Ruby-throated Hummingbird

Ruby-throated hummingbirds are the smallest birds found in Connecticut. They visit flowers for nectar and can often be seen in or near home gardens.

Head and throat: Both sexes have a green head. The male bird has a red throat; the female's throat is white.

Body: Green on top to sides for male; green on top for female. White on breast for both.

Tail: Sides and tips are black; the rest is greenish.
