Q: I am looking to apply for the Opportunity Innovative Employment Opportunity 2022 Grant Program. The business model I am proposing is an entrepreneurship business for each client. Each employee will follow the Customized employment model. We are looking to create a workshop that allows employees to drive their passion and create items to sell online and at local markets. The program will assist and accommodate all needs and incorporate job skills in entrepreneurship (buying materials, following a budget, following set-by-step directions, shipping, marketing, and building community connections, etc.) Before creating a business plan, would this be a program that would possibly receive a grant?

A: [The intention of the IEO is to tie funds directly to either the start-up or expansion of specific businesses that have the employment of individuals with intellectual and developmental disabilities as a central component of their business model. The IEO is not intended to be used under the umbrella of programs such as GSE's. If there are individuals who are interested in starting their own business, they should be encouraged to apply for the IEO.](#)
