## Section I: Premises Information/Description

### A. PREMISES INFORMATION

Nature of Business: Pipeline Transmission of Natural Gas

Primary SIC: 4922

Facility Mailing Address: Iroquois Pipeline Operating Company  
One Corporate Drive, Suite 600  
Shelton, CT 06484

Telephone Number: 203-944-7023

### B. PREMISES DESCRIPTION

Iroquois Gas Transmission System, L.P. dba Iroquois Pipeline Operating Company (Iroquois) transports natural gas via a 414-mile interstate pipeline system that begins at the U.S. - Canadian border in Waddington, NY through New York State and Western Connecticut to its terminus in Commack, NY, and from Huntington to the Bronx, NY.

The compressor station operates two Solar Turbine, Inc. natural gas fired combustion turbines with dry lean pre-mixed low emission (SoLoNO<sub>x</sub><sup>TM</sup>) combustors for recompressing the pipeline natural gas to ensure that it continues to move along the pipeline at serviceable pressure. The turbines are subject to the Standards of Performance for Stationary Gas Turbines (40 CFR Part 60 Subpart KKKK).

The facility also operates a Caterpillar lean burn emergency generator which is subject to the National Emission Standards for Hazardous Air Pollutants for Stationary Reciprocating Internal Combustion Engines (40 CFR Part 63 Subpart ZZZZ). Provided the engine is only used for emergency purposes and is not otherwise reconstructed or modified, then there are no applicable requirements for the engine pursuant to 40 CFR §63.6590(c) and 40 CFR §60.4230(a)(4)(iv), because it was manufactured before 1/1/2009.

During an emergency, Iroquois is required to blow down and vent natural gas to the atmosphere under Federal Department of Transportation, Pipeline and Hazardous Materials Safety Administration Regulations.

Iroquois is a Title V source because potential Nitrogen Oxides (NO<sub>x</sub>) emissions exceed the major source threshold. Iroquois is located in a severe non-attainment area for ozone as defined in RCSA §22a-174-1(106). The Brookfield Compressor Station is an area source of hazardous air pollutants (HAP).
