CONNECTICUT AT-A-GLANCE REPORT • 2016-17

SELECTED FINDINGS FROM THE 2016-17 SURVEYS

Connecticut

Cover art by
Betty Antoine

Born in Boston, Massachusetts in 1987, **Betty Antoine** is emerging as an artist with a strong sensibility for needlecraft and traditions. Antoine works tirelessly with a colorful palette, be it painting, drawing, or crocheting. Throughout the studios she can be found crocheting or knitting at any given time. These traditional crafts have been passed down in her family, and they are very important to her.

Antoine appreciates the tactile qualities of many objects and translates that detail into imagery she paints or draws. She has a great understanding of portraiture and has developed a unique style of representing textiles within the composition. Through marked persistence Antoine successfully evokes the texture of fabric and detail in the imagery she chooses to paint. Painting, like crocheting, provides her with a meditative process, presenting her with time for reflection. Antoine's fine art and crochet crafts have been recognized in many exhibitions throughout Massachusetts including exhibitions at the Gateway Gallery and Drive-By Projects in Watertown, MA.

Where are the statistics in this report from?

The Adult Consumer Survey from Connecticut 16-17

This report includes selected findings from the National Core Indicators™ 2016-17 Surveys listed below.

The Adult Consumer Survey

This survey is completed with adults with I/DD age 18 and older receiving at least one paid service (in addition to case management) from the state DD agency. The survey instrument includes a Background Information Section, which gathers data about the consumer from agency records, and an in-person survey. The in-person survey is composed of two sections: Section I includes subjective questions that can only be answered by the person receiving services from the state. Section II includes objective, fact-based questions that can be answered by the person or, if needed, a proxy respondent who knows the person well.

The NCI Team produces reports that inform state efforts to strengthen LTSS policy, inform quality improvement activities, evaluate programs and policies, and compare their performance with national norms. For more information on National Core Indicators, please see www.nationalcoreindicators.org. For detailed information on samples, methodology and administration, please see the NCI Reports from 2016-17, available at <http://www.nationalcoreindicators.org/resources/reports/>.

**Beginning this year, the NCI averages contained in this report are “weighted” means: the calculations reflect the relative population sizes of participating states and their survey sample sizes. For more information, please see the 2016-17 Adult Consumer Survey Report at <http://www.nationalcoreindicators.org/resources/reports/>.*

368 adults with I/DD participated in the 2016-17 survey in Connecticut.

Respondents are adults with I/DD age 18 and older receiving at least one paid service (in addition to case management) from the state DD agency.
