

Commissioner Murray,DDS

As a parent and guardian of my daughter Stephanie Aucello, I am most interested
In the future of STS.

My recommendation is that STS remain open as a facility to care for clients who
Require 24hr. care and are not candidates for other types of community housing.
My daughter has resided in STS for 40 yrs. this is her home and social community.
She is now a quadriplegic and suffers with seizures along with multiple other
complications.

If STS no longer services Stephanie and people afflicted as she, then these clients
will be forced to be uprooted and lose the only life they have ever known.

Please consider the situation of these people whose options are few and needs
are many.

Sincerely

Dr Russell Aucello
