**H.B. 6279- An Act Concerning Revisions to Statutes Relating to the Department of
Developmental Services Including the Utilization of Respectful Language
When Referring to Persons with Intellectual Disability
February 9, 2011**

Senators Stillman and Welch, Representatives Ritter and Perillo and members of the Public Health Committee. I am Commissioner Peter O'Meara of the Department of Developmental Services (DDS). Thank you for raising House Bill 6279, An Act Concerning Revisions to Statutes Relating to the Department of Developmental Services Including the Utilization of Respectful Language When Referring to Persons with Intellectual Disability.

This bill defines "intellectual disability" to mean the same as "mental retardation" in state statutes related to the Department of Developmental Services. The Department has proposed this change both from a respectful language perspective and to conform with the recently passed federal legislation "Rosa's Law" which changed the term "mental retardation" to "intellectual disability" in many instances. This change at the federal level, coupled with the proposed changes to the Diagnostic and Statistical Manual of Mental Disorders (DSM-V) by the American Psychiatric Association that are scheduled to take effect in May 2013, made changing the department's statutes to more appropriate and up-to-date terminology necessary.

As mentioned, the bill changes terminology to person first, respectful language (i.e. "person with intellectual disability" rather than "mental retardation"). Although there are other references in state statutes to the term "mental retardation", the Department made the decision to begin with changes specific to DDS statutes. DDS did not want to unintentionally impact any legal requirements or rights of individuals with intellectual disability by making sweeping statutory changes. (ex: probate statutes, the state penal code, non-discrimination provisions in areas of state government such as human rights and contracting).

We encourage other agencies and entities throughout the state to review their statutory language and make changes as appropriate going forward. We also respectfully request that state legislators consider using respectful and person first language when referring to individuals who receive services from DDS.

If any legislators have questions regarding what constitutes respectful language, our staff would be happy to talk with them. “Rosa’s Law” changed the terminology to intellectual disability in many significant federal acts, but not all of them. For this reason, we have not changed any references to an “intermediate care facility for the mentally retarded” (ICF/MR) at this time in the DDS statutes. We will wait for a federal change and consult with the Department of Social Services as the lead Medicaid agency before making the change in state statute so as not to impact any federal reimbursement or Medicaid waiver provisions. Additionally, the bill assures that DDS statutes accurately reflect the department’s responsibilities for licensing community companion homes and community living arrangements.

House Bill 6279 also streamlines or eliminates specific obsolete reporting requirements and statutes. Our intent is not to stop providing information to the legislature that it may find useful in its deliberations regarding DDS. However, we do want to eliminate many old requirements to produce information or reports that are no longer useful or pertinent. Additionally, DDS produces various reports and sets of data on a regular basis that is either available on our agency website or in electronic form upon request. We pride ourselves on being responsive to requests for data and specific information that would be useful to legislators. In a time of limited resources and when employees are juggling multiple responsibilities, it makes sense that we not produce reports that have no usefulness or relevance to current issues. Thank you for your consideration of this request.

Below is a summary of each section of the bill:

- Sec 1 (1-1g) defines intellectual disability to mean the same as mental retardation in DDS statutes.

(17a-213) repeals a regional comparison report. DDS produces several non-mandated reports that tend to meet the informational request needs of the legislature.
(17a-216) repeals outdated statute that doesn’t get used related to the purchase of equipment. Also mr to id. Repeal of sub sec (b) as the language is not needed due to the overhaul of the entire state procurement process.
(17a-278) repeals outdated statute that doesn’t get used related to “recalls” and boarding homes
(17a-279) repeals outdated statute that doesn’t get used related to “escaped persons”
(17a-280) repeals outdated statute that doesn’t get used related to recommitment and transfers. This language is very outdated and probably illegal
(17a-283a) repeals entire section as statute’s requirements relate to a specific period of time that has passed (ended June 30, 2009).
