DDS tracks the residential needs of individuals with intellectual disability quarterly through its MIR report. Prior to March 2017, the definition of "no supports" included any annualized amount of residential funding under \$20,000. *Starting in March 2017, the definition of "no supports" changed to \$0. **Also starting in March 2017, DDS instituted the use of both a Support Survey and Residential Request Assessment tool through the annual individual planning process to better capture data regarding the residential needs of individuals. Starting with the September 30, 2017 MIR, residential needs are now grouped into categories: Emergency, Urgent and Future Needs instead of the previous priorities. However, if an individual has not yet had a category assigned, they will maintain their existing priority status:

Old Priority	New Priority	Description
Emergency	Emergency	The individual has an immediate need for residential placement, support or services.
Priority One	Urgent	The individual is requesting placement within one year and has been determined to have the most pressing needs for services.
Priority Two	Future Needs	The individual wants or will need services in two or more years
Priority Three	Future Needs	The individual wants or will need services in two or more years

KEY: **Waiting List (WL):** The individual is living in their own or family home, receiving no services. These individuals have an active need and are designated as one of two categories, Emergency or Urgent.

Other Residential Needs (ORN): The individual receives DDS funded residential supports and services, but needs additional supports. These individuals are designated as one of two categories, Emergency or Urgent.

Planning List (PL): the individual has a future residential need and have been assigned to the Future Needs category. Those with Future Needs want or will need services in two or more years. Their need is not considered Emergency or Urgent.

No Services (NSVC): The individual is living with their family or independently and does not receive any annualized residential supports. Prior to March 2017 meant under \$20,000, starting in March 2017, means \$0.

Underserved (USVD): the individual currently receives residential services or supports but needs increased resources in their current placement and does not want or need to move.

This data does not include other individuals with residential needs such as those aging out of residential settings not currently DDS funded, or those desiring to move from one residential support (non-institutional) to another.
