UPDATE: COVID Boosters Available in CT

DDS Stakeholders, please disseminate this information-

The CDC and Prevention's Advisory Committee on Immunization has expanded its recommendations related to booster doses, [CT DPH announced on Friday.](#)

The updated recommendations encourage all adults who received the **J&J** vaccine to get a booster at least two months after their original dose.

For adults who received **Pfizer** or **Moderna**, boosters at least 6 months after the second dose are recommended for individuals 65 and older, those with high-risk conditions, or those who are at higher risk of exposure due to where they work or live.

Please visit [ct.gov/covidvaccine](http://ct.gov/covidvaccine) to learn more about who is eligible, and to find a location & schedule your booster dose of the COVID vaccine.

I encourage all of you who are eligible to make a plan to get a booster shot. Connecticut is leading the nation with one of the highest vaccination rates and some of the lowest rates of infection, thanks to all of you who got vaccinated. Let's keep this momentum going and get your booster shots if eligible. We can beat this together!

Thank you for all you do,  
Jordan

Jordan A. Scheff  
Commissioner
