This guide provides a summary of the most pertinent laws and regulations concerning the hunting of migratory birds. No attempt has been made to employ the exact wording of laws and regulations, nor to provide their complete listing. For legal purposes, the Regulations of Connecticut State Agencies and the General Statutes of Connecticut should be consulted.

PLEASE NOTE: Regulations related to hunting may be added or changed during the calendar year. Although we do our best to have the most up-to-date information in this guide, be prepared for changes to occur. The best way to stay current is to check the DEEP website often, especially before hunting seasons start, at <https://portal.ct.gov/DEEP/Hunting/Connecticut-Migratory-Bird-Hunting-Guide>; follow our Facebook page at www.facebook.com/CTFishandWildlife; and subscribe to our free electronic newsletters *Wildlife Highlights* (<https://portal.ct.gov/DEEP-Wildlife-Highlights>) and *Hunter Highlights* (<https://portal.ct.gov/DEEP-Hunter-Highlights>).

New for 2022-2023

The \$13 Connecticut Migratory Bird Conservation (Duck) Stamp is merged with the \$4 Harvest Information Program (HIP) permit into a single \$17 Migratory Bird Conservation (Duck) Stamp. ALL migratory bird hunters (including crow hunters), regardless of age, must purchase the Connecticut Duck Stamp. Hunters under the age of 16 do not need to purchase a Federal Duck Stamp to hunt waterfowl. A 3-day, out-of-state (non-resident) bird hunting license, which costs \$35, allows out-of-state hunters to hunt migratory and resident (non-migratory) game birds for 3 consecutive days. Depending on what species are being hunted, out-of-state hunters still need to purchase a Connecticut Duck Stamp and/or Connecticut Resident (non-migratory) Game Bird Conservation Stamp.

In spring 2022, a Continental waterfowl breeding survey was once again conducted. The Covid-19 pandemic finally eased enough to allow this critical survey to be conducted. This look at actual population statuses will inform just how well the models that allowed us to promulgate hunting seasons the past two years have performed. The general duck season in the Atlantic Flyway is now being set based on the collective status of 4 species (wood duck, ring-necked duck, American green-winged teal, and common goldeneye). This new approach results in a season setting process that much better accounts for all duck populations and the status of waterfowl habitat in the Atlantic Flyway. More information about this this can be found at <https://portal.ct.gov/DEEP/Hunting/Migratory-Bird-Guide/Multi-stock-Harvest-Management-in-the-Atlantic-Flyway>.

The entire Atlantic Flyway is rolling the sea duck bag limit into the regular duck bag and allowing sea duck harvest only during the regular duck season. Further, the total bag limit for sea ducks (scoter, eider, old squaw) is reduced to 4 with no more than 3 of any one species. There will be a one hen eider limit. These changes are in response to continued declines in sea ducks, and the continued Atlantic Flyway goal of reducing overall sea duck harvest in the Flyway by 25%.

Report Violations

*Poaching is stealing! Shooting before or after hours, overbagging, shooting out of season, and rallying birds are all unethical and illegal hunting behaviors. If you see violations, report them to DEEP's 24-hour hotline at **1-800-842-HELP (4357)**. All calls are confidential.*

The bag limit on hooded mergansers has been removed throughout the Atlantic Flyway.

The implementation of a new mallard harvest strategy will determine annual mallard bag limits across the Atlantic Flyway. When conditions are favorable, this strategy will allow the mallard bag limit to be 4 birds. However, for the 2022-2023 season, the mallard bag limit will remain at 2, with 1 hen in the daily bag.

The big change for Connecticut regulations involves the Atlantic Population (AP) Canada goose seasons. The regular season bag limit and season length across the entirety of the AP harvest zones in the Atlantic Flyway remain unchanged (30-day season, 1 bird bag). However, based upon goose distribution data from band returns, a late season will be enacted in the Connecticut AP harvest zone. This new late season targets Atlantic Flyway resident population geese and will begin in late December 2022 and run until February 15, 2023, with a daily bag limit of 5 geese.

Connecticut will be using the entire framework for snipe hunting. Few hunters take advantage of this opportunity and the change allows those that do a bit more time in the field.

Please remember that black duck hybrids are classified as black ducks. With the new change in the mallard bag limit, and to reduce any confusion in the field, this move will reduce the chance of a mistake.

September and Late Canada Goose Seasons

Special September and late Canada goose seasons will again be offered, and no special permit is required for either season. The early season in the North Zone will begin on September 1 and run through September 30. In the South Zone, the season will begin on September 15 and end on September 30. The daily bag limit for the early season is 15, with a possession limit of 45. Shooting hours for the September season are one-half hour before sunrise to one-half hour past sunset, and unplugged shotguns are legal to use. All September goose season hunters must have a federal Duck Stamp and a 2022 Connecticut Migratory Bird Conservation Stamp, which includes the HIP permit.

The late goose season is from January 16, 2023, to February 15, 2023, in the South Zone only (east of the Quinnipiac River). All late season goose hunters must have a federal Duck Stamp, 2023 Connecticut Migratory Bird Conservation Stamp, and 2023 hunting license.

Statewide Youth Waterfowl Hunter Training Days

Connecticut will hold 2 statewide youth waterfowl hunter training days on **Saturday, October 1, 2022 and Saturday, November 5, 2022**. Junior hunters (ages 12 to 15) must have a valid small game junior hunting license and a Connecticut Duck Stamp (which includes the HIP permit), and be accompanied by an adult at least 18 years of age. Sixteen and 17-year-old hunters can participate in the training days, but they must have a valid hunting license, a Connecticut Duck Stamp, and a federal Migratory Bird Conservation Stamp. Adults must possess a valid hunting license; however, they are not allowed to carry a firearm. Ducks, geese, mergansers, and coots may be hunted. Bag limits and shooting hours are the same as for the regular duck and goose hunting seasons.

The Connecticut Waterfowl Association (CWA) sponsors a Waterfowl Hunter Mentoring Program, which pairs up experienced volunteer mentors with youths and

adult novice waterfowl hunters. The goal is to encourage new participants in this great sport, who will then appreciate and help conserve our waterfowl resources. The mentors also have the opportunity to give back to the resource they cherish. Mentors of youths are able to enjoy all aspects of waterfowling (except shooting) during the two Youth Waterfowl Hunter Training Days offered each season when only youths can hunt. More information on this program can be found on CWA's website at www.ctwaterfowlers.org. Information about Junior Hunter Training Days is on the DEEP website at <https://portal.ct.gov/DEEP-Junior-Hunters>.

Connecticut Migratory Bird Conservation Stamp

The 2022 Connecticut Migratory Bird Conservation Stamp, which expires on December 31, 2022, features a wood duck painted by Connecticut Junior Duck Stamp winner, Sophie Archer. The 2023 Migratory Bird Conservation Stamp, which features an Atlantic brant, was also painted by Sophie Archer, the Connecticut Junior Duck Stamp winner for 2022. The 2023 stamp will be valid from January 1, 2023, through December 31, 2023.

2022 Duck Stamp Artist: Congratulations are extended to Sophie Archer, age 18, of Old Lyme, CT, whose acrylic painting of an Atlantic brant was selected as the "Best in Show" for the 2022 Connecticut Junior Duck Stamp Art Competition. This is Sophie's second straight victory. The painting also won first place in the 10th-12th grade age category. Sophie has participated in the Junior Federal Duck Stamp competition from the age of six as a kindergartener. Her love of the arts runs in the family, her mother having graduated from Parson's School of Design, and her grandmother and sister both studying art and working as artists and designers in New York City. Aside from painting, Sophie studies ballet and enjoys baking, pottery, history, and classical literature. Having grown increasingly focused over the years on moving closer to and preserving nature, she feels particularly strongly about the conservation aspect of the Duck Stamp competition and the CWA's and DEEP's mission to preserve and protect the habitat of Connecticut's wildlife. She feels honored for the opportunity to participate in this ever-growing and ever important project. (The Connecticut Waterfowl Association sponsors and holds the annual Junior Duck Stamp Competition.)

Sophie's artwork will be featured on the 2023 Connecticut Migratory Bird Conservation (Duck) Stamp. The change to using the Junior Duck Stamp winning art insures that a Connecticut artist represents our state Duck Stamp. Further, the school curriculum associated with the Junior Duck Stamp Contest is geared towards waterfowl and wetland conservation. This helps foster an appreciation for the species being painted by the students and, hopefully, provides students with a better connection to the natural world. With Sophie "graduating" from the Junior ranks, we are looking forward to crowning a new winner in the 2023 contest.

The Junior Duck Stamp Contest is divided into four age groups spanning from kindergarten through high school. Winners in each age group are then judged against each other to determine the overall state winner. Evelyn Tuccio, age 5, of Danbury, won the K-3rd Grade age group with her portrayal of a ruddy duck. Adele Morgan, age 10, of Simsbury, won the 4th-6th Grade age group with a depiction of a long-tailed duck. This was Adele's second straight win in her age group. Chloe Hunske, age 14, from Cos Cob, won the 7th-9th Grade age group with a drawing of a king eider. Sophie Archer (overall winner) won the 8-12th Grade age group with her Atlantic brant painting.

All migratory bird hunters (waterfowl, woodcock, snipe, rail, and crow), including 12 to 15-year-olds, are required to purchase and carry the current Connecticut Migratory Bird Conservation Stamp, and hunters 16 years and older are required to purchase and carry the federal Duck Stamp. However, conservationists, stamp collectors, and others may also purchase stamps in support of wetland habitat conservation. Revenue from the sale of Migratory Bird Conservation Stamps is a major source of funding for wetland restoration projects in our state. Since 1994, Connecticut Migratory Bird Conservation Stamp funds have been used to restore and enhance over 3,145 acres of wetlands, encompassing nearly 50 sites, mostly on state-owned wildlife management areas. Funds also have been used to purchase specialized large equipment to conduct extensive marsh restoration work, particularly along the coast.

The Connecticut Migratory Bird Conservation Stamp (which also includes the HIP permit) can be purchased for \$17 wherever hunting and fishing licenses are sold: participating town clerks and retail agents, and through the Online Outdoor Licensing System (<https://portal.ct.gov/CTOutdoorLicenses>). The stamp is \$9 for hunters aged 12 to 17 years old. Upon request, stamps can be sent through the mail.

Federal Migratory Bird Conservation Stamp

All waterfowl hunters age 16 and older are required to purchase and carry the current federal Duck Stamp (also known as the Migratory Bird Conservation and Hunting Stamp). Proceeds (98%) from federal Duck Stamps go into the Migratory Bird Conservation Fund, which supports the purchase of wetlands for inclusion into the National Wildlife Refuge System. To date, federal Duck Stamp funds have been used to acquire over 6 million acres of critical habitat at hundreds of refuges in nearly every state in our nation. In Connecticut, 39% of the acreage of the Stewart B. McKinney National Wildlife Refuge was purchased with federal Duck Stamp funds. Federal Duck Stamps can be purchased for \$25 each at most post offices. They also are available by telephone or online. Go to www.fws.gov/duckstamps for more information. Stamp must be signed in ink across its face.

Falconry Seasons

Falconers possessing valid permits (state and federal falconry permits, Connecticut small game license, Connecticut Migratory Bird Conservation Stamp, and federal Duck Stamp) may take migratory game birds during any established migratory game bird season. Allowable species for falconry are: ducks, coots, mergansers, and sea ducks (see season dates on pages 10-11), as well as woodcock, snipe, and rails (see season dates on page 12). Species-specific bag limits do not apply to falconry take. However, the daily bag limit for falconry is 3 migratory game birds in aggregate per day and 6 in possession. The daily and possession limit may contain any species that is legal during any regulated firearms migratory game bird season. The falconry bag limit is not in addition to gun limits.

Hunter Ethics and Waterfowl Hunting in Urban Settings

As Connecticut becomes more urbanized, a smaller percentage of the population participates in hunting and is familiar with the traditions and values associated with hunting. The image individual hunters portray to the non-hunting community is often the image placed upon the hunting community as a whole. Thus, the way hunters present themselves is very important to the future of the hunting tradition.

Due to the high visibility areas that some waterfowlers use, particularly along the coast, it is imperative that hunters maintain the highest integrity and remain responsible while out in the field. Waterfowl hunting along the Connecticut coast is a long-running, cherished tradition. It has taken place for many years in close proximity to areas of high human use. For the most part, there have been very few conflicts. However, in recent years, some negative encounters have occurred between waterfowl hunters and the non-hunting public. The CWA has devised a list of tips through their "Hunt Smart" program aimed at ways waterfowlers can minimize the concern the non-hunting public may have about hunting. More information about this program can be found on the CWA website at www.ctwaterfowlers.org/hunt-smart.html.

If you choose to hunt in areas that are in the public eye, you must exercise unquestioned ethical hunting practices, avoid conflicts with the non-hunting public, and use common sense. If you do not, the alternative is clear ... hunting opportunities will be greatly reduced.

To conduct yourself in an ethical and responsible manner, you should:

1. Respect property and landowners. Always obtain permission to hunt on private land – this is a legal requirement in Connecticut.
2. Know and obey the laws.
3. Hunt safely. Shoot in a safe direction. Treat all guns as loaded. Always dress appropriately and be prepared for changes in the weather.
4. Avoid potential conflicts with non-hunters.
5. Respect the environment and wildlife.
6. Do not "skybust." Calling waterfowl in to appropriate gun range is one of the greatest challenges and rewards of waterfowling.
7. Do not shoot ducks on the water.
8. If a nearby hunting party is working birds, do not call those birds to you.

Hunting is a privilege, not a right. The hunting privilege you enjoy could be curtailed due to the unethical and unsportsmen-like actions of a few hunters.

Waterfowl Hunter Water Survival Tips

Why do some waterfowl hunters lose their lives by drowning? Drownings occur because the victim made the wrong decision; did not realize the dangers of boating in rough, cold water; was not properly prepared; had the wrong equipment; or failed to wear a life jacket, also known as a personal floatation device (PFD).

Victims of small boat accidents often did not realize that small watercraft can be extremely unstable. Once a waterfowl hunter falls overboard into cold, rough water, the chances for survival are slim. Cold water kills – even those in excellent condition who know how to swim.

The vast majority of those who die in boating accidents were not wearing a PFD. A PFD could save a person's life, but it will be of little use if it is not worn and does not fit properly. Connecticut boating law states that anyone on board a manually propelled craft between October 1 and May 31 must wear a life jacket at all times. The life jacket must be a Type I, II, III, or V-Hybrid. DEEP recommends all persons boating on cold waters wear a life jacket. Following is important information waterfowl hunters need to keep in mind if they plan to use a boat to hunt:

Boating Safety Checklist

- **Always leave a FLOAT PLAN with someone ashore. Be specific about where you are going and when you expect to be back. Make sure you report in when you return.**
- Know the weather forecast, particularly wind and wave conditions.
- One PFD for each occupant of the boat.
- Throwable ring bouy or floatation device
- Emergency gear-flares, whistle, and air horn
- Extra anchor
- Oars
- Bailing bucket
- First aid kit
- Tool kit
- Extra propeller
- Extra clothes in a waterproof bag
- VHF radio or cellphone that is waterproof
- Compass
- Do NOT drink alcohol.

Loading the Boat and Under Power

- **ALWAYS wear your PFD.**
- Hand equipment, decoys, etc., to someone already in the boat.
- Do not board the boat with hands occupied with gear.
- Make sure weight is evenly distributed throughout the boat, this includes you and your dog!
- Keep center of gravity in boat low. Do not stack equipment high as this can lead to instability.
- Stow and tie down all loose anchor lines and bow lines to avoid tripping and to keep the lines from getting caught in the propeller.

- Keep track of your dog.
- Keep navigation lights on.

Kayaking/Canoeing and Hunting

- **ALWAYS wear your PFD (required by state law from October 1 through May 31).**
- Be aware of weather conditions and know your limitations.
- Always steer into boat wakes or waves in a perpendicular manner.
- Never stand in a kayak or canoe.
- Do not overload your kayak or canoe with gear.
- All manually propelled vessels must have a noise-producing device (e.g., whistle) on-board.

Cold Water Boating

- **ALWAYS wear your PFD.**
 - 88% of boating deaths are from drowning.
 - 90% of these are from people not wearing a PFD.
- Dress in layers.
- Wear synthetic fabrics or wool.
- Wear a hat; over 50% of heat loss is through the head.
- If shooting from the boat, stay seated.
- Keep lower unit of motor in water to keep it from freezing.
- Mind your dog and make sure it remains still and does not create added instability.

If You Fall in the Water

- Do not panic! After the initial shock, take a deep breath and think – assess the situation.
- Unless you are close to shore or in a safe spot, do not swim as you will waste valuable heat and energy.
- If you are in waders, float on your back and keep your feet elevated.

Those who operate boats in Connecticut that are required to be registered, documented, or numbered must obtain a Safe Boating Certificate. In order to meet the requirements for a certificate, an individual must successfully complete an approved basic boating course or receive a passing grade on an equivalency examination administered by DEEP. The *Connecticut Boater's Guide* is a handbook of boating laws and regulations, registration information, and guidelines for safe boat operation. Guides can be obtained from DEEP and Department of Motor Vehicle offices, marinas, towns halls, and on the DEEP website at <https://portal.ct.gov/deep/Boating/Boating-and-Paddling>.

Access Restrictions Due to Heightened Security

Waterfowl hunters are reminded that restrictions are in place in many areas due to heightened security concerns. Of note, per the United States Coast Guard:

1. No boat may be anchored within 25 yards of any bridge along any navigable waterway.

2. There is a 700-yard security zone around the Millstone Power Plant in Niantic.
3. No boats are allowed within 1,500 feet of the downstream side of the Shepaug and Lake Housatonic Dams (Derby/Shelton); 700 feet of the downstream side of the Stevenson Dam (Oxford/Monroe); 300 feet of the downstream side of the Bleachery Dam (New Milford); and 300 feet upstream of all these dams.

How Annual Waterfowl Regulations Are Set

The annual process of setting migratory gamebird hunting regulations in the United States begins in January and ends in September and is based on a system of resource monitoring, data analyses, and regulation development. Hunting regulations for ducks, geese, woodcock, mourning doves, and other migratory gamebirds are set annually and based on the population status of each species. Estimates of both the number of birds and hunting harvests are needed to monitor and ensure appropriate and sustainable populations of each species.

Each year, surveys, such as the waterfowl breeding pair, woodcock singing ground, and dove call count, are conducted. The results of these various surveys are used to assess the populations. In addition, leg banding of various waterfowl species and others, such as mourning doves, is used to determine harvest and survival rates for use in harvest and population models. Information on hunter numbers and harvests is obtained from the HIP Program. Habitat conditions also are annually assessed across the waterfowl breeding ranges of North America.

All these data are analyzed annually by the biologists of each of the 4 Flyway Councils (Atlantic, Mississippi, Central, and Pacific). The councils develop waterfowl and other migratory gamebird hunting regulation proposals, which are, in turn, submitted to the U.S. Fish and Wildlife Service (USFWS) for evaluation and approval or denial.

After extensive public review, the USFWS Regulations Committee (SRC) sets migratory bird hunting regulations by establishing the frameworks, or outside limits, for season lengths, bag limits, and areas for migratory bird hunting. For example, the current duck hunting season frameworks in the Atlantic Flyway are a 60-day season with a 6 bird daily bag limit that must occur between the Saturday nearest September 24 and the last Sunday in January. Individual states may then choose their hunting seasons from within those frameworks. States can be more restrictive than the allowable framework, but never more liberal.

On the heels of a Supplemental Environmental Impact Statement (2013), regulations for hunting seasons are now based on data from the previous year, not the current year. Canada has been setting duck hunting regulations in this manner for many years, and woodcock hunting seasons are currently set in this manner. Movement towards this system will simplify the annual regulations process. Also, because of many years of monitoring and research, the waterfowl management community is confident that moving in this direction will cause little risk to the resource.

Regardless of what data are used, the setting of waterfowl hunting seasons and regulations is a balancing act. Hunters request different season dates, bag limits, shooting hours, etc., depending on the species they want to pursue and when they want to pursue them. Hunters appear to want maximum hunting opportunity. DEEP's challenge is to balance these demands with the ability of waterfowl populations to remain healthy over the long-term. This is never easy and will likely become more difficult in the future.

Explaining Migrant Canada Goose Seasons

Three distinct populations of Canada geese are present in Connecticut during fall, winter, and early spring – the AP, North Atlantic Population (NAP), and AFRP. The AP nests in northern Quebec and winters from Massachusetts southward to North Carolina, although primarily in the Chesapeake region of the Atlantic Flyway. The NAP breeds in the Canadian Maritime Provinces and western Greenland, and winters primarily in southern New England and eastern Long Island. The AFRP geese breed throughout Connecticut, but are at their highest densities in the more urbanized areas of the state where hunting exposure is low.

As AFRP goose numbers began to expand throughout Connecticut, so did the number of nuisance complaints. As such, Connecticut was the first state in the nation to establish a season specifically designed to harvest AFRP geese while ensuring a minimal harvest of migrant Canada geese. This special late season began in 1986 and continues today, with minor modifications, in the South Zone. A similar September season was established in 1996 to target AFRP geese before migrant geese arrive in the state. These special seasons are monitored through the analysis of band recovery data and neck collar observations.

The status of migrant goose populations drives the regular goose season regulations in the Atlantic Flyway. In 1995, the U.S. Fish and Wildlife Service (USFWS) closed the regular Canada goose season in the Atlantic Flyway because the AP breeding pair estimate declined to such low levels that it was evident that the AP could not support any sport harvest. The AP season was closed in Connecticut until 1999. The presence of large numbers of NAP geese in New England led to the initiation, in 1998, of migrant Canada goose hunting once again in Connecticut. This season was only offered in certain areas of the state and targeted NAP geese. 1998 marked the first year that the USFWS separated the AP from the NAP during regular goose hunting seasons. In Connecticut, band return data and neck collar observations indicate that AP geese occur primarily in Litchfield County and western Hartford County, whereas NAP geese tend to be found east of the Connecticut River, predominantly in Windham and New London Counties. Thus, due to the presence of 3 different goose populations in Connecticut, the state has been divided into 3 goose hunting zones, each with different regulations, based on the status of the population and the overall management goal for each population. As data are compiled and analyzed, changes are made accordingly.

Avian Influenza

What is it? Avian influenza is a naturally occurring virus. Type A viruses (referred to as avian influenza or “bird flu”) cause infection in birds, humans, and some other mammals, such as pigs. There are 144 identified subtypes (strains) of Type A influenza. Wild birds, especially shorebirds and waterfowl, are the natural host for all the known strains of Type A influenza viruses. Most strains of Type A influenza are low pathogenic. Typically, wild birds do not become sick when they are infected with avian influenza A viruses, and humans are not affected either. Sometimes, however, the virus is introduced into a new host, such as domestic poultry, and evolves into a more lethal high pathogenic (HPAI) strain.

In the winter of 2021-2022, a large number of HPAI cases were detected throughout the Atlantic and Mississippi Flyways. HPAI was detected at five sites in Connecticut, and it is assumed that HPAI is widespread throughout the state. The CT DEEP, CT Department of Agriculture, and U.S. Department of Agriculture

Open Waterfowl Seasons and Bag Limits

Changes from 2021 are highlighted in bold (All Dates Inclusive - Except Sundays)

NORTH ZONE: The portion of the state north of Interstate 95; *SOUTH ZONE*: The portion of the state south of Interstate 95.

SHOOTING HOURS: One-half hour before sunrise to sunset, **except for the September Goose Season, when shooting hours end one-half hour past sunset.**

SPECIES	SEASON	NORTH ZONE	SOUTH ZONE	DAILY BAG LIMIT	POSSESSION LIMIT	
DUCKS, MERGANSERS, and COOTS	Early	Oct. 8 - Oct. 15	Oct. 8 - Oct. 12	DUCKS 6 ^{A,B,C}	18 ^{A,B,C}	
	Late	Nov. 11 - Jan. 11	Nov. 18 - Jan. 21	COOTS 15	45	
SCAUP		Oct. 8 - Oct. 15	Oct. 8 - Oct. 12	1	3	
		Nov. 11 - Dec. 17	Nov. 18 - Dec. 29	1	3	
		Dec. 20 - Jan. 11	Dec. 30 - Jan. 21	2	6	
CANADA GEESE ^D	September Early Season	Sept. 1 - Sept. 30	Sept. 15 - Sept. 30	15	45	
	REGULAR SEASONS	AP Unit ^E	Oct. 10 - Oct. 15 Nov. 11 - Dec. 8		1	3
		AP Late Season ^E	Dec. 21 - Feb. 15		5	15
		AFRP Unit ^F	Oct. 8 - Oct. 15 Nov. 11 - Dec. 7 Dec. 21 - Feb. 15	Oct. 8 - Oct. 15 Nov. 11 - Dec. 7 Dec. 21 - Feb. 15	5	15
		NAP-H Unit ^G	Oct. 8 - Oct. 15 Nov. 11 - Jan. 11	Oct. 8 - Oct. 15 Nov. 11 - Jan. 11	2	6
		NAP-H Late Season ^H		Jan. 16 - Feb. 15	5	15
SNOW GEESE (includes BLUE GEESE)		Oct. 1 - Jan. 14 Feb. 21 - Mar. 10	Oct. 1 - Nov. 30 Jan. 6 - Mar. 10	25	No limit	
BRANT		Nov. 15 - Jan. 11	Nov. 25 - Jan. 21	2	6	

^A Includes all species of ducks (**including sea ducks**), with the following restrictions: **SCAUP**: see table. **MALLARD**: daily limit 2 and may include only 1 HEN. **WOOD DUCK**: daily limit 3. **BLACK DUCK**: daily limit 2. **REDHEAD**: daily limit 2. **PINTAIL**: daily limit 1. **CANVASBACK**: daily limit 2. **HOODED MERGANSER**: daily limit 2. Possession limits are three times the daily bag limit. **SEASON FOR HARLEQUIN DUCKS IS CLOSED.**

^B **All merganser species are included in the aggregate duck bag of 6. There is no species specific bag limit for mergansers.**

^C **SEA DUCKS ARE INCLUDED IN THE TOTAL DUCK BAG. Daily limit for sea ducks is 4 and may include no more than 3 SCOTERS, 3 OLDSQUAW, 3 EIDER (1 hen), 12 in possession.**

^D Daily bag limit includes white-fronted geese.

^E AP Unit: Litchfield County and the portion of Hartford County, west of a line beginning at the Massachusetts border in Suffield and extending south along Route 159 to its intersection with I-91 in Hartford, and then extending south along I-91 to its intersection with the Hartford/Middlesex County line (Wethersfield/Cromwell) (see back cover).

^F AFRP Unit: All of the rest of the state not included in the AP or NAP descriptions (see back cover). **A list of towns by goose zone is on the DEEP website at <https://portal.ct.gov/DEEP/Hunting>.**

^G NAP-H Unit: That part of the state east of a line beginning at the Massachusetts border in Suffield and extending along Route 159 to its intersection with I-91 in Hartford and then extending south along I-91 to State Street in New Haven. South along State Street to Route 34. West on Route 34 to Route 8 to Route 110, south along Route 110 to Route 15, north along Route 15 to the Milford Parkway, south along the Milford Parkway to I-95, north along I-95 to the intersection with the east shore of the Quinnipiac River, south to the mouth of the Quinnipiac River and then south along the eastern shore of the New Haven Harbor to the Long Island Sound (see back cover).

^H The portion of the South Zone east of the Quinnipiac River.

The Connecticut Migratory Bird Conservation Stamp is required to hunt for woodcock, snipe, rails, and crows.

Shooting hours for woodcock, snipe, and rail seasons:

One-half hour before sunrise until sunset.

Snipe Season

September 1 – December 31, 2022

	Daily Limit	Possession Limit
Snipe	8	24

Rail Season

Sept. 5 – Oct. 15 and Oct. 22 – Nov. 30, 2022

	Daily Limit	Possession Limit
Virginia and Sora Rails	25	75
Clapper and King* Rails	10	30

**Only 1 of the daily bag limit may be a king rail*

Woodcock Season

Oct. 19 – Nov. 19 and Nov. 22 – Dec. 10, 2022

	Daily Limit	Possession Limit
American Woodcock	3	9

Crow Season

Crow hunting allowed only on certain days:

Aug. 13 - Oct. 7, 2022:	Wednesdays, Fridays, Saturdays
Oct. 15 - Nov. 30, 2022	Wednesdays, Fridays, Saturdays
Jan. 14 - March 25, 2023	Mondays through Saturdays

Shooting hours for crows: One-half hour before sunrise until one-half hour after sunset.

While crow hunting from a stationary position, a hunter is exempt from the fluorescent orange clothing regulation.

continue to conduct surveillance throughout the state on waterfowl and poultry. If hunters observe dead waterfowl, particularly Canada geese which are very susceptible to the HPAI strains, or waterbirds, raptors, or large >5 mortality events, report those on the DEEP website at <http://www.cfwildbirdmortalityreporting.ct.gov/> or by calling 860-424-3011.

Should hunters be concerned? The highly pathogenic avian influenza (HPAI), often referred to as bird flu, is not easily transmitted to animals other than birds. It has resulted in massive mortality in commercial turkeys and laying chickens in the western and midwestern U.S. Regardless that transmission has not occurred between wild birds and humans, hunters should take basic precautionary measures, if they do not already, when handling harvested waterfowl:

1. Do not handle birds that are obviously sick or birds found dead.
2. Keep your game birds cool, clean, and dry.
3. Do not eat, drink, or smoke while cleaning your birds.
4. Use rubber gloves when cleaning game.
5. Wash your hands with soap and water or alcohol wipes after dressing birds.
6. Clean all tools and surfaces immediately afterward; use hot soapy water, then disinfect with a 10% chlorine bleach solution.
7. Cook game meat thoroughly (165°F) to kill disease organisms.

Contaminants in Waterfowl

Studies conducted in Pennsylvania and New York have shown that some samples from mergansers, especially common and red-breasted, had high levels of contaminants, including PCBs. Mergansers feed primarily on fish that may concentrate contaminants. Other studies have shown that diving ducks (e.g., scaup, bufflehead, goldeneye) also may have high levels of contaminants; dabbling ducks (e.g., mallards, black ducks, teal, wigeon, gadwall) generally have lower levels; and wood ducks and Canada geese are the least contaminated.

Many sportsmen are aware of health advisories regarding high PCB concentrations in ducks from Massachusetts (Canada geese were **not** included in those advisories). Sportsmen and their families that want to minimize any potential exposure to contaminants should limit their consumption of mergansers and other waterfowl and remove the skin and fat before cooking. This consideration is especially important for pregnant women due to the effects of PCBs on reproduction.

Removing the skin from the breasts of waterfowl substantially reduces the amount of contaminants. If birds are stuffed, the stuffing should not be consumed. Drippings should not be used for gravy. If you would like more information regarding the health effects of PCBs, call the Connecticut Department of Public Health at 860-509-7742.

Federal Regulations

The material below is only a summary. A more detailed summary of the federal regulations can be found on the DEEP website at <https://portal.ct.gov/DEEP/Hunting>. Each hunter should also consult the actual federal regulations which may be found in Title 50, Code of Federal Regulations (CFR), Part 20. In addition to state regulations, the following federal rules apply to the taking, possession, shipping, transporting, and storing of migratory game birds.

Restrictions. Unless specifically authorized for a special season, no person shall take migratory game birds:

- With a trap, snare, net, rifle, pistol, swivel gun, shotgun larger than 10-gauge, punt gun, battery gun, machine gun, fishhook, poison, drug, explosive, or stupefying substance.
- With a shotgun capable of holding more than three shells, unless it is plugged with a one-piece filler which is incapable of removal without disassembling the gun.
- From a sink box (a low floating device, having a depression affording the hunter a means of concealment beneath the surface of water).
- From or with the aid or use of a car or other motor-driven land conveyance, or any aircraft, except that paraplegics and single or double amputees of legs may take from any stationary motor vehicle or stationary motor-driven land conveyance. "Paraplegic" means an individual afflicted with paralysis of the lower half of the body with involvement of both legs, usually due to disease or injury to the spinal cord.
- From or by means of any motorboat or sailboat, unless the motor has been completely shut off and/or the sail furled, and its progress therefrom ceased. However, crippled ducks in tidal waters seaward of the first upstream bridge may be taken under power.
- By the use or aid of live decoys. All live, tame, or captive ducks and geese shall be removed for a period of 10 consecutive days prior to hunting and confined within an enclosure which substantially reduces the audibility of their calls and totally conceals such tame birds from the sight of migratory waterfowl.
- By the use of recorded or electronically amplified bird calls or sounds, or electronically amplified imitations of bird calls or sounds.
- By driving, rallying, or chasing birds with any motorized conveyance or sailboat to put them in the range of hunters.
- By the aid of baiting (placing feed such as corn, wheat, salt, or other feed to constitute a lure or enticement), or on or over any baited area where a person knows or reasonably should know that the area is or has been baited. Hunters should be aware that a baited area is considered baited for 10 days after the removal of the bait.

Closed Season. No person shall take migratory game birds during the closed season.

Shooting Hours. No person shall take migratory game birds except during the hours open to shooting as prescribed.

Daily Bag Limit. No person shall take in any one day more than one daily bag limit.

Field Possession Limit. No person shall possess more than one daily bag limit while in the field or while returning from the field to one's car, hunting camp, home, etc.

Wanton Waste. All migratory game birds killed or crippled shall be retrieved, if possible, and retained in the custody of the hunter in the field.

Tagging. No person shall give, put or leave any migratory game birds at any place or in the custody of another person unless the birds are tagged by the hunter with the following information: 1) The hunter's signature; 2) The hunter's address; 3) The total number of birds involved, by species; and 4) The dates such birds were killed.

No person or business shall receive or have in custody any migratory game birds belonging to another person unless such birds are properly tagged.

Possession of Live Birds. Wounded birds reduced to possession shall be immediately killed and included in the daily bag limit.

Dressing. No person shall completely field dress any migratory game bird and then transport the birds from the field. The head or one fully feathered wing must remain attached to all such birds while being transported from the field to one's home or to a migratory bird preservation facility.

Shipment. No person shall ship migratory game birds unless the package is marked on the outside with: (a) the name and address of the person sending the birds, (b) the name and address of the person to whom the birds are being sent, and (c) the number of birds, by species, contained in the package.

Importation. For information regarding the importation of migratory game birds killed in another country, hunters should consult Title 50, CFR, 20.61-20.66. One fully feathered wing must remain attached to all migratory game birds being transported between the port of entry and one's home or to a migratory bird preservation facility. No person shall import migratory game birds belonging to another person.

Federal Migratory Bird Hunting and Conservation Stamp. The law requires that waterfowl hunters 16 years of age and older must carry on their person a valid federal Migratory Bird Hunting and Conservation Stamp (Duck Stamp) signed in ink across the face. A federal duck stamp is **not** required to hunt woodcock, snipe, coot, rail, or gallinule.

Dual Violation. Violation of state migratory bird regulations is also a violation of federal regulations.

Reference. Federal regulations related to migratory game birds are located in Title 50, CFR, Part 20.

Caution. More restrictive regulations may apply to national wildlife refuges open to public hunting. For information, contact the U.S. Fish & Wildlife Service at 413-253-8274.

Connecticut Regulations

1. While hunting migratory game birds, all hunters must have valid Connecticut Migratory Bird Conservation Stamp authorization on their license or have in their possession a Connecticut Migratory Bird Conservation Stamp signed in ink across the face of the stamp. **A stamp IS REQUIRED to hunt waterfowl, woodcock, snipe, rails, and crows.**
2. **Only the following shot shall be used for hunting waterfowl, coots, and rails:** (1) non-toxic steel shot no larger than BB steel, or (2) any other federally-approved non-toxic shot type, such as bismuth-tin alloy, tungsten iron, tungsten polymer, tungsten matrix, or tungsten-nickel-iron (Hevishot) shot no larger than #2. No person may possess lead shot while waterfowl hunting.
3. Crows may be hunted with shotguns holding more than 3 shells. There are no non-toxic shot requirements for hunting crows.
4. Hunting, shooting, or carrying of loaded firearms within 500 feet of any building occupied

- by people or domestic animals or used for storage of flammable material, or within 250 feet of such buildings when waterfowl hunting in tidal areas from land shooting positions or from floating blinds anchored adjacent to land or from rock positions, is prohibited, unless written permission from lesser distances is obtained from the owner and carried. Landowners, their spouses, and lineal descendants are exempt from this restriction, providing any building involved is their own.
5. Shooting toward any person, building, or domestic animal when within range is prohibited.
 6. All waterfowl hunting on state-controlled lands and water of Great Island, in Old Lyme, and Ragged Rock, in Old Saybrook, shall be from temporary waterfowl hunting blinds only, except that cripples may be recovered by shooting within the area open to hunting.
 7. Boats left unattended at DEEP lands must be marked so that identification of the owner can be made.
 8. No person shall kill or wound any waterfowl without making a reasonable effort to retrieve the bird. Any bird which is killed or wounded and not retrieved shall count in the daily bag total.
 9. A hunting party shall include no more than six individuals, with a minimum distance of 100 yards between parties.
 10. No person may construct or place any permanent blind or structure for hunting of waterfowl on state-controlled lands or waters.

Local Regulations

DEEP has closed certain areas to waterfowl hunting or imposed additional restrictions at some sites. These actions are taken when DEEP finds that the physical setting of a particular locality presents an unreasonable risk that hunters may violate the regulations regarding minimum distances to dwellings or the regulations regarding shooting toward dwellings or people. Become familiar with these local sites and always use good judgment when hunting near any populated area. Areas closed to waterfowl hunting are delineated in black on the Connecticut Hunting Areas Map, which can be found at <https://portal.ct.gov/DEEP/Hunting> (you can zoom in to view the areas). Maps also are available upon request at 860-424-3011. **Just because an area is not specifically listed here does NOT mean it is open to waterfowl hunting. Hunters must always comply with existing regulations regarding minimum distances from dwellings and shooting towards persons, buildings, and domestic animals within range.**

1. Waterfowl hunting is permitted at Selden Neck Natural Area Preserve in Lyme.
2. Waterfowl hunting in the Niantic River in the towns of Waterford and East Lyme is subject to the following regulations:
 - (a) Hunting is prohibited from the shore or in the intertidal area without permission of the riparian property owner.
 - (b) Hunting is prohibited in the water area northerly of an east and west line which touches the southern tip of Sandy Point and includes Kenny Cove.
 - (c) Hunting from boats is permitted only along the midline of the river.
 - (d) Hunting is prohibited in Smith Cove and the channel entering Smith Cove in East Lyme.
3. Waterfowl hunting is prohibited in Alewife Cove and entrance channel, Waterford and New London, and in Jordan Cove north from the mean high water line on the northern side of the sand spit and island.
4. In Westport, waterfowl hunting is prohibited from the shores and waters shoreward of lines extending from the tip of Cedar Point to: a) the southerly tip of the stone breakwall at the eastern end of Compo Beach; and, b) the southwest tip of Hendrick's Point.
5. There shall be no waterfowl hunting in the tidal waters of Cove Harbor within 100 feet of the mean high tide mark of the Darien shore.

6. There shall be no waterfowl hunting in Cove Pond (Holly Pond), Stamford and Darien, north of the dam.
7. There shall be no waterfowl hunting in Poquetanuck Cove, bordered by the town of Preston and Ledyard.
8. Waterfowl hunting is prohibited in the area of Mason's Island known as Ram Point Cove inland of a line extending from the high water mark of the southernmost tip of Ram Point to the southernmost tip of Mason's Island bordering the eastern side of Ram Point Cove.
9. Waterfowl hunting is prohibited in the Black Hall River in Old Lyme in the area bordered on the south by Route 156 and on the north by the first upstream railroad crossing.
10. There shall be no waterfowl hunting in Assekonk Swamp WMA, North Stonington.
11. There shall be no waterfowl hunting in any direction within a 500-foot radius of the mean high tide mark at Merwin Point in Milford or from within an area bounded by the shoreline and a line from the southernmost extension of the 500-foot radius at Merwin Point westward to the southeastern shoreline at Pond Point in Milford.
12. Waterfowl hunting is prohibited in Bantam Lake in Litchfield and Morris.
13. There shall be no waterfowl hunting in the Mystic River from Route 27 south to Route 1 in Mystic and Groton.
14. There shall be no waterfowl hunting in or from the banks of Ash Creek north of the line drawn from the northern end of the steel railing on the fishing pier in Fairfield to the northern end of the stone sea wall in Bridgeport at the mouth of the creek where it enters Long Island Sound.
15. Waterfowl hunting in the Thames River in the town of Waterford is prohibited in Smith Cove northwest and above the railroad tracks, and from the shores and waters in the vicinity of Mamacoke Island in Mamacoke Cove westward of a line running from the easternmost point of land at Harrison's Landing due north to the point where it intersects the southernmost tip of Mamacoke Island, and from the shores and waters within the unnamed cove west of the southernmost point of shoreline of the unnamed waterbody west of the railroad tracks, the shores and waters of which shall also be closed to waterfowl hunting, to a point intersecting the shoreline of Mamacoke Island.
16. Waterfowl hunting is prohibited from the shore and water in the Giant's Neck area of East Lyme at the mouth of the Pataguanset River northward of a line running due west from the south end of the fixed pier located at the Giant's Neck Boat Association Launch to the south end of the breakwall located at the end of Point Road.
17. Waterfowl hunting is prohibited from the shores and waters of Long Island Sound in Greenwich as follows:
 - In Greenwich Cove, north of a line extending from the easternmost point of land at Willowmere Point to the northernmost point of land on the peninsula immediately north of Meadow Place.
 - In Cos Cob Harbor, north of a line extending due east from the southernmost point of land at the power plant property off of Sound Shore Road to the shoreline adjacent to Glen Avon Road.
 - In Greenwich Harbor, Smith Cove, and Indian Harbor, north of a line extending from the northernmost tip of the area known as Round Island on the west side of Greenwich Harbor to the southernmost tip of the peninsula at the end of Indian Field Road.
 - In Byram Harbor, north of a line extending northeastward from the end of Dock Road to the southeastern most tip of Gamecock Island across Byram Harbor to the southernmost tip of the unnamed peninsula immediately west of Harbor Drive.
18. Waterfowl hunting is prohibited from the shores and waters of the Branford River in Branford from Route 1 south to Montowese Avenue.
19. Waterfowl hunting is prohibited from the shores and waters in Post Cove in Deep River southward of the dike that extends across the northern edge of the cove.

20. Waterfowl hunting at Plum Bank WMA in Old Saybrook is prohibited north and east of a line extending from Southview Circle southeast to Gull Lane.
21. Hunting is prohibited in that part of Gulf Pond in Milford between the Milford breakwater and Metro North railroad tracks and in Milford Harbor from the Milford breakwater north to the Memorial Bridge.
22. Hunting is prohibited in Lake Wononscopomuc in Salisbury.
23. Waterfowl hunting is prohibited from the shores and waters of the Housatonic River in Stratford and Milford southward from the I-95 bridge to a line running east and west across the river that includes the northern-most tip of the island in the river that occurs adjacent to the end of Riverview Place in Stratford.
24. There shall be no waterfowl hunting on the West River in West Haven south of Route 1 and north of Route 122 (Kimberly Avenue).
25. Waterfowl hunting is prohibited from the shores and waters of the Quinnipiac River downstream from the Middletown Avenue Bridge south to the Amtrak/Route 1 bridge near the mouth of New Haven Harbor.
26. There shall be no waterfowl hunting on the West River in Guilford south of Route 1 and north of Route 146.

Report Waterfowl Bands

Reporting waterfowl bands is crucial for management decisions. Leg band return data help managers track waterfowl movements, timing of these movements, harvest rates, and other important information. Bands and other markers, such as neck collars, can be reported at www.reportband.gov. When you report band recoveries, you will receive immediate feedback on where the bird was initially banded and can print a Certificate of Appreciation.

Don't Forget About HIP

Migratory bird hunters are reminded that the HIP permit is purchased as part of the Connecticut Migratory Bird Conservation Stamp. Those hunting for ducks, coots, geese, brant, woodcock, rails, snipe, or crows are required to obtain the Stamp along with their license. The Migratory Bird Stamp can be purchased online at <https://ct.aspirafocus.com/internetsales> or at select town halls for \$17.00. The Stamp must be purchased annually. Information derived from HIP permits is used to estimate the total waterfowl harvest across the country. These estimates are very important because they help determine federal waterfowl regulations. Please fill out the survey truthfully and entirely.

State-owned or Controlled Waterfowl Hunting Areas

The following areas are open for waterfowl hunting. This list is not inclusive; however, it represents areas where a majority of waterfowl hunting occurs. A full list of areas that are open to waterfowl hunting can be found in the Hunting and Trapping Guide and maps of these areas are available on the hunting area map section of the DEEP website (<https://portal.ct.gov/DEEP/Hunting/Public-Hunting-Areas>; select the query button on the top right of the map to obtain a list of areas open to waterfowl hunting). Please note that other types of hunting and recreational activities may be allowed at these areas.

Town	Area
Andover	Bishops Swamp WMA
Barkhamsted	Peoples State Forest
Bloomfield	Bloomfield Flood Control Area (Site 2) ^d
Burlington	Sessions Woods WMA ^d
Canaan	Robbins Swamp WMA
Canterbury, Plainfield	Quinebaug River WMA
Colchester	Salmon River State Forest (including Holbrook Pond)
Colebrook, Hartland	MDC-Colebrook Reservoir/Hogback Dam
Cornwall	Wyantnock State Forest
Cromwell, Middletown	Cromwell Meadows WMA
Durham	Durham Meadows WMA
East Haddam, Colchester	Babcock Pond WMA ^a
East Haddam, Haddam	Salmon River Cove and Haddam Neck ^b
East Lyme	Nehantic State Forest ^c
East Windsor, Enfield	East Windsor-Enfield Area ^d
East Windsor	Scantic River State Park ^{c, d}
Eastford	Natchaug State Forest ^c
Eastford, Union, Ashford	Yale Forest (owned by Yale University) ^d
Enfield, Suffield	NU-Kings Island Cooperative WMA
Goshen	Mohawk State Forest (Ziegler/Johnson Tract)
Guilford	East River Marsh WMA ^b
Guilford	Great Harbor WMA
Haddam	Higganum Meadows WMA
Haddam	Cockaponset State Forest ^c
Hartland	Tunxis State Forest
Harwinton	Roraback WMA
Hebron	Raymond Brook Marsh
Kent	Housatonic River WMA
Killingly, Sterling	Ross Marsh WMA
Lebanon	Bartlett Brook WMA
Lebanon	Red Cedar Lake (Camp Mooween)
Lebanon, Colchester	Lebanon Coop Mgmt. Area ^d

Lyme	Lord's Cove WMA ^b
Lyme	Nott Island ^b
Lyme	Selden Neck State Park (Selden Island) ^b
Mansfield	Mansfield State-leased Field Trial Area
Mansfield, Chaplin	Mansfield Hollow Lake (excluding State Park)
Middlefield	Black Pond WMA
New Hartford	MDC-Greenwoods Pond
North Franklin	Franklin Swamp WMA
North Haven	Quinnipiac River Marsh ^b
Old Lyme	Roger Tory Peterson Wildlife Area ^b
Old Saybrook	Plum Bank Marsh
Old Saybrook	Ragged Rock Creek WMA ^b
Old Saybrook	South Cove ^b
Oxford, Beacon Falls	Naugatuck State Forest
Portland	Wangunk Meadows
Portland, etc.	Meshomasic State Forest
Ridgefield	Bennett's Pond State Park
Salem	Zemko Pond WMA
Salisbury	East Twin Lakes Water Access Area
Scotland	Mohegan State Forest
Sharon	NU-Skiff Mtn. Coop WMA ^d
Sharon	Housatonic State Forest
Simsbury	Simsbury WMA
Stafford	Ellithorpe Flood Control Area
Stafford	Shenipsit State Forest
Stonington	Barn Island WMA
Stratford	Stewart B. McKinney National Wildlife Refuge ^e (Great Meadows Unit)
Stratford, Milford, Orange	Charles E. Wheeler WMA ^b
Thompson	West Thompson Dam (federal public land)
Tolland	Kollar WMA
Torrington	John Minetto State Park
Torrington	Paugnut State Forest
Torrington	Sunnybrook State Park (west of Newfield Rd.)
Union	Nipmuck State Forest
Voluntown	Pachaug State Forest ^c

^a Handicap accessible blind available

^b Access by boat only

^c Some areas designated as firearm restricted, bowhunting only

^d Permit required (Season permits for Bloomfield Flood Control Site 2, contact Bloomfield Town Hall; Yale Forest, contact Joe Orefice at joe.orefice@yale.edu or 518-354-3170.

^e Permit required through Stewart B. McKinney NWR at 860-399-2513
