AGENDA & NOTES
Welcome and Announcements

Agenda Item(s)
Facilitated by Marianne Engelman-Lado, Yale & VT Law School
1. Update on GC3 Process
   Facilitated by Rebecca French
   • September 22nd to October 31st is new Public Comment Period
     o Delayed to allow for more time for working groups
     o 2-3 hr virtual “Public Forums”
       ▪ First half for overview presentation of working group reports
       ▪ Second hour reserved for concurrent breakout discussions
         • 4-5 breakout rooms for each forum, depending on number of participants
         • People will be able to choose to switch breakout rooms after first 30 mins
       ▪ Progress on Mitigation Strategies Presentation on September 23rd
       ▪ EEJ Presentation/forum on Tuesday October 13th, 4:30-6:30
     o Panel conversation on community perspectives on climate change?
       ▪ Invite members of the GC3 to discuss the personal dimensions to climate impacts as a way of kicking off the public forums
       ▪ Standardize vocabulary around climate change, equipping participants with the knowledge to digest the detailed information in the presentations
       ▪ Monday, September 21st or the Thursday before that, TBD

   Public Comment
   • Alex Rodriguez, CLCV
     o How will information be made available? Will it be made available in multiple languages, and for people who are deaf? How can Spanish speakers or others in the LEP population participate?
       ▪ Edith Pestana: language translation resources available to all departments and there is also an accessibility coordinator assigned.
   • Lee Cruz, Community Foundation for a Greater New Haven
     o In promotional materials, instead of mentioning COVID-19, important to emphasize instead “the circumstances” since social media discussion could be sidelined by mention of the pandemic
   • Marianne Engelman-Lado, Yale and VT Law School
     o Promotional materials are one thing, but how do we integrate the multi-language dimension directly into the meeting itself?

2. Discussion of Draft Written Reports of Subcommittees
   Facilitated by Marianne Engelman-Lado, Yale & VT Law School
   • Mitigation
     Sena Wazer, Sunrise CT, and Denise Savageau, CT Council on Soil & Water Conservation
     o Transportation subcommittee was especially successful in integrating EEJ concerns from the top
       ▪ Other subcommittees need to start off with the EEJ considerations as well
     o Economic perspective often elides externalities
     o [via chat] feel free to email me if you have any other questions/comments/concerns/etc. (sena.wazer@gmail.com)
   • Equity, EJ & Adaptation
     Dr. Mark Mitchell, George Mason University
     o Need for hyperlocal adaptation planning
       ▪ Community members need to lead the development of the adaptation plan
- Need for identification of community groups that have strong grassroots base
  - 2 approaches necessary:
    - Tools for the GC3 to engage (e.g., webinar series)
    - Tools for community residents to engage in the GC3 process, and more broadly with climate adaptation planning
  - Key feedback to be considered:
    - Community foundations need funding
      - Statewide EJ plan needed, and each community needs its own EJ funding
      - **Marianne Engelman-Lado**: those recommendations that have a price tag (e.g., mapping tool, hyperlocal toolkit, and support for outreach) should potentially be lifted up in the report
    - Toolkit needed to help locate disability and EJ advocates
    - EJ Consultants/specialists are needed
      - University-based? NGOs?
      - Collecting storytelling, produce reports, take those to policymaking bodies
        - Experts on EJ and housing, EJ and energy, EJ and transportation, etc.
  - Public Participation
    - **Alex Rodriguez, CLCV**
      - Recommendations listed in Outline link, below and [here](#).
  - Mapping Tool
    - **Marianne Engleman Lado, Yale & VT Law School**
      - Key recommendations:
        - Legislative enactment and financial support
          - Budget number still doesn’t exist, may be developed during public comment period
        - Public-private partnership model for development of tool
          - Role for DEEP and DPH in the tool’s development, but also space for looping in the existing expertise across the state
      - Agreement that there should be an index of relative vulnerability as well as using that index of vulnerability in decision-making as the tool is launched
      - Tool should be made available as a resource for both statewide and local planning and implementation
      - **Denise Savageau**: UCONN CLEAR may be a good resource for the tool and should be looped into this project.

### 3. Development of an Equity & Environmental Justice Report

- Outline:
  - [https://docs.google.com/document/d/1EkkZPGqqRBP5YVJsjpGnk8N0GZM4ETakNqeRrBFLMGs/edit?usp=sharing](https://docs.google.com/document/d/1EkkZPGqqRBP5YVJsjpGnk8N0GZM4ETakNqeRrBFLMGs/edit?usp=sharing)
    - PLEASE add feedback to this outline!

### Next steps:
- Feedback needed on the outline of the EEJ report
  - [https://docs.google.com/document/d/1EkkZPGqqRBP5YVJsjpGnk8N0GZM4ETakNqeRrBFLMGs/edit?usp=sharing](https://docs.google.com/document/d/1EkkZPGqqRBP5YVJsjpGnk8N0GZM4ETakNqeRrBFLMGs/edit?usp=sharing)
- Report due on September 21st
  - Table of Contents and Executive Summary/Introduction can be added to this
- Webinar series starts this Thursday at Noon, close to 300 may participate

**Public comments**
Denise Savageau, CT Council on Soil & Water Conservation
- [via chat] Let's not forget the natural and working lands and science. This work compliments EEJ in dealing with both mitigation and adaptation. Often if it is good for the environment, it is good for people. Part of this is insisting on environmental economic analysis that includes externalities.

Rebecca French, CT DEEP
- [via chat] Another idea along those lines would be to incorporate more EJ and climate justice courses and professors in our state university system. Also potential to integrate into the mission of the land grant university extension system. In Connecticut, these programs have been largely focused on environmental conservation and environmental quality, not environmental health.
