

Urban Mining Northeast

- The facility was commissioned late in 2020 despite following challenges and delays caused by COVID. Also due to COVID, there was no formal grand opening event.
- The facility is now fully operational, taking in both MRF glass and some source-separated glass from HRRRA's pilot program.
- UMN is making and shipping their finished product ([Pozzotive](#)) to customers.

Post-Consumer Recycled Content

- NERC & NEWMOA are looking to facilitate discussions on Post-Consumer Recycled Content standards
- NERC's Glass Committee will be looking at standards for glass
- A joint NEWMOA/NERC group will be looking at standards for other materials (e.g., plastics)
- These efforts are consistent with CCSMM recommendations to help create more market demand for post-consumer recycled materials

CCSMM Meeting Resources

- [Main CCSMM webpage](#)
 - Includes links to previous CCSMM newsletters (which contain links to recording of the meetings)
 - Sign up for CCSMM email list [HERE](#)
- Materials from [Full Coalition Meetings](#)
- Materials from the [EPR Working Group](#)
- Materials from the [Organics Working Group](#)
- Materials from the [Unit-Base Pricing Working Group](#)
- Materials from the [Increase Recycling Working Group](#)
