Mr. Anania proposed a headroom of 5 feet, 7 ½ inches at a bottom of a stairway that serves a newly created habitable basement within a single family dwelling." That the DSBI's decision was based on the fact that the Office of the State Building Inspector (OSBI) has not accepted the use of such sprinklers as an equivalent to the required rated fire barrier that is required for the enclosure of exit stairs, and the fact that it is a new construction around and existing stair and no hardship has been demonstrated where compliance with the minimum requirements of the Building Code would entail practical difficulty, or has it been determined that the requirements of the code have been adjudged unwarranted.
