include addresses of families who qualify for Internet Essentials, to whom you have provided vouchers
4. Send a link to the completed spreadsheet to Doug Casey at doug.casey@ct.gov

Doug will share those addresses with Comcast, which will attempt to return the list of serviceable addresses within a week, along with codes for those families to connect.
