

DRAFT STEWARDSHIP PERMIT DRAFT

Pursuant to Chapters 439 and 446k of the Connecticut General Statutes, a permit is issued to:

Permittee:

State of Connecticut
Dept. Of Energy and Environmental Protection
79 Elm Street, Hartford CT 60106

Facility Identification:

EPA ID No. CTD991288960
Permit Number: DEEP/REM/SP/2022-7123
25 Pent Road, Wallingford CT

To perform groundwater monitoring, maintenance of landfill caps, any engineered controls, and site-wide environmental investigation and cleanup (corrective action measures) at the hazardous and solid waste disposal facility in accordance with Connecticut General Statutes (CGS) Sections 22a-6, 22a-208a, 22a-449(c), and Section 22a-449(c)-110 of the Regulations of Connecticut State Agencies (RCSA) as specified in the conditions set forth in this permit.

This permit regulates and authorizes the Permittee, the Department of Energy and Environmental Protection (DEEP), to perform groundwater monitoring, post-closure care and maintenance of the landfill, any engineered controls and corrective action measures at the facility. The permit does not authorize operation of a hazardous and solid waste management facility in the sense of treating, storing, or disposing of hazardous and solid wastes generated off-site. This permit represents a renewal of a previously issued Stewardship Permit for this Facility. The Permittee and Operator is the Connecticut Department of Energy and Environmental Protection. The Facility is owned by the Town of Wallingford.

All terms in this permit are defined in the permit or if not defined in the permit are as defined in Section 22a-449(c)-100 of the RCSA incorporating, with changes, Title 40 of the Code of Federal Regulations (CFR) Parts 260, 261, 262, 264, 268, 270, 273 or 279.

This permit is based on the information described in the Stewardship Permit application (Application No. 202007444) filed in May 2020 and the previously issued Stewardship Permit HWM/CS-148-004 issued on November 16, 2009 for this Facility. That permit was initially issued to the Connecticut Resources Recovery Authority (CRRA), now known as the Materials Innovation and Recycling Authority (MIRA) and was transferred to the current Permittee (DEEP) on April 28, 2014, pursuant to Public Act 13-247. The Permittee must keep records of all data used to complete the permit application and any supplemental information submitted for the effective term of this permit. The permit application is incorporated by reference as part of the permit. Any false statements or inaccuracies contained in the information submitted by the Permittee may result in the suspension, revocation, or modification of this permit and civil or criminal enforcement action.

The Permittee shall comply with all terms and conditions contained in the Permit. Any violation of any provision of this permit may subject the Permittee to enforcement action pursuant to the CGS including but not limited to Sections 22a-6a and 22a-131.

This permit is transferrable upon the Commissioner's written authorization, provided the Permittee and potential transferee have complied with the requirements set forth in CGS Section 22a-6o.

This permit may be revoked, suspended, modified, transferred, or reissued, in order to comply with applicable law. The Commissioner may also modify this permit when it is deemed necessary to do so.

The Permittee shall submit notifications and request for revisions to this permit in accordance with RCSA 22a-449c-110, incorporating with changes 40 CFR 270. Any application shall be approved in writing by the Commissioner prior to the Permittee implementing such change. The Permittee shall submit an application for a renewal of this permit to the Commissioner at least one hundred eighty (180) calendar days prior to its expiration date.

This permit is hereby in effect and shall expire ten (10) years from this date.

SECTION I
STANDARD FACILITY CONDITIONS

Department of Energy and Environmental Protection

EPA ID No. CTD-991288960

Permit No. DEEP/REM/SP/2022-7123

DRAFT

SECTION I
STANDARD FACILITY CONDITIONS

A. EFFECT OF PERMIT

Except as is provided in the Regulations of Connecticut State Agencies (RCSA) Section 22a-449(c)-110(a)(2) and except for any federally enforceable requirement(s), compliance with this permit (Permit) during its term constitutes compliance, for purposes of enforcement, with Connecticut General Statutes (CGS) Sections 22a-208a and 22a-449(c). This Permit may be modified, revoked and reissued, or terminated during its term as set forth in RCSA Section 22a-449(c)-110(a)(1), which incorporates by reference, with changes, Title 40 of the Code of Federal Regulations (40 CFR) Parts 270.41, 270.42 and 270.43.

To fulfill requirements of both the Connecticut Solid Waste Management Regulations and the Connecticut Hazardous Waste Management Regulations, the Permittee shall perform the activities required in Section II and Section III of this Permit. In the event of a conflict between the Permittee's application and the requirements of this Permit, the requirements of this Permit shall take precedence and apply.

The issuance of this Permit does not authorize any injury to persons or property or invasion of other private rights, or any infringement of state or local law or regulations.

Term (Duration) - The effective date of this Permit is the date on which the Permit is signed by the Commissioner. This Permit is in effect for a term of ten (10) years and may be renewed at the end of the term, in accordance with the requirements described in the "Duty to Reapply" Section of this Permit.

B. SEVERABILITY

The provisions of this Permit are severable, and if any provision of this Permit, or the application of any provision of this Permit to any circumstances is held invalid, the application of such provision to other circumstances and the remainder of this Permit shall not be affected thereby.

C. CONFIDENTIAL INFORMATION

The Permittee may claim that any information required to be submitted by this Permit contains or constitutes confidential information in accordance with CGS Section 1-210(b).

D. IMMINENT HAZARD NOTIFICATION

Notwithstanding any provision of this Permit, enforcement actions may be brought pursuant to Section 7003 of the RCRA, CGS Section 22a-6, or any other applicable law.

E. DUTIES AND REQUIREMENTS

1. Duty to Comply

The Permittee shall comply with all conditions of this Permit except that the Permittee need not comply with the conditions of this Permit to the extent and for

the duration such noncompliance is authorized in an Emergency Permit that explicitly authorizes any such noncompliance. Noncompliance by the Permittee with the terms of this Permit, except under the terms of an Emergency Permit, shall constitute a violation of this Permit and any applicable laws or regulations and is grounds for enforcement action, for Permit termination, revocation, and reissuance or for denial of a Permit renewal. Emergency Permit as used herein shall mean Emergency Permit as identified in RCSA Section 22a-449(c)-110(a)(1) incorporating 40 CFR 270.61.

Unless superseded by a more stringent provision in this Permit, the Permittee shall comply with all of the applicable requirements of RCSA Sections 22a-133k-1 et. seq. (Remediation Standard Regulations or RSRs), as amended, and 22a-449(c)-100 et. seq., including any portion of 40 CFR 260 through 279 incorporated by reference therein.

A violation of this Permit for purposes of state and federal law constitutes a violation of a RCRA Permit.

2. Duty to Reapply

This Permit shall expire ten (10) years after the effective date of this Permit. The Permittee shall renew this Permit if any activity required under this Permit is not completed prior to the expiration date of this Permit. The Permittee shall apply for renewal of this Permit one hundred and eighty (180) calendar days prior to the date of expiration of this Permit, in accordance with RCSA Sections 22a-449(c)-104(a) and 22a-449(c)-110 incorporating 40 CFR 264.101 and 270.10(h) and any other applicable law.

3. Obligation for Continuing Corrective Action, Post-Closure Care, Long-Term Stewardship Controls

The Permittee is required to renew and continue this Permit for any period necessary to comply with the requirements of this Permit.

4. Need to Halt or Reduce Activity Not a Defense

It shall not be a defense for a Permittee in an enforcement action that it would have been necessary to halt or reduce any activity authorized by this Permit in order to maintain compliance with the conditions of this Permit, unless otherwise required to do so by another state or federal authority.

5. Duty to Mitigate

In the event of noncompliance with this Permit, the Permittee shall take all reasonable steps to minimize releases to the environment and shall carry out such measures as are reasonable to prevent its noncompliance from having significant adverse impacts on human health or the environment. No action taken by the Permittee pursuant to this section of this Permit shall affect or limit the Commissioner's authority under any other statute or regulation.

6. Permit Actions

This Permit may be modified, revoked and reissued, or terminated as provided for in 40 CFR 270.41, 270.42 or 270.43, and in accordance with all applicable law, including but not limited to, CGS Sections 22a-6g and 6h and RCSA Sections 22a-3a-5 and 22a-449(c)-110. The filing of a request by the Permittee for a Permit modification, revocation and reissuance, or termination, or a notification of planned changes or anticipated noncompliance, does not stay any condition of this Permit.

7. Property Rights

This Permit does not convey any property rights of any sort, or any exclusive privilege to the Permittee.

8. Duty to Provide Information

The Permittee shall furnish to the Commissioner, within a reasonable time, any information which the Commissioner may request to determine whether cause exists for modifying, revoking and reissuing, or terminating this Permit or to determine compliance with this Permit. The Permittee shall also furnish to the Commissioner, upon request, copies of records required to be kept by this Permit.

9. Operation and Maintenance of Remedial Systems

The Permittee shall at all times properly operate and maintain all facilities and remedial systems of treatment and control (and related appurtenances) which are installed or used by the Permittee to achieve compliance with the conditions of this Permit and any Long-Term Stewardship Plans applicable to this Facility. Proper operation and maintenance, at a minimum, includes effective performance, adequate funding, adequate operator staffing and training, and adequate laboratory and process controls, including appropriate laboratory quality assurance procedures. This provision requires the operation of backup, auxiliary facilities or similar systems only when necessary to achieve compliance with the conditions of this Permit.

10. Inspection and Entry

The Permittee shall allow the Commissioner, or an authorized representative, upon the presentation of credentials and other documents as may be required by law to:

- (a) Enter at reasonable times upon the Site where a regulated activity is located or conducted, or where records must be kept under the conditions of this Permit;
- (b) Have access to and copy, at reasonable times, any records that shall be kept under the conditions of this Permit;

- (c) Inspect at reasonable times any facilities, equipment (including monitoring and control equipment), practices, operations regulated or required under this Permit; and
- (d) Sample or monitor at reasonable times, for the purposes of assuring Permit compliance or as otherwise authorized by RCRA, any substance or parameters at any location.

11. Security

Pursuant to RCSA Section 22a-449(c)-104 incorporating 40 CFR 264.14, the Permittee shall prevent the unknowing entry, and minimize the possibility for unauthorized entry, of persons or livestock onto the active portion of the Facility. The Permittee shall secure the Facility to the extent necessary to protect human health.

12. Preparedness, Prevention, Contingency Plan and Emergency Procedures

- (a) The Permittee shall comply with the requirements of RCSA Section 22a-449(c)-104(a)(1) incorporating 40 CFR 264 Subpart C “Preparedness and Prevention” and 40 CFR 264 Subpart D “Contingency Plan and Emergency Procedures” until active remediation is complete.
- (b) The Permittee shall ensure that each entity under contract to provide emergency response services at the Facility has a Permit, issued by the Commissioner pursuant to CGS Section 22a-454, authorizing such entity to provide emergency response services. The Permittee shall maintain a copy of such Permit in the operating record for its Facility. The Permittee shall ensure that any action(s) taken by an entity (including such entity’s officers, employees, agents and subcontractors) providing emergency response services at its Facility conforms to the requirements of this Permit.
- (c) The Permittee shall ensure that each entity under contract with the Permittee to provide emergency response services visits the Site annually so that such entity is familiar with the Permittee’s Site and can respond to an emergency. The Permittee shall maintain in the operating record for its Facility a certification, in accordance with the requirements of RCSA Section 22a-449(c)-110 incorporating 40 CFR 270.11, attested to by each emergency response entity under contract with the Permittee to provide emergency response services, stating that such entity has complied with the requirements specified in this paragraph.

13. Monitoring and Records

The Permittee shall ensure that samples and measurements taken for the purpose of monitoring are representative of the monitored activity.

The Permittee shall retain records of all monitoring information, including all calibration and maintenance records and all original strip chart recordings for continuous monitoring instrumentation, copies of all reports required by this Permit (e.g. records from groundwater monitoring including wells and surface elevations), the certification required by RCSA Section 22a-449(c)-104 incorporating 40 CFR 264.73(b)(9), and records of all data used to complete the application for this Permit, for a period of at least three (3) years from the date of the sample, measurement, certification, report or application. This period may be extended by request of the Commissioner at any time. For disposal facilities these records shall be maintained for the post-closure period.

Records for monitoring information shall include:

- (i) The date, exact place and time of sampling or measurements;
- (ii) The individual(s) or company who performed the sampling or measurements;
- (iii) The date(s) analyses were performed;
- (iv) The individual(s) or company who performed the analyses;
- (v) The analytical techniques or methods used; and
- (vi) The results of such analyses.

14. Operating Record

The Permittee shall maintain, in writing, the following information in the Facility's operating record until termination of this Permit:

- (a) Summary reports and details of all incidents that require implementing the Contingency Plan pursuant to 40 CFR 264 Subpart D;
- (b) Records and results of inspections as required by this Permit, except this data need only be kept for three (3) years from the date of any such inspection;
- (c) Monitoring, testing or analytical data, and corrective action where required by 40 CFR 264 Subpart F or any regulatory section noted in 40 CFR 264.73(b)(6);
- (d) All closure and corrective action cost estimates under RCSA Section 22a 449(c) 104 and 40 CFR 264.142 and 40 CFR 264 Subpart H; and

- (e) Any other information required by this Permit or by any applicable law to be maintained in the Facility Operating Record.

15. Signatory Requirements

The Permittee's application and all reports or information submitted to the Commissioner by the Permittee pursuant to this Permit shall be signed by the person specified in and contain the certification prescribed in RCSA Section 22a-449(c)-110 incorporating 40 CFR 270.11 or the licensed environmental professional or licensed professional engineer or other technical environmental professional retained by the permittee to prepare documents to comply with this Permit. .

16. Transfers

This Permit is not transferable to any person without the advanced written authorization of the Commissioner, who may request whatever information the Commissioner deems necessary regarding the potential transferee. Before any such transfer, the Permittee and any proposed transferee shall fully comply with the requirements of CGS Section 22a-60. The Commissioner may require modification or revocation and reissuance of this Permit to change the name of the Permittee and as an incident to any such transfer, incorporate such other requirements, as the Commissioner deems necessary.

In advance of transferring ownership or operation of its Facility prior to the termination of this Permit, the Permittee shall notify the prospective new owner or operator in writing of the requirements of this Permit, 40 CFR 264 through 270, and of the RCSA Section 22a-449(c)100 et al. The Permittee shall provide such prospective new owner or operator with a copy of this Permit.

The Permittee's failure to notify the new Permittee of the requirements of this Permit in no way relieves the new Permittee of his obligations to comply with all applicable requirements.

If the transfer of the property takes place and the Permittee retains this Permit, an access agreement between the Permittee and the prospective new owners of the Facility shall be approved by the Commissioner prior to the sale of the Facility/Site. The agreement shall include the anticipated times, locations and frequency of access needed in order for the Permittee to conduct post-closure care and corrective action activities and conduct inspection, operation and management activities for all remedial systems. A copy of any Operations and Management Plan, referenced in the "Operation and Maintenance of Remedial Systems" Section of this Permit, and any Long-Term Stewardship Plans applicable to this Facility shall be provided to the prospective new owner prior to transfer of the property.

17. Reporting Requirements

- (a) Anticipated Non-Compliance. The Permittee shall give as much advance written notice as possible to the Commissioner of any planned changes in

the Facility or activity, which may result in non-compliance with any requirement of this Permit.

- (b) Compliance Schedules. Except where otherwise provided for in this Permit, reports of compliance and non-compliance with, or any progress reports on, interim and final requirements contained in any Compliance Schedule (Section III) of this Permit, shall be submitted no later than fourteen (14) calendar days following each schedule date, to the extent such reports are required herein.
- (c) 24-Hour Reporting.
 - (i) The Permittee or designee shall verbally report to the Commissioner any remediation or waste related activity at its Facility, irrespective of whether such activity is in compliance with the requirements of this Permit, which does or may pose an imminent and substantial endangerment to human health or the environment, immediately but not later than twenty-four (24) hours from the time the Permittee becomes aware or should be aware of the circumstances causing such endangerment.

The report to the Commissioner shall include:

- (A) Name, address, and telephone number of the Permittee;
- (B) Name, address, and telephone number of the Facility;
- (C) Date, time and type of incident;
- (D) Description of the occurrence and its cause;
- (E) Name and quantity of waste(s) or constituents thereof involved;
- (F) The extent of injuries, if any;
- (G) An assessment of actual or potential hazards to human health and the environment;
- (H) Estimated quantity and disposition of recovered waste that resulted from the incident;
- (I) All information concerning the release of any waste or constituents thereof that may cause an endangerment to public drinking water supplies; and

- (J) All information concerning a release or discharge of waste or constituents thereof or of a fire or explosion from the Facility, which could threaten human health or the environment
- (ii) A written submission shall also be provided within five (5) calendar days of the time the Permittee becomes aware of the circumstances described in subdivision (i) above. The written submission shall contain a description of the endangerment and its cause; the period of endangerment including exact dates and times, if the endangerment has been abated, and if not, the anticipated time it is expected to continue; and steps taken or planned to reduce, eliminate, and prevent reoccurrence of the endangerment. The Permittee shall maintain in the operating record of its Facility a copy of all such written reports. The Commissioner may waive the five (5) day written notice requirement in favor of a written report within fifteen (15) days of the incident requiring reporting.
- (iii) Nothing in this section shall affect or relieve the Permittee of its obligations under CGS Sections 22a-6u or 22a-450.
- (d) Other Noncompliance. The Permittee shall report all instances of noncompliance with this Permit not otherwise required to be reported by this Permit to the Commissioner as part of any other required monitoring report, no later than thirty (30) days of the date the Permittee is aware, or reasonably should have been aware of any such noncompliance. Any such report shall contain, at a minimum, the information listed in the 24-Hour Reporting requirements section of this Permit
- (e) Other Information. When the Permittee becomes aware that it failed to submit any relevant facts or information in a Permit application, or submitted incorrect information in a Permit application, report or other document provided to the Commissioner regarding this Permit, it shall submit such relevant facts or correct information to the Commissioner within thirty (30) calendar days of becoming aware of such facts or information.

18. Computation of Time

- (a) Except as is expressly provided for in this Permit, the computation of time periods set forth in this Permit shall be as follows:
 - (i) Any time period scheduled to begin on the occurrence of an act or event shall begin on the day after the act or event.

- (ii) Any time period scheduled to begin before the occurrence of an act or event shall be computed so that the period ends on the day before the act or event.
- (iii) If the final day of any time period falls on a Saturday, Sunday or a federally or state recognized legal holiday, the time period shall be extended to the next working day.

(b) Submission of Reports. Where this Permit requires the submission of a written report, a notification or other information or documentation to the Commissioner, the report or notification shall be deemed submitted on the date such report, notification or other information is received by the Department.

19. Availability, Retention and Disposition of Records

The Permittee shall ensure that all records required under RCSA Sections 22a-449(c) 100 to 119, the Remediation Standard Regulations or this Permit, including all plans, are furnished upon request, and made available at all reasonable times for inspection, by any officer, employee, or representative of the Department or the United States Environmental Protection Agency (EPA).

The retention period for all records required under RCSA Sections 22a-449(c)-100 to 119 and this Permit is extended automatically during the course of any unresolved enforcement action regarding the Facility or as requested by the Commissioner or the Regional Administrator of EPA.

20. Additional Requirements

Requirements not included in this Permit, which become effective by statute or regulation, and not made specifically inapplicable to facilities with a Permit, shall apply to the Permittee's Facility. In the event of any conflict between this Permit and any such requirement, the Permittee shall comply with the more stringent requirement. If the Permittee does not fully comply with the more stringent requirement, the Department may enforce either requirement.

21. Federal, State and Local Laws

Nothing in this Permit shall be construed to prohibit any federal, state or political subdivision thereof from imposing any requirements to the extent authorized by law which are more stringent than those imposed by this Permit.

In addition, nothing in the Permit shall relieve the Permittee of its obligation to comply with any other applicable federal, state, or local statute, regulation or ordinance.

22. Modification of the Compliance Schedule

The Permittee may request to modify the submittal due dates of the Compliance Schedule (Section III) of this Permit at any time. Such requests shall be submitted for the Commissioner's review and written approval and shall include sufficient justification for such request(s).

The Commissioner may grant extensions of submittal due dates based on the Permittee's demonstration that sufficient justification for the extension exists. Extensions to due dates, which this Permit explicitly defines as being due by a certain time or during a certain time interval, may be granted by the Commissioner if sufficient justification for the extension is demonstrated by the Permittee.

23. Delegation of a Licensed Environmental Professional

The Commissioner may delegate direction and oversight of the long-term stewardship obligations required to be conducted at this facility to a licensed environmental professional (LEP), licensed pursuant to RCSA Section 22a-133v. In that case, the delegated Licensed Environmental Professional shall notify the commissioner of any changes or repairs to monitoring systems necessary to ensure the long-term stewardship obligations remain protective of the human health and the environment.

- (a) In the event the Commissioner revokes the LEP delegation then the Permittee shall ensure all reports and documents required by this Permit are submitted for the Commissioner's review and written approval within the timeframes specified.
- (b) The Permittee shall notify the Commissioner in writing of the identity of any LEP other than one previously identified by the Permittee, within ten (10) days after assigning or retaining any LEP for the purpose of addressing the actions required by this Permit. The Permittee shall submit to the Commissioner a description of the assigned LEP's education, experience and training which is relevant to the work required by this Permit within ten (10) days after a request for such a description has been made. Nothing in this paragraph shall preclude the Commissioner from finding a previously acceptable LEP unacceptable.

F. DEFINITIONS

Any term not otherwise defined herein shall be defined as that term is defined in RCSA 22a-449(c)-100 thru 119 incorporated 40 CFR 264 through 279. Notwithstanding Sections I.E.20 and I.E.21 of this Permit, in the event of any conflict between any of the following definitions and any definition provided in any other applicable legal requirement, the following definitions shall control:

1. “Active Remediation” or “Active Remedial Activities” shall mean the period prior to completion of activity conducted pursuant to Section II of this Permit, with the exception of that period when the only remaining activity are activities such as post-remedial monitoring or monitored natural attenuation.
2. “Annual” with respect to monitoring shall mean that any associated required inspections, sampling, and analysis shall occur no later than December 31st of the calendar year. The results of such sampling and analysis shall be submitted to the Commissioner no later than March 1st of the subsequent year.
3. “Area of Concern” or “AOC” shall mean any area has had a probable release of a hazardous waste or hazardous constituents and that is determined by the Department to pose a current or potential threat to human health or the environment.
4. “Ash Residue Area” means the 7.5-acre area located in the southern section of the property approximately 150 Northwest of Pent Road and Oliver Creek Road that was used for the disposal of ash residue.
5. “Certificate of Completion” shall mean a document recognizing the Commissioner’s determination that all environmental investigation and remediation has been completed and no long-term stewardship obligations remain. This non-regulatory certificate is issued based on the Commissioner’s regulatory determination that a Permit is not needed for the Facility or portion of Facility.
6. “Certificate of Stewardship” shall mean a document recognizing the Commissioner’s issuance of a Long-Term Stewardship Permit for the Facility. This non-regulatory certificate is issued to communicate that the Permit’s purpose is not to authorize commercial waste management operations, and is limited to environmental investigations, remediation, and long-term stewardship obligations.
7. “Constituent of Concern” shall mean a component, breakdown product, or derivative of a substance that may be found in the environment as a result of a release at or from the Facility, or a reaction caused by such a release, and that is determined by the Department to pose a current or potential threat to human health or the environment.
8. “CFR” shall mean the Code of Federal Regulations.

9. “Commissioner” shall mean the Commissioner of Energy and Environmental Protection as defined in the CGS Section 22a-2 or the Commissioner’s duly authorized designee.
10. “Corrective Action” shall mean the process of identifying, investigating, and remediating releases of hazardous constituents to the environment. “Corrective action” and “remediation” may be used interchangeably in this Permit.
11. “Department” or “DEEP” shall mean the Connecticut Department of Energy and Environmental Protection.
12. “Discover,” “Discovery,” or “Discovered” refer to the date on which the Permittee either: (i) visually observes evidence of a new Solid Waste Management Unit (SWMU) or Area of Concern (AOC), (ii) visually observes evidence of a previously unidentified release of hazardous constituents to the environment, (iii) receives information which suggests the presence of a new release of hazardous waste or hazardous constituents to the environment, or (iv) receives information which indicates the presence of a previously undocumented release of hazardous waste or hazardous waste constituents to the environment.)
13. “Environmental Land Use Restriction (ELUR)” or “Environmental Use Restriction (EUR)” shall have the same meaning as those terms are defined in Section 22a-133q-1 of the Regulations of Connecticut State Agencies.
14. “Facility” shall mean, pursuant to 40 CFR 260.10 all contiguous land, and structures, other appurtenances, and improvements on the land, used for treating, storing or disposing of hazardous waste and all contiguous property under control of the owner or operator.

For the purposes of the Permit, Facility shall mean the 82-acre parcel of land located at 25 Pent Road in Wallingford, CT. The Map, Block, Lot/Parcel is Map 175 Lot 1.

A specific, legally definable land parcel that is one of multiple parcels comprising the Facility may separately receive a Certificate of Completion from the Commissioner for only that parcel and portion of the facility. This Certificate of Completion indicates the Commissioner’s approval that all remediation is complete and no long-term stewardship obligations remain for that parcel (as indicated by the issuance of a letter determining that “remediation is complete without controls” and a “certificate of completion”). If such a finding is made then the terms “Site” and “Facility” shall subsequently refer only to the land that no longer includes such parcel.

15. “Final Closure” shall mean the completion of the closure of all Hazardous Waste Management Units at the Permittee’s Facility in accordance with the requirements of this Permit.
16. “Hazardous Waste” or “Hazardous Wastes” shall mean hazardous waste as identified or listed as hazardous waste pursuant to 42 U.S.C. Section 6901 et. seq. and RSCA Section 22a-449(c)-101.

17. “Hazardous Waste Management Unit” or “HWMU” shall mean a contiguous area of land on or in which hazardous waste is placed, or the largest area in which there is a significant likelihood of mixing hazardous waste constituents in the same area and are subject to the closure and post-closure requirements of 40 CFR 264 Subpart G. Examples include: surface impoundment, waste pile, land treatment area, landfill cell, incinerator, a tank, and a greater than 90 day storage area.
18. “Land Disposal Unit(s),” shall mean for the purpose of this Permit, the Metal Hydroxide Sludge Cell Area and Municipal Solid Waste Disposal Areas as defined in this Permit.
19. “Metal Hydroxide Sludge Cell Area” means the 3-acre area located along the northern portion of the Facility that was used for the disposal of approximately 4 million pounds of hazardous wastes (EPA hazardous waste codes K063 and F006) from local industries.
20. “Municipal Solid Waste Disposal Area” means the approximately 36-acre area located in the South Central portion of the Facility that was used by the Town of Wallingford for the disposal of municipal solid wastes.
21. “Permittee” shall mean the person responsible for the overall operation of the facility who has been issued a license by the Commissioner. As used herein “person” is defined in Section 22a-423, Chapter 446k, of the CGS and “license” is defined in Section 4-166, Chapter 54 of the CGS.
22. “Post-Closure Period” shall mean a minimum of thirty (30) years from the date of certification of closure of land disposal units. This period shall be extended or shortened by the Commissioner in accordance with 40 CFR 264.117(a)(2). The Commissioner is extending the Post-Closure Period for a minimum of an additional ten (10) years from the date of this Permit’s issuance, and for as long as this Permit continues in effect, because waste or contamination remains in place. In the event all wastes and contaminated environmental media are removed, an alternate Post-Closure Period may be approved by the Commissioner.
23. “Quarterly” with respect to inspections, sampling and analysis shall mean that the inspections, sampling and analysis shall occur approximately once every three (3) consecutive months in a calendar year (e.g. January, April, July and October). The results of such inspections, sampling and analysis shall be submitted to the Commissioner according to the schedules established in the Long-Term Stewardship Plan(s).
24. “Regulated Unit” shall mean a surface impoundment, waste pile and land treatment unit or landfill that received hazardous waste after July 26, 1982 and is subject to the requirements of 40 CFR 264.91 through 264.100 for detecting, characterizing and responding to releases in the uppermost aquifer.

25. “Remediation” shall mean the process of identifying, investigating, and remediating releases of hazardous constituents to the environment. “Corrective action” and “remediation” may be used interchangeably in this Permit.
26. “Remediation Standard Regulations” (RSRs) means the Connecticut Remediation Standard Regulations as defined in the Regulations of Connecticut State Agencies (RCSA), Sections 22a-133k-1 through 22a-133k-3, adopted January 1, 1996 and amended June 27, 2013 and as otherwise amended.
27. “Semi-annual” with respect to inspections, sampling and analysis shall mean that sampling and analysis shall occur approximately once every six (6) consecutive months in a calendar year (e.g. during January and July, or April and October). The results of such inspections, sampling and analysis shall be submitted to the Commissioner according to the schedules established in the Long-Term Stewardship Plan(s).
28. “Solid Waste Management Area” or “SWMU” shall mean any unit which has been used for the treatment, storage or disposal of solid or hazardous wastes at any time, or any area that has been contaminated by routine or systematic releases of hazardous waste or hazardous constituents and are subject to the corrective action requirements of 40 CFR 264 Subpart F.
29. “Site” shall mean the same or geographically contiguous property which may be divided by public and private right-of-way, provided the entrance and exit between the properties is at a cross-road intersection, and access is by crossing opposed to going along, the right-of-way. Non-contiguous properties owned by the same person but connected by a right-of-way that such person controls and to which the public does not have access, is also considered part of the site property. The terms “Facility” and “Site” may be used interchangeably in this Permit.
30. “Verification” shall mean the rendering of a written opinion by a licensed environmental professional on a form prescribed by the commissioner that an investigation of the parcel has been performed in accordance with prevailing standards and guidelines and that the Facility has been remediated in accordance with the remediation standards.

SECTION II
AUTHORIZED ACTIVITIES

Department of Energy and Environmental Protection

EPA ID No. CTD991288960
Permit No. DEEP/REM/SP/2022-7123

DRAFT

SECTION II AUTHORIZED ACTIVITIES

A. LONG-TERM STEWARDSHIP PLAN(S)

1. Long-Term Stewardship Plan (Post-Closure Care Plan)

The Permittee shall perform post-closure care of the closed solid waste landfill and hazardous waste Land Disposal Units in accordance with the Long-Term Stewardship Plan. The Long-Term Stewardship Plan (Plan) shall identify how to maintain the effectiveness of the Facility's remediation into the future, including, but not limited to, engineered controls, institutional controls, air and water monitoring, ongoing active remediation, passive remediation, and monitored natural attenuation. The Plan shall consist of at least the following:

- a Post Closure Plan, which summarizes the post-closure operations, maintenance, and monitoring obligation for all land disposal units on site, including the monitoring plan for landfill gas systems operations and gas migration monitoring, a description and frequency of the planned maintenance and inspection activities that will be performed to ensure: (A) the integrity of the cap/final cover and/or other containment systems; and (B) the function of the monitoring equipment;
- b Water Quality Monitoring Plan which summarizes post-closure groundwater, surface water, and leachate monitoring frequency and obligations. Such Compliance Monitoring Groundwater Program shall be developed in accordance with the requirements of RCSA Section 22a-449(c)-104 incorporating 40 CFR 264.99. Such water quality monitoring plan shall identify analytical methods, laboratory and sampling protocols, quality control and quality assurance (QA/QC) procedures to be implemented, and the number and volume of samples to be collected at selected locations.
- c Remedial Action Plan, which summarizes previous inspections and monitoring on site, as well as the closure of the disposal areas.
- d Public Participation Plan.
- e Quality Assurance Project Plan
The Permittee shall maintain, subject to the Commissioner's review and written approval, a Quality Assurance Project plan (QAPP), prepared in accordance with US Environmental Protection Agency guidance and incorporating Connecticut's Reasonable Confidence Protocols. The Permittee shall ensure that the data is of sufficient quality to make decisions regarding investigation, potential remediation, and monitoring of the Site.
- f The name, address and phone number of the Facility contact person during the Post-Closure Care Period.

- g A schedule for the reporting requirements, including but not limited to, groundwater monitoring reports, scheduled and unscheduled inspection and maintenance reports, and corrective action reports resulting from inspection and maintenance activities.

The above plans will be collectively referred to in this Permit as “Plans” or the “Long Term Stewardship Plan” and are hereby approved by the Commissioner upon the date of issuance of this Permit.

2. Revisions to Approved Plans

If at any time the Commissioner or the Permittee determines that a revision to an approved Plan is needed or required, the Permittee shall prepare and submit for the Commissioner’s review and written approval a revised Long-Term Stewardship Plan (aka Post-Closure Plan).

The Permittee shall submit a written notification or request for a Permit modification to authorize a change in the approved Long-Term Stewardship Plan (Post-Closure Plan) in accordance with the applicable requirements of RCSA 22a-449(c)-110, incorporating 40 CFR 124 and 40 CFR 270. The written notification or request must include a copy of the amended Plan for the Commissioner’s review and written approval.

3. Copy of Approved Plans

The Permittee shall ensure that a copy of any approved Plan is kept at the Facility or at an alternate location acceptable to the Commissioner, while Long-Term Stewardship is required to maintain the remediation, including until the Post-Closure Care Period has been completed and certified in accordance with the requirements of this Permit. When waste or contamination remains in place the Post-Closure Care Period shall be extended.

B. IMPLEMENTATION OF LONG-TERM STEWARDSHIP PLAN(S)

Upon written approval of a Long-Term Stewardship Plan from the Commissioner, The Permittee shall perform long-term stewardship obligations for remediation systems, engineered controls, institutional controls, and post-closure care of any Hazardous Waste Management Unit and Solid Waste Disposal Area, inclusive of surface and groundwater monitoring, in accordance with approved plans.

1. Ensure Maintenance of Institutional Controls.

Every five (5) years the Permittee shall certify to the Commissioner on a form or in a format acceptable to the Commissioner that the institutional control remains in place and no changes in land use or other use has occurred in violation of the institutional control approved by the Commissioner.

2. Operate and Maintain Remediation Systems, Monitoring Systems, and Engineered Controls

The Permittee shall operate and maintain applicable remediation systems and engineered controls as warranted in accordance with any previously approved Operations and Maintenance Plan for any existing approved engineered control(s) in use at the Facility. In the absence of an existing approved plan, the Permittee shall develop an Operations and Maintenance Plan for any remediation systems or Engineered Controls used to implement the Remedial Action Plan or final remedy for this Facility. The Permittee shall at all times properly operate and maintain all monitoring wells which are installed or used by the Permittee to achieve compliance with this Permit as described in the approved Long-Term Stewardship Plan. Proper maintenance, at a minimum, includes inspections to detect existing and potential problems and adequate funding to maintain proper conditions and repair any problems.

3. Implementation of Water Quality Monitoring Plan

The Permittee shall perform surface water and groundwater monitoring on a frequency specified in the approved Water Quality Monitoring Plan identified in subsection II. C. of this permit and in a manner consistent with RCSA 22a-449(c)-104, incorporating 40 CFR 264.

4. Inspection Obligations

The Permittee shall inspect any remediation systems or engineered controls, such as vapor migration control systems, soil treatment systems, gas collection systems, groundwater treatment and monitoring systems, landfill caps of waste in place and contaminated soil [including any Hazardous Waste Management Unit(s)].

The Permittee shall ensure inspections of remediation systems and engineered controls are performed on a semi-annual basis or another schedule approved by the Commissioner by a registered professional engineer.

Inspections shall look for malfunctions, deterioration, and discharges, which may lead to any release of a substance.

- a The Permittee shall inspect the Land Disposal Units for malfunctions, deterioration, and discharges, which may lead to any release of hazardous or solid wastes. The Permittee shall remedy any deterioration which an inspection reveals, to ensure that the problem does not lead to an environmental hazard. Where a hazard is imminent or has already occurred, remedial action shall be taken immediately.
- b The Permittee shall inspect any remediation systems or engineered controls, such as gas monitoring systems and groundwater treatment and monitoring systems.
- c The Permittee shall, as soon as reasonable, inspect all systems after significant storm events to assess any damage and inventory any needed repairs.

- d For caps, such inspections shall include, but not be limited to:
- (i) Erosion, settling, subsidence or other events that may affect the grading or integrity of an engineered control providing a cap on contaminated soil or waste in place;
 - (ii) Integrity of the final cover materials, soils, and vegetation;
 - (iii) Drainage controls;
 - (iv) Evidence of a release from the capped area, including leachate seeps;
 - (i) Odors and dust control;
 - (ii) Conditions of the access road;

5. Inspection Records

- a The Permittee shall record all inspections in an inspection log. The inspection logs shall include: the date and time of the inspection, the name of the inspector and company or affiliation, a notation of the observations made, and the date and nature of any repairs.
- b Such records shall be kept for at least three (3) years from the date of inspection, or for longer if a more stringent condition applies, and maintained in either an electronic format with a copy available to the Commissioner upon request, or a written copy in the Facility's Operating Record.

6. Maintenance of Final Cover

The Permittee shall ensure that the final cover for the Land Disposal Units is properly maintained and repaired when necessary in accordance with the approved Post-Closure Care Plan. Proper maintenance shall include, but not be limited to, ensuring that:

- a Established vegetation is cut to the proper length to ensure that the root depth is less than six (6) inches.
- b For areas in which erosion has occurred, the lost material shall be replaced and the area re-seeded; and
- c Obstructions to the drainage structures are removed and properly disposed.
- d The Permittee shall maintain systems and remedy any deterioration which an inspection reveals a release has or is likely to occur to ensure that the problem does not lead to an environmental hazard. Where a hazard is imminent or has already occurred, remedial action shall be taken immediately.

7. Landfill Decomposition Gas Monitoring

- a The Permittee shall conduct gas monitoring in accordance with the requirements of 40 CFR 258.23 and, the “Wallingford Landfill Gas Monitoring Plan” (revised October 2004 and approved by CTDEP December 10, 2004), CTDEP is responsible for conducting quarterly gas (methane) monitoring of the Landfill. The monitoring includes all on-site structures and a series of soil gas monitoring probes on the east and north sides of the Landfill. Herein after, “the approved Gas Monitoring Plan.”
- b The Permittee shall perform soil gas monitoring on a quarterly basis as specified in the approved Gas Monitoring Plan, unless otherwise approved in writing by the Commissioner.
- c The Permittee shall submit a written notification or request for a permit modification to authorize a change in the approved Gas Monitoring Plan in accordance with the applicable requirements of 40 CFR 124 and 40 CFR 270. The written notification or request must include a copy of the amended Gas Monitoring Plan for the Commissioner’s review and written approval.

8. Notification Requirements for Newly Discovered Releases

- a The Permittee shall notify the Commissioner in writing of any newly discovered release(s) of solid or hazardous waste or hazardous waste constituents discovered during the course of post-closure care, groundwater monitoring, environmental audits, or other means, within fifteen (15) calendar days of the date of discovery.
- b If the Commissioner determines that further investigation of the Site is needed, the Permittee shall be required to prepare a plan for further investigation within sixty (60) calendar days of notification by the Commissioner.

9. Future Corrective Action

If the Commissioner determines that environmental data indicates the remediation was not effective, or is needed to address newly identified releases, the Permittee shall within one hundred eighty (180) days of the Commissioner’s notice, submit for the Commissioner’s review and written approval, a plan for the additional characterization and corrective action.

10. Completion of Post-Closure Period for a Closed Hazardous Waste Management Unit

Within sixty (60) calendar days after the completion of the Post-Closure Period, the Permittee shall submit to the Commissioner by registered mail, a certification signed by both the Permittee and by an independent registered professional engineer stating that the post-closure care inclusive of surface and groundwater monitoring for any Hazardous Waste Management Unit(s), was performed in

accordance with the specifications in the approved Post-Closure Plan. Documentation supporting the independent, registered professional engineer's certification shall be furnished to the Commissioner upon request. If contamination or waste remains in place the Post-Closure Period will be extended.

11. Modification of Post-Closure Period

If at any time the Commissioner or the Permittee determines that a modification to the Post-Closure Period for the Hazardous Waste Management Unit is needed or required, the Permittee shall prepare and submit for the commissioner's review and written approval a justification in accordance with the requirements of RCSA 22a-449(c)-104, incorporating 40 CFR 264.117(a)(2)(i) to shorten the Post-Closure Period.

12. Miscellaneous

- (a) For any substances reported at or emanating from the Site, for which no remediation criteria has been adopted under the Remediation Standard Regulations, the Permittee shall, in accordance with the Remediation Standard Regulations, submit for the Commissioner's review and written approval a proposal for additional remediation and establishment of criteria for additional polluting substances.
- (b) The Permittee shall not operate the Facility in any manner that stores, treats, or disposes of hazardous wastes or in any way manages hazardous wastes other than hazardous wastes that may be generated during Facility maintenance, authorized closure and/or corrective action activities. Such waste shall be managed in accordance with all applicable regulations. The Permittee shall comply with all applicable requirements of RCSA Section 22a-449(c)-102 incorporating 40 CFR Part 262 "Standards Applicable to Generators of Hazardous Waste."
- (c) Water Quality Monitoring Requirements

C. WATER QUALITY MONITORING PLAN

The Permittee shall conduct all surface and groundwater monitoring in accordance with the approved Water Quality Monitoring Plan.

1. Revised Water Quality Monitoring Plan

- a If at any time the Commissioner or the Permittee determines that a revision to the Water Quality Monitoring Plan is needed or required, the Permittee shall prepare and submit for the Commissioner's review and written approval a revised water quality monitoring plan for the site developed in accordance with the requirements set forth in 40 CFR 264 Subpart F and incorporates surface water monitoring.
- b Upon written notification from the Commissioner, or within 180 days of permit issuance, whichever is sooner, Permittee shall submit for the Commissioner's review and written approval, a supplemental Water

Quality Sampling Plan to evaluate surface water and groundwater at the Facility for per- and polyfluorinated alkyl substances (PFAS). Such plan shall be consistent with RCSA 22a-449(c)-104, incorporating 40 CFR 264, Subpart F.

2. Modifications to Approved Water Quality Monitoring Plan

The Permittee shall submit a written notification or request for a permit modification to authorize a change in the approved Water Quality Monitoring Plan in accordance with the applicable requirements of RCSA 22a-449(c)-110, incorporating 40 CFR 124 and 270. The written notification or request must include a copy of the amended water quality monitoring plan for the Commissioner's review and written approval.

3. Proper Operation and Maintenance

The Permittee shall, at all times, properly operate and maintain all monitoring wells which are installed or used by the Permittee to achieve compliance with this Permit. Proper maintenance, at a minimum, includes inspections to detect existing and potential problems and adequate funding to maintain proper conditions and repair any problems at the Site.

4. Monitoring Frequency

The Permittee shall perform surface and groundwater monitoring in accordance with the schedule in the approved monitoring plan. Upon the Commissioner's approval of the revised Water Quality Monitoring Plan, submitted pursuant to this Permit, the Permittee shall perform surface and groundwater monitoring in accordance with the frequency specified in the approved Water Quality Monitoring Plan.

5. Future Corrective Action Groundwater Monitoring

If the Commissioner determines that the surface and groundwater monitoring data indicate the soil and/or groundwater remediation was not effective, the Permittee shall within one hundred eighty (180) days of the Commissioner's notice, submit for the Commissioner's review and written approval, a plan for additional soil and groundwater characterization and establishment of a corrective action program consistent with the objectives of 40 CFR 264.100.

D. FINANCIAL RESPONSIBILITY

1. Establishment of Financial Assurance

In accordance with RCSA Section 22a-449(c)-104(a)(1), incorporating 40 CFR 264.140, states and the federal government are exempt from the requirements to submit cost estimates for completing the activities required in the permit and to establish and maintain financial assurance. This is because the purpose of financial assurance is to prevent the shifting of environmental clean-up costs to the state or federal government.

In the event this permit transfers to a person that is not the state or federal government then the permit will need to be modified to require the Permittee to provide a written cost estimate, and to establish and continually maintain financial assurance using one or more of the instrument formats prescribed by the Commissioner for closure, post-closure care, investigation and remediation of the Site or areas affected by the Site.

DRAFT

SECTION III
COMPLIANCE SCHEDULE

Department of Energy and Environmental Protection

EPA ID No. CTD991288960

Permit No. DEEP/REM/SP/2022-7123

DRAFT

SECTION III COMPLIANCE SCHEDULE

A. RETAIN ENVIRONMENTAL CONSULTANT OR LICENSED ENVIRONMENTAL PROFESSIONAL (LEP)

Within thirty (30) calendar days of the effective date of this Permit, the Permittee shall retain one or more qualified consultant(s), licensed professional engineer(s) (PE), or LEP(s), acceptable to the Commissioner to oversee the activities and prepare the documents required by this Permit and shall, by that date, notify the Commissioner in writing of the identity of such environmental compliance expert and/or LEPs, consultants. The Permittee shall assign and/or retain such qualified LEP, PE, or consultant, acceptable to the Commissioner, until the Permittee has fully complied with this Permit.

B. CONTINUE IMPLEMENTING LONG-TERM STEWARDSHIP OBLIGATIONS

All conditions set forth in this Section of this Permit, shall be conducted within the defined calendar days of the effective date of this Permit specified for each item. Otherwise, the Permittee may be subject to formal enforcement actions.

C. UPDATE GROUNDWATER MONITORING QUALITY PLAN

Upon written notification from the Commissioner, or within 180 days of permit issuance, whichever is sooner, Permittee shall submit for the Commissioner's review and written approval, a supplemental Water Quality Sampling Plan to evaluate surface water and groundwater at the Facility for per- and polyfluorinated alkyl substances (PFAS). Such plan shall be consistent with RCSA 22a-449(c)-104, incorporating 40 CFR 264, Subpart F.

D. SUBMIT ANNUAL PROGRESS REPORTS

Until all actions required by this Permit have been completed to the Commissioner's satisfaction, the Permittee shall submit a progress report for the Commissioner's review. The report will be prepared on a calendar-year basis. Each such report shall be submitted to the Department no later than March 1st of each year.

Such reports shall, at a minimum:

- Describe the actions which the Permittee has taken in the prior calendar year to comply with the terms and conditions of this Permit;
- Summarize with charts and graphs any exceedances of Remediation Standard Regulations criteria or drinking water action levels detected during monitoring;
- As applicable, identify the measures taken or a proposed schedule for implementing a corrective action plan to correct the cause of any such exceedances of Remediation Standard Regulations or drinking water criteria;

- Summarize the results of any inspections of engineered controls and institutional controls;
- Summarize corrections taken to address deficiencies identified in inspections of remediation systems, engineered controls, and institutional controls;
- Recommend, as appropriate, modifications of groundwater monitoring plans and remedial systems; and
- Identify any planned work for the upcoming year.

The Commissioner may issue a notice of deficiency to require the modification and revision of the Annual Progress Report. The Commissioner may respond to requests for changes in any plans being implemented at the Facility that are included in the Annual Progress Report. The Annual Progress Report shall contain the certification prescribed in RCSA Section 22a-449(c)-110 incorporating 40 CFR 270.11, signed by the Permittee or Permittee's retained Licensed Environmental Professional or Professional Engineer.
